

# Blue Shield Drug Formulary, Standard Booklet

2014-2015  
December 2015 update

# Introduction to the drug formulary

The Blue Shield Drug Formulary, Standard serves as a guide for members, physicians, and other healthcare professionals in the selection of cost-effective drug therapy. To ensure that the medications prescribed are covered, and to minimize member out-of-pocket expenses, we recommend that members and prescribers consult the Blue Shield Drug Formulary, Standard before writing or filling prescriptions.

The Blue Shield Drug Formulary, Standard is a list of preferred generic and brand medications that are approved by the Food and Drug Administration (FDA) and are eligible for coverage under the Blue Shield outpatient prescription drug benefit.

## Blue Shield outpatient prescription drug benefits

The drug formulary includes generic drugs, preferred brand drugs, select non-preferred brand drugs and specialty drugs. Prior authorization approval may be required for coverage of some drugs. If coverage for a non-preferred brand drug requiring prior authorization is approved, members are responsible for the non-preferred brand copayment.

Copayments for generic drugs are typically lower than the copayments for preferred brand, non-preferred brand, and specialty drugs. For most plans, if members select a brand drug when a generic equivalent is available, they will pay their generic copayment plus the difference between Blue Shield's cost for the brand drug and its generic equivalent.

Because there are thousands of medications included in Blue Shield's outpatient prescription drug benefit plan, we list only the most commonly prescribed ones. Please remember that this is not a complete list of medications covered under all plans. The fact that a drug is listed in the formulary does not guarantee that it will be prescribed by a physician. Additional information about specific prescription drug benefits and drug benefit exclusions can be found in the Blue Shield Summary of Benefits and *Evidence of Coverage* (EOC) or *Certificate of Insurance* (COI)/Policy. Blue Shield's customer service can also provide additional information about specific plans. The Blue Shield customer service number is listed on the Blue Shield member ID card.

**The formulary is current as of the date listed on the back cover.** This formulary is subject to change on a quarterly basis. For the most current information, the Blue Shield, Standard formulary can be accessed on our website at [blueshieldca.com](http://blueshieldca.com) by clicking on the *Members* tab and then selecting *Pharmacy*.

**Note:** Blue Shield Drug Formularies apply to outpatient prescription drug benefits available through plans underwritten by Blue Shield of California and Blue Shield of California Life & Health Insurance Company (individually and/or collectively referred to as Blue Shield throughout this document).

## How to read the formulary

Drugs are listed in the drug formulary by therapeutic class, and a Table of Contents and Index of Drugs are provided for quick and easy reference. Additional information should be noted when consulting this formulary:

- Generic drugs begin with lowercase letters.
- Brand drugs begin with capital letters.
- The column titled "Tier" identifies the copayment tier for a drug.
  - Commonly used drugs on Tier 3 are listed in this formulary.
  - All other non-specialty brand drugs not listed are on Tier 3.

Tier number	Tier name	Description
1	Generic	Generic drugs
2	Preferred brand	Preferred brand drugs
3	Non-preferred brand	Non-preferred brand drugs
4	Specialty	Covered specialty drugs*

\* See your Evidence of Coverage for further details about coverage of Specialty drugs in your benefit.

- The column titled "Limits/Notes" identifies coverage restrictions or limits for drugs when applicable.

Limits/ Notes	Definition	Description
AL	Age Limit	Coverage restricted by age
GL	Gender Limit	Coverage restricted for gender
PA	Prior Authorization	Prior authorization required to determine coverage
QL	Quantity Limit	Coverage restricted by prescription quantity
ST	Step Therapy	Coverage determined based on use of other first-line therapies/drugs

## How is the drug formulary developed?

The formulary is developed, maintained, and updated quarterly by the Blue Shield Pharmacy and Therapeutics (P&T) Committee. Voting members of the P&T Committee are licensed physicians and pharmacists in community practice who are not employees of Blue Shield. The P&T Committee reviews medical literature concerning safety, effectiveness, and current use in therapy to determine whether the drug should be included in our formulary.

