

UNITY HEALTH PLAN

STANDARD CHOICE DRUG FORMULARY

This formulary does not apply to Unity State and Local Government members or Unity BadgerCare Plus members.

State and Local Government members should call Navitus at (866) 333-2757 or visit www.navitus.com for information about your prescription drug benefits.

Unity BadgerCare Plus members must call the Wisconsin Department of Health and Family Services at (800) 362-3002 or visit www.forwardhealth.wi.gov for information about your prescription drug benefits.

Unity Standard Choice Drug Formulary Information

This Formulary serves members whose pharmacy benefits are covered by a fixed copay on a three or four tier plan and are part of the Quartz network. The most accurate way to be certain you are viewing the correct formulary document is to use the formulary wizard tool at www.Quartzbenefits.com.

This document is to be used as a tool to help you understand how specific drugs are covered under the Prescription Drug Formulary and is not a guarantee of coverage.

This document does not apply to State of Wisconsin employees whose drug benefit is administered by Navitus or BadgerCare members whose drug benefit is administered by ForwardHealth.

The most recent version is available at www.Quartzbenefits.com, or can be requested in hard copy format by calling (888) 450-4884. The formulary is also available on the Formulary Search MMIT application for mobile devices. For a detailed explanation of the pharmacy benefit, refer to the prescription drug benefit brochure available on the website or your Schedule of Benefits.

Using the Formulary Document

To search the document press "Ctrl-F" to open the "Find" box at the top of the document and enter the drug name. Drugs that do not have Food and Drug Administration (FDA)-approved generic formulations are only listed by brand name. The name may be listed multiple times in the document. Press "Enter" to tab through each entry.

Each page of the formulary has three columns; "Drug Name", "Tier", and "Notes". Drugs are grouped by therapeutic category and class and listed alphabetically within the class. Those available as a brand formulation only are listed in bold, capitalized text. Generic formulations are included in lowercase font. Branded generics, such as oral contraceptives (Apri, Jolessa, etc.), are also listed in bold, capitalized text.

The "Tier" column can help to identify which cost sharing tier applies to the drug and "Notes" contains indicators that may limit coverage of specific drugs (listed below). Medications listed as Tier 1 or Tier 2 are preferred (PR) while medications listed as Tier 3 are nonpreferred (NPR). Tier 4 drugs may be preferred or nonpreferred and will include an indicator in the "Notes" column.

General Drug Coverage Concepts

Exclusions: Some drug classes are not covered by your Quartz prescription benefit plan. Examples of these include hair loss drugs, sexual enhancement drugs, infertility drugs, most over-the-counter drugs, cosmetic treatments, and nutritional supplements / medical foods. Refer to your Prescription Drug Rider to view your specific exclusions. Excluded drugs are not listed on the formulary.

Nonformulary: These drugs are not benefit exclusions but are not covered. In most cases formulary alternatives are available. Exceptions for nonformulary medications can be considered for medical necessity. Exceptions can be submitted using the standard Quartz Medication Prior Authorization Request form. Nonformulary drugs are not listed on the formulary.

Over-the-Counter (OTC): Drugs that do not require a prescription from a doctor are not covered under the pharmacy benefit unless specifically listed on the formulary as approved by the Quartz Pharmacy & Therapeutics Committee.

Generic Substitution Policy: This policy states that when equivalent generics are available for a drug, the brand product is restricted. If your healthcare practitioner feels it is medically necessary to receive the brand-name product, a prior authorization must be submitted for review. Objective documentation from the provider of a clinically significant change in symptom control or new side effect that occurred with the generic formulation that was not seen with the branded product must be included with the prior authorization request. These changes must happen in a time frame consistent with the properties of the drug and not be related to normal disease fluctuations or other nondrug factors. Nondrug causes for a perceived reaction must be addressed and ruled out by a health care professional. Approved brand name product authorizations will process with a nonpreferred Tier 3 copay when filled at the pharmacy. Refer to the prescription drug benefit brochure and the prior authorization criteria on the Quartz website for more details.

Compounded Drugs: Compounded drugs are usually defined as medications prepared at the pharmacy for an individual person. They include changing existing drugs into a new formulation or dose that is not commercially available or creating mixtures of drugs into a new combination product. Quartz requires the submission and approval of a Medication Prior Authorization Request form for many compounded prescriptions including compounded hormones (such as estrogen, progesterone, or testosterone). The criteria for coverage and forms are available on the Quartz website at www.Quartzbenefits.com.

RX Outcomes (RXO): Some drugs have been shown to improve the overall health of people with health problems like high blood pressure, high blood sugars (diabetes mellitus), and breathing difficulties (asthma) when taken daily. For members whose plan includes the RX Outcomes benefit, the drugs noted as RXO in the "Notes" section and products listed in Appendix B will process with a value tier copay.

Tier 4 cost share (T4): Some members have specific benefits that require a Tier 4 cost share for some drugs. For most members without a 4 tier benefit, drugs designated as "Tier 4" will default to their Tier 2 cost share for preferred agents and to the Tier 3 cost share for nonpreferred agents. Some benefits may process differently. Please refer to your Schedule of Benefits for your specific benefit.

