

***Tufts Health RITogether***  
**Pharmacy program and *Preferred Drug List***  
**December 1, 2017**

## **Introduction**

### **Pharmacy program**

We aim to provide high-quality, cost-effective options for drug therapy. We work with your health care providers and pharmacists to make sure we cover the most important and useful drugs for a variety of conditions and diseases. We cover both first-time prescriptions and refills. We also cover some [over-the-counter \(OTC\) drugs](#) if your provider writes a prescription and it is filled at a pharmacy.

Our pharmacy program does not cover all drugs and prescriptions. Some drugs must meet certain clinical guidelines before we can cover them. Your provider must ask us for prior approval before we will cover these drugs.

### ***Preferred Drug List (PDL)***

We list all drugs according to their therapeutic category and drug class, followed by generic or brand drug name. Use the index to find a drug according to its generic or brand name. In general, we cover brand-name medications only when a generic medication is not available or if we give prior approval for the brand-name drug.

### **Co-payments**

Outpatient drugs that are medically necessary are covered when they are prescribed by a provider who is licensed to prescribe drugs. Some drugs on the *Tufts Health RITogether* formulary are only covered when your provider submits a prior approval request. Eligibility for outpatient prescription drug benefits and co-payment amounts are based on your individual benefit plan.

The *PDL* applies only to drugs you get at retail and specialty pharmacies. The *PDL* does not apply to drugs you get if you are in the hospital. Drugs you get while in the hospital are covered as part of your stay.

For the most current *PDL* coverage information, please visit [tuftshealthplan.com](http://tuftshealthplan.com) or call us at **866.738.4116** (TTY: 711).

### **Prior approval**

Some drugs always require prior approval, which means your provider must ask us for approval before we will cover the drug. One of our clinicians will review this request. We will cover the drug according to our clinical guidelines if:

- There is a medical reason you need the particular drug
- Depending on the drug, other drugs on the *PDL* have not worked

If we do not approve the request for prior approval, you or your authorized

representative, if you identify one, can appeal the decision. See your [Member Handbook](#) for our member grievances and appeals information.

### **Step therapy program**

We cover some types of drugs only through our step therapy program. Our step therapy program requires you to try first-level drugs before we will cover another drug of that type. If you and your provider feel a certain drug is not appropriate for treating your health condition, your provider can ask us for prior approval for the other drug. One of our clinicians will review the request. We will cover the drug according to our clinical guidelines. If we do not approve the request for prior approval, you or your authorized representative, if you identify one, can appeal the decision. See your [Member Handbook](#) for our grievances and appeals information.

### **Quantity limit**

To make sure the drugs you take are safe and that you are getting the right amount, we may limit how much you can get at one time. Your provider can ask us for prior approval if you need more than we cover. One of our clinicians will review the request. We will cover the drug according to our clinical guidelines if there is a medical reason you need this particular amount. If we do not approve the request for prior approval, you or your authorized representative, if you identify one, can appeal the decision. See your [Member Handbook](#) for our grievances and appeals information.

### **Generic drugs**

Generic drugs have the same active ingredients and work the same as brand-name drugs. Rhode Island has a Generic First Program and requires that all members use generic drugs first. When generic drugs are available, we will not cover the brand-name drug without giving prior approval. If you and your provider feel a generic drug is not right for treating your health condition and that the brand-name drug is medically necessary, your provider can ask for prior approval. One of our clinicians will review the request. If we do not approve the request for prior approval, you or your authorized representative, if you identify one, can appeal the decision. See your [Member Handbook](#) for our grievances and appeals information.

### **New-to-market drugs**

We review new drugs for safety and effectiveness before we add them to our *PDL*.

### **Coverage limits**

The Requirements/Limits column in the *PDL* shows when a drug has a certain requirement or limit for coverage. Coverage limits include:

- **AGE** — Age restriction may apply  
This medication requires prior approval if the drug is not covered based on your age. Your provider should send us a prior approval request if the drug is medically necessary.
- **PA** — Prior approval  
This medication requires prior approval. Your provider may prescribe a different medication on the *PDL* or send us a prior approval request.
- **QL** — Quantity limit  
This medication is limited to a specific amount. If a larger amount is medically necessary, your provider should send us a prior approval request.
- **ST** — Step therapy  
This medication requires prior approval if you have not already used a first-line medication on the *PDL*. Your provider may prescribe another medication on the *PDL* or send us a prior approval request.

### **Specialty pharmacy program**

A specialty pharmacy may supply you with some drugs often used to treat chronic conditions like hepatitis C or multiple sclerosis. These types of drugs need additional expertise and support. Specialty pharmacies have knowledge in these areas. These pharmacies can give extra support to members and providers.

CVS Specialty is our specialty pharmacy and can provide you with these drugs. In addition to providing specific specialty drugs, CVS Specialty will:

- Deliver drugs to your home, provider's office or any delivery address you choose (except for a P.O. box)
- Answer your questions and offer help with your drugs
- Give you information, materials and ongoing support to help you manage your health condition and make sure you take your drugs the right way
- Have staff pharmacists available who can help you at 800.237.2767.

# DISCRIMINATION IS AGAINST THE LAW