## What is a brand drug?

A brand drug is a medication that has been approved by the FDA for sale and marketing in the United States, and that has patent protection that limits which manufacturer(s) can make and sell the medication. Generic versions of brand drugs cannot be made or sold until the patent has expired. Once the patent has expired, generic versions of the medication can be sold alongside the brand version. The Blue Shield Drug Formulary, Standard includes many brand drugs.

## What is a generic drug?

A generic drug has the same active ingredient and dosage form (e.g., tablet or capsule), and works in exactly the same way as its brand counterpart. When the patent protection on a brand drug expires, other drug manufacturers can apply to the FDA to make a generic version of the drug. The FDA approves generic drugs when manufacturers have proven that the generic version is equally safe and effective as the brand counterpart. Generic drugs usually cost less than the brand equivalent. Therefore, using generic drugs instead of a brand drug is one of the easiest ways to reduce your prescription costs. Most Blue Shield health plans provide a lower copayment for generic drugs, compared with brand drugs. Most generic drugs are covered even if they are not listed in the drug formulary.

## What is a contraceptive drug or device?

Contraceptive drugs or devices include generic drugs, brand drugs, diaphragms, or cervical caps used predominantly for the purpose of preventing pregnancy. All generic contraceptive drugs and most contraceptive devices are covered at no charge to members.\* Most brand contraceptives require a copayment, which may be waived based on medical necessity. Physicians or members may provide medical necessity information using the prior authorization process, by calling or faxing a form to Blue Shield Pharmacy Services.

Contraceptive drugs or devices covered at no charge to members are listed in the formulary with an "X," while those requiring a copayment are listed with an "XX."

\* Does not apply to grandfathered plans.

## **What are preventive health drugs?**

Preventive health drugs are select drugs required by Health Reform to be covered at no charge to members.\* Preventive health drugs are determined based on evidence-based recommendations by the United States Preventive Services Task Force. For more details about preventive health drugs, visit our website at [blueshieldca.com](http://blueshieldca.com) and click on the Members tab and then selecting *Pharmacy*.

## **What are specialty drugs?**

Specialty drugs are those drugs used to treat complex or chronic conditions, and which usually require close monitoring, such as multiple sclerosis, hepatitis, rheumatoid arthritis, cancer, and other conditions that are difficult to treat with traditional therapies. Specialty drugs may be self-administered in the home by injection (under the skin or into a muscle), by inhalation, by mouth, or on the skin. These drugs may also require special handling, special manufacturing processes, and may have limited prescribing or limited pharmacy availability. Specialty drugs are obtained from a Blue Shield Network Specialty Pharmacy, and may require prior authorization for medical necessity by Blue Shield. If coverage is approved, the drug can be obtained only through one of our Network Specialty Pharmacies.

## **What is prior authorization?**

Drug prior authorization is a process to obtain advance approval of coverage for a prescription medication. Most medications are covered by Blue Shield without requiring prior authorization. However, some select drugs require a physician to provide information about the patient's prescription and medical history to determine coverage for medical necessity. Physicians or members may provide information for a prior authorization review by calling or faxing a form to Blue Shield Pharmacy Services.

Drugs requiring prior authorization for medical necessity are listed in the formulary with "PA."

## **What is step therapy?**

Step therapy is the practice of beginning drug therapy for a medical condition with drugs considered first-line treatment for safety and cost-effectiveness, then progressing to other drugs that may have more side effects or risks or that are more costly. Step therapy requirements are based on how the FDA recommends that a drug should be used, nationally recognized treatment guidelines, medical studies, information from the drug manufacturer, and the relative cost of treatment for a condition. Other common terms used for step therapy are: "prerequisite therapy," "prior therapy," or "step therapy protocol." If step therapy coverage requirements are not met for a prescription and a physician feels that the medication is medically necessary for a patient, a physician may request an exception to the coverage requirements by requesting a prior authorization review by contacting Blue Shield Pharmacy Services by phone or fax.

