

2021 LABOR-MANAGEMENT HEALTHCARE FUND/PHARMACY BENEFIT DIMENSIONS DRUG FORMULARY

This Drug Formulary represents the list of drugs and their appropriate copayment tiers for Labor-Management Healthcare Fund.

Note: If you are reading a printed version of this drug formulary, content may have been updated since it was last printed. For the most up-to-date information, please visit www.pbdrx.com.

This formulary lists all covered Tier 1 and Tier 2 drugs, but only contains a representative list of the Tier 3 products. Generic drugs appear in lower case. Brand name drugs are capitalized.

- Formulary/preferred generic drugs, select Over the Counter (OTC) drugs listed on the Formulary are assigned to a Tier 1 copayment. Preferred brand name drugs will take a Tier 2 copayment and non-preferred brand name drugs will take a Tier 3 copayment. Generic substitution is used only as required by state pharmacy laws.
- The formulary follows a “Mandatory Generic” policy which means that in most instances, once a generic product is available for which there are no bioequivalence concerns, the copayment for the brand name drug will be your Tier 2 or Tier 3 copayment plus the difference in the cost of the generic drug and the brand name drug these drugs are listed in the formulary with a “DAW” symbol. A copay override may be authorized through the exception process for the brand name drug if a bioequivalent generic is available. Authorization is only provided to waive the requirement that the member pay the difference between the cost of the generic drug and brand name drug plus the tier copayment to only being responsible for the tier copayment, if the member has tried and failed to tolerate or respond to all preferred medications for the condition being treated.
- Not all Tier 3 drugs are listed in the formulary. Most drugs not listed may be obtained, but the member will be responsible for their tier 3 copayment.
- Labor-Management Healthcare Fund and/or Pharmacy Benefit Dimensions reserves the right to modify the copay tier of a particular drug as necessary.
- Option 90 Program: This program allows you to obtain up to a 90-day supply of maintenance medications at your local retail pharmacy or at any of our mail order vendors: ProAct Pharmacy Services or Wegmans Mail Order Pharmacy Services. These medications must be filled for a 30-day supply first at a retail pharmacy and then a 90-day supply can be obtained either under the Option90 Program at a retail pharmacy or through mail order with ProAct Pharmacy Services or Wegmans Mail Order Pharmacy Services. Information about maintenance medications and mail order vendors is provided on pages IV and V. Option 90 retail pharmacies and mail order vendors offer reduced copayments for your 90-day supply.
- Please note that some drugs and/or drug classes, even though not listed on the Formulary, may require prior authorization. Your physician will need to complete a prior authorization request form and fax it to Pharmacy Benefit Dimensions. This form can also be used by your physician to submit information to support a request for an exception to the formulary. The details of the request will be reviewed by

Pharmacy Benefit Dimensions and a response is usually provided within 48-72 hours. The request for prior authorization does not guarantee coverage.

- Most self-administered injectable drugs require prior authorization. Some exceptions are: insulin, glucagon, epinephrine emergency kits, etc. Drugs not intended for self-administration are not covered under the pharmacy benefit and should be obtained and administered by an appropriate healthcare professional.
- Medications listed on the drug formulary as covered without restriction may require prior authorization or may not be covered if it is determined that they are being used in conjunction with a procedure or treatment not covered under the LMHF summary plan description.
- Drugs not listed in the formulary which are covered under the Affordable Care Act (ACA) as preventative services may be covered. Certain restrictions may apply.

FORMULARY SYMBOLS

Below is a list of symbols used throughout the formulary and their descriptions.

AL	Age Limit	Some prescription medications are restricted by age due to safety reasons or Food and Drug Administration (FDA) recommended labeling. Medications with an age limit are listed with an “AL” in the formulary.
DAW	Dispense as Written	A generic equivalent is available for the brand name drug. The copayment for brand name drugs with the DAW symbol will be a tier 2 or tier 3 copayment plus the difference in cost between the generic drug and brand name drug.
MM	Maintenance Medication	A 90-day supply may be prescribed and dispensed. Controlled substances are allowed (but are not required) to be written for a 90-day supply per New York State Law. Maintenance medications must be filled for a 30-day supply first at a retail pharmacy and then a 90-day supply can be obtained either under the Option90 Program at a retail pharmacy or through mail order with ProAct Pharmacy Services or Wegmans Mail Order Pharmacy Services. Information about the mail order vendors is provided on the next page. Option90 retail pharmacies and mail order vendors offer reduced copayments for your 90-day supply.
OTC	Over the Counter	Certain OTC drugs listed in the formulary are over the counter. A prescription is required for coverage of the OTC products listed in the formulary.
PA	Prior Authorization Required	Prior authorization must be obtained in order for the drug to be covered. A drug labeled as “PA except...” means that the physician specialties listed may prescribe the drug without requesting prior authorization. All other physicians may prescribe the drug, but must submit a prior authorization request for review.
QL	Quantity Limit	Limits may be set by number of tablets/capsules per fill, number of fills per month/year, maximum daily dose, etc. Note: Certain drugs are dose limited by a maximum daily dose. Limits may be set by the number of tablets/capsules per day or the total daily dose in mg. Not all dose limitations are indicated in the formulary document. Where a package size exists those products will be limited to one package size per fill.
ST	Step Therapy	In some cases, you may be required to first try certain medications to treat your medical condition before we cover another medication for that condition. Step therapy is a way to help you get the best quality and value from your prescription medication benefit. This usually means that an equally effective generic medication is prescribed before a more expensive brand-name medication. Step therapy may also ensure that two medications are used together if they are more effective
SP	Specialty Medication	Specialty medications can include but are not limited to those that are either self-injectable, require special distribution, handling and/or are in limited supply and certain oral oncology medications.
LA	Limited Access	Limited access medications are restricted to designated pharmacies.
