

## An Introduction to Independent Health's Drug Formulary III

**The following information applies to small group plans available directly from Independent Health, as well as those offered through the NY State of Health: The Official Health Plan Marketplace – for small businesses through the Small Business Marketplace. Check your summary of benefits to ensure this formulary (Drug Formulary III) is associated with your plan prior to using your prescription drug benefit.**

**Note: If you are reading a printed version of this drug formulary, content may have been updated since it was last printed. For the most up-to-date information, please visit [independenthealth.com](http://independenthealth.com).**

Independent Health members benefit when their health care providers use the formulary because all medications included are selected due to their effectiveness and safety. Use of a formulary also ensures that premiums are kept to a minimum. The cost of each medication on the formulary is balanced with its effectiveness, which means that medications are not included on the formulary just because they are inexpensive; effectiveness is more important than the price of the medication. If a medication is not capable of achieving the desired effect, then the price of treating an illness or condition increases because other therapies must be used. Likewise, there are expensive medications that have not been proven to be any more effective than less costly alternatives.

Since 1996, all prescriptions for Independent Health members have been written from the formulary in order to qualify for coverage. When health care providers write a prescription for Independent Health members, they consult the formulary and select the medication needed. Occasionally, members need a medication that is not on the formulary. In cases when it is medically necessary for a patient to have a medication that is

not included on the formulary, health care providers are encouraged to request a medical exception from Independent Health's Medical Director. The health care provider will need to complete a medical exception form and fax it to Independent Health's Prior Authorization Department, who will review the details of the case.

Independent Health's three-tiered formulary lets you decide among preferred generic, preferred brand-name and non-preferred brand/generic medications with three different copayment/coinsurance levels:

- The lowest copayment is charged in Tier 1. This tier contains preferred generic medications, certain over-the-counter (OTC) medications and select brand-name medications.
- A higher copayment/coinsurance is charged for those medications in Tier 2. This tier contains non-preferred generic medications and preferred brand-name medications.
- The highest copayment/coinsurance is charged for those medications in Tier 3. This tier contains non-preferred brand-name medications and certain specified medications.
- Brand-name medications with a generic equivalent are considered non-formulary (not covered). To obtain a medication that is non-formulary your health care provider is encouraged to submit a prior authorization request for coverage through the exceptions process. If the request is approved, that particular medication will be covered at your Tier 3 copayment/coinsurance level.

All medications listed on the formulary will be available to you and you will be responsible for payment of the copayment/coinsurance as referenced in this document. You will note on the list that a medication's copayment/coinsurance is assigned to a tier. How this affects your

copayment/coinsurance depends upon what prescription plan you have. Independent Health reserves the right to modify the copay/tier of a particular medication as necessary. For example, when a generic equivalent becomes available for a covered brand-name medication, the brand-name medication becomes non-formulary (not covered) and will be covered only if approved through the medical exception process. Independent Health reserves the right to change the duration of an approved prior authorization through the medical exception process, including but not limited to the termination of a previously approved authorization. Approval of a prior authorization request does not itself guarantee payment; payment is made based on plan/benefit design. The generic equivalent medication will be covered in Tier 1 or Tier 2. Because of this, the actual copayment/coinsurance paid may not match the copayment/coinsurance tier levels as published in this document. To determine which prescription plan you have, please refer to your contract. If you have further questions, you may contact Independent Health's Member Services Department.

Because there are thousands of medications in the marketplace, not all Tier 3 non-preferred medications can be listed here. Independent Health makes every attempt to provide you with as accurate a listing of medications as possible, however the list of medications and availability of generics can change frequently. Since this list was created, some medications may have been added, while others may have been deleted. For an updated version of the formulary please visit our website at [independenthealth.com](http://independenthealth.com).

### **Prior-Authorization**

Independent Health requires you to get prior authorization for certain medications. To obtain coverage for a medication requiring prior authorization, a prior authorization request for medical exception must be submitted by your health care provider and approved by Independent Health's Medical Director. Medications that require prior authorization are listed with a "PA" in the formulary.

### **Step Therapy**

In some cases, Independent Health requires you to first try certain medications to treat your medical condition before we cover another medication for that condition. Step therapy is a way to help you get the best quality and value from your prescription medication benefit. This usually means that an equally effective generic medication is prescribed before a more expensive brand-name medication. Step therapy may also ensure that two medications are used together if they are more effective. Medications that require step therapy are listed with a "ST" in the formulary.

### **Quantity Limitations**

Quantity limitations may apply to certain medications. Some medications are covered up to a specific quantity per 30 or 90 days. Some examples of medications with a quantity limitation are: sumatriptan (generic Imitrex<sup>®</sup>) and zolpidem tartrate (generic Ambien<sup>®</sup>). Medications with quantity limitations are listed with a "QL" in the formulary.

### **Specialty Medications**

In order to add value and accessibility in your pharmacy benefits, we offer a specialized prescription medication program for certain specialty medications through Reliance Rx<sup>®</sup> Specialty Pharmacy. Specialty medications include those that are either self-injectable, require special distribution, handling and/or are at limited supply and certain oral oncology medications. These medications are restricted to designated pharmacies such as Reliance Rx. Reliance Rx specializes in providing high-quality service for complex chronic conditions such as hepatitis, multiple sclerosis, cancer and rheumatoid arthritis.