Drugs requiring step therapy for medical necessity are listed in the formulary with an "ST."

## **Participating retail pharmacies**

Prescriptions may be filled at any participating (network) pharmacy, unless it is a prescription for a specialty drug. Based on the outpatient prescription drug plan, members may be limited to no more than a 30-day supply of medication from participating retail pharmacies. Blue Shield contracts with a wide network of retail pharmacies. To find a network pharmacy, visit our website at [blueshieldca.com](http://blueshieldca.com) and click on the Members tab and then selecting *Pharmacy*.

## **Mail service pharmacy**

Blue Shield offers an easy-to-use mail service prescription drug program through our contracted mail service pharmacy, PrimeMail. Using the mail service drug program can save time and money, and is a convenient way to fill maintenance medications for up to a 90-day supply, depending on the plan. Maintenance medications are those prescribed to treat chronic conditions (like asthma, diabetes) and taken on a regular basis to maintain health. For more information on using the mail service prescription benefit, please visit *Mail Service Prescriptions* in the Members tab under the *Pharmacy* section of [blueshieldca.com](http://blueshieldca.com).

\* Does not apply to grandfathered plans.

## Table of Contents

<b>Analgesics</b>	3	Aromatase Inhibitors, 3Rd Generation	15	Dyslipidemics, Fibric Acid Derivatives	27
Analgesics	3	Enzyme Inhibitors	15	Dyslipidemics, Hmg Coa Reductase	27
Nonsteroidal Anti-Inflammatory Drugs	3	Molecular Target Inhibitors	15	Inhibitors	27
Opioid Analgesics, Long-Acting	4	Retinoids	16	Dyslipidemics, Other	27
Opioid Analgesics, Short-Acting	4	<b>Antiparasitics</b>	16	Vasodilators, Direct-Acting	
<b>Anesthetics</b>	6	Anthelmintics	16	Arterial/Venous	28

pindolol	1	
propranolol oral	1	
propranolol-hydrochlorothiazid	1	
timolol maleate oral	1	
<b>Calcium Channel Blocking Agents</b>		
afeditab cr	1	
amlodipine	1	
amlodipine-atorvastatin	1	QL (1 tab/day)
cartia xt	1	
diltiazem hcl oral capsule,extended release 24hr 240 mg, 300 mg, 360 mg	1	
diltiazem hcl oral tablet extended release 24 hr	1	
felodipine	1	
isradipine	1	
matzim la	1	
nicardipine oral	1	
nifedical xl	1	
nifedipine oral capsule	1	AL (PA required for those 65 years of age or older)
nifedipine oral tablet extended release	1	
nifedipine oral tablet extended release 24hr	1	
nimodipine	1	
nisoldipine	1	
verapamil oral	1	
<b>Cardiovascular Agents, Other</b>		
digitek oral tablet 125 mcg	1	AL QL (PA required if 65 years of age or older and > 1 tab/day)
digitek oral tablet 250 mcg	1	AL QL (PA required if 65 years of age or older and > 0.5 tab/day)
digox oral tablet 125 mcg	1	AL QL (PA required if 65 years of age or older and > 1 tab/day)
digox oral tablet 250 mcg	1	AL QL (PA required if 65 years of age or older and > 0.5 tab/day)
digoxin oral solution 50 mcg/ml	1	AL QL (PA required if 65 years of age or older and > 2.5 ml/day)
digoxin oral tablet 125 mcg	1	AL QL (PA required if 65 years of age or older and > 1 tab/day)
digoxin oral tablet 250 mcg	1	AL QL (PA required if 65 years of age or older and > 0.5 tab/day)
isoxsuprine	1	
pentoxifylline	1	
vecamyl	1	
<b>Diuretics, Carbonic Anhydrase Inhibitors</b>		
acetazolamide oral tablet	1	
dorzolamide	1	
methazolamide oral	1	
<b>Diuretics, Loop</b>		
bumetanide oral	1	
furosemide oral solution 10 mg/ml, 40 mg/5 ml	1	
furosemide oral tablet	1