Along with providing these specialized medications, Reliance Rx also provides a convenient way for you to receive the medication, by arranging delivery at no charge directly to your home. They can also provide you with education on the medication you're taking, refill reminders and even the necessary supplies, if applicable. Specialty medications are listed with an "SP" on the

formulary. Reliance Rx can be reached at 1-800-809-4763.

### **Age Restriction**

Some prescription medications are restricted by age due to safety reasons or Food and Drug Administration (FDA) recommended labeling. Medications with an age limit are listed with an "AL" in the formulary.

### **Maximum Daily Dose (MDD)**

Certain medications are dose limited by a maximum daily dose (MDD) as recommended by the Food and Drug Administration (FDA) for safety reasons. Limits may be set by the number of tablets/capsules per day or the total daily dose.

### **Maintenance Medications**

Independent Health allows up to a 90-day supply of certain medications to be filled. Medications eligible to be filled for a maintenance supply are indicated on the formulary. Medications eligible for up to a 90-day supply are listed with an "MO" on the formulary.

### **Over-the-Counter (OTC) Medications**

Certain medications listed in the formulary are available over the counter. A prescription is required for coverage of the OTC products.

### **Sedative/Hypnotic Medications**

Sedative/hypnotic medications are limited for all prescribers except sleep specialists to 14 tablets/capsules per month with a maximum of 3 fills per year (3 fills/365 days).

### **Tablet Splitting**

Tablet splitting is the act of physically cutting a higher strength tablet in half to achieve your prescribed dosage. This provides an identical dose while increasing the number of total doses available. For example, by splitting pills in two, 30 tablets can be transformed into a 60-day supply for the same copayment/coinsurance. Not all medications are good candidates for tablet splitting. We recommend that you speak with your health care provider or pharmacist to see if your medication meets splitting requirements. Please note this is a voluntary program. Tablet splitting is

not mandated by your plan. Medications eligible for tablet splitting are listed with an "HT" on the formulary.

### **Compounded Prescription Medications**

Compounded prescriptions (medications that are not commercially manufactured) must be prepared by a participating pharmacy and contain at least one prescription component. The dispensing pharmacy is required to submit for prior approval and when covered the compounded prescription will be available at a Tier 2 copayment/coinsurance. Coverage is provided in accordance with our Compounding Medication Products Policy. Bulk products and powders are excluded from coverage because they are not prescription medication products that are approved under sections 505, 505(j) or 507 of the Federal Food, Drug, and Cosmetic Act.

### **Diabetic Supplies/Medications**

Products listed in this section are a covered benefit based on your plan. Products not listed require prior authorization. Copayments vary by plan.

OneTouch glucose meters, lancets, test strips, and supplies are our preferred diabetic supplies and do not require prior authorization.

One Touch will provide a glucose meter to you with no copayment. Quantities are limited to one meter per member. You can obtain a meter by calling LifeScan, Inc. at 1-888-377-5227, offer code 289IHA001. Please have your ID number available when you call.

Diabetic test strips are limited to a maximum of 100 per fill/30 days.

### **Antibiotic Medications**

Antibiotics are generally limited to a 10-day supply with one refill within 15 days after the original fill.

### **Affordable Care Act (ACA)**

#### **Preventive Services**

Medications listed on the formulary that are covered as preventive services under the Affordable Care Act may be covered. Certain restrictions may apply.

## Lost/Stolen/Damaged Medications

Replacement of any lost, stolen or damaged medications is the responsibility of the member.

## Emergency Room Prescriptions

Emergency Room prescriptions are limited to a 10-day supply.

## Dental Formulary

Drugs covered on our Dental Formulary are available when prescribed by a dental provider. Unless otherwise specified, all products are limited to a 10-day supply with one refill. Drugs included in our Dental Formulary are listed with a "DF" on the formulary. Drugs without a "DF" will not be covered when written by a dental provider.

## Additional Formulary Information

- Appetite suppressants/weight-loss medications are excluded from coverage.
- Medications used for cosmetic purposes are excluded from coverage.
- Medical devices (which may or may not require a prescription) are excluded from coverage.
- Medical foods other than PKU supplements (which may or may not require a prescription) are excluded from coverage.
- Drugs used for the treatment of impotence (ED Drugs) are limited to male patients only. Duplicate therapy with other ED medications is not allowed.
- Prenatal vitamins classified as medical foods are not covered. Multivitamins are NOT included in the Formulary as various OTC products are available.
- Contraceptives (for members with contraceptive coverage): All tier 1 generic drugs are covered at a \$0 copayment. Brand-name drugs without a generic equivalent are covered at a \$0 copayment. Brand-name drugs with a generic equivalent are covered at the copayment based on your plan design. Cervical caps, diaphragms, female condoms, and spermicides are covered at a \$0 copayment. Both prescription and

over-the-counter (OTC) products are covered only when prescribed by a licensed health care provider and require a valid prescription.

- Medications listed on the drug formulary as covered without restriction may require prior authorization or may not be covered if it is determined that they are being used in conjunction with a procedure or treatment not covered under the members Health Contract.
- Medications not recognized by the FDA without a National Drug Code (NDC) are excluded from coverage.
- Generic substitution is used only as required by state pharmacy laws. Therapeutic interchange is not utilized.

## Key

AL – Age Limit

DF – Dental Formulary

HT – Tablet Splitting

MO – 90-day supply

PA – Prior Authorization Required

QL – Quantity Limits Apply

RF – Restricted to Females

RM – Restricted to Males

SP – Specialty Pharmacy

ST – Step Therapy