Oral Oncology Drug cost share: For drugs taken at home to treat cancer; the state of Wisconsin has stated that the maximum cost share that can be applied to these medications is \$100 per fill after any benefit deductible has been met. This maximum amount applies regardless of what tier the drug is listed at on the formulary document. The cost share may be less than \$100 depending on your benefit structure.

Preventative Medication Coverage: Some laws, such as the Affordable Care Act, require that certain drugs need to be covered at a \$0 cost share for members. Quartz covers these drugs within the guidelines recommended by the United States Preventative Services Task Force (USPSTF). Restrictions, including age limits, quantity limits, prior authorization, and days' supply may apply to some drugs and are noted in Appendix D. Coverage indicators in the "Notes" column specific to preventative medications include; Smoking Cessation (SC) – these drugs are covered up to 180 days within a 365-day period, 100 Day Supply (D100) – these drugs must be filled for a 100-day supply with each fill to qualify for coverage, and Preventative Statins (Statin) – these doses are covered at \$0 cost share for members within the specified age limits.

Opioid Risk Management Program: Quartz wants to reduce the possible misuse of opioid drugs which can lead to addiction and an increased risk of overdose or death. The following drug claim edits have been put in place to help.

- The first prescription for new users of opioid drugs will be limited to a seven-day supply or less.
- Total daily opioid doses from all current opioid claims that equal or are greater than the equivalent of 120 mg of morphine will be restricted (see Restricted Medications).

Exceptions to these edits will require an approved prior authorization for coverage. Additional information can be found in the Pharmacy Programs and Policies section of the Quartz website.

Coverage Indicators

Specific requirements for coverage of some drugs are noted in the formulary listing in the “Notes” column. An explanation of each type of requirement or parameter is listed below.

Restricted Medications (PA): Medications designated with a “PA” are restricted medications and require an approved prior authorization for coverage. Quartz requires the submission and approval of a Medication Prior Authorization Request form before coverage is granted for restricted medications. The Medication *Prior Authorization Request Form* can be obtained through Customer Service or via the Quartz website at www.Quartzbenefits.com. A copy can also be found on the last page of this document.

Requests can be submitted via fax to (888) 450-4711, online at www.Quartzbenefits.com, by phone, or can be mailed to the address on the form. The information will be reviewed and both the requesting physician and the member will be notified regarding the coverage decision. If you would like to discuss the specifics of a medication request decision with a pharmacist, or have general questions about the prior authorization criteria, please call (888) 450-4884.

Quantity Limits (QL): Medications designated with a “QL” have specific quantity limits that are different than the general limitations of your drug benefit. Your prescription drug benefit allows coverage for a maximum supply of 30 days per prescription claim. Appendix A lists the specific quantity limits for each medication assigned a “QL”. **Individually packaged items, such as inhalers and nasal sprays are limited to 2 boxes/units per copay (e.g. 2 inhalers, 2 bottles, etc.) not to exceed a 30 day supply. Insulins are limited to 30 ml per 30 days unless specified otherwise in Appendix A.** For medications with a quantity limit, if a member requires a higher quantity per month, prior authorization is required.

Step Therapy (ST): Medications designated with a “ST” are included as part of a step therapy protocol, which first requires a trial of a prerequisite medication(s) before receiving coverage for the listed products. Step therapy medications require prior authorization. The medications listed do not require paper prior authorization if step therapy criteria are met through previous claim fills as the criteria have been implemented within the pharmacy claims system as on-line edits. Members without a claims history will need to submit a Medication Prior Authorization Request form for consideration of coverage.

Age Limits (A): Medications designated with an “A” are covered without prior authorization within the designated age limits. Consideration for coverage of medications with age limits may be made for those outside the age limits by submitting a prior authorization request form.

Specialty Pharmaceuticals Program (SP): Specialty pharmaceuticals encompass a growing number of drugs that are usually high-cost, may involve complex treatment regimens, have special handling, storage, or delivery needs, may require injectable or infusible administration, are for rare diseases or therapeutic categories such as oncology, autoimmune, or inflammatory diseases with long-term, severe symptoms, and may have limited product availability.

Specialty Pharmaceuticals denoted by “SP” in the formulary “Notes” column are required to be obtained from a pharmacy participating in the Quartz Specialty Pharmaceuticals network for coverage. The UW Health Pharmacies and Gundersen Health System Pharmacies are currently participating in the Quartz Specialty Pharmaceuticals network. You can contact the UW Health Pharmacy at (866) 894-3784 or the Gundersen Health System Pharmacy at (877) 208-1096 to make arrangements for receiving the medication (by mail or pick-up at one of the participating pharmacy locations).

Many of these drugs also require prior authorization (denoted by PA in the “Notes” column). Please see the drug specific criteria for each product at www.Quartzbenefits.com. Most of the drugs included in Quartz Specialty Pharmacy network have pharmacist-run management programs to maximize patient knowledge and outcomes from these medications. This may include additional follow-up from the pharmacist or partial dispensing protocols.

Oral Oncology Split Fill Program (ONC): Medications included in this specialty pharmacy program have been identified as requiring additional monitoring to provide the best patient outcomes and reduce waste. Prescriptions for these medications must be filled at a participating Quartz Specialty Network pharmacy and a pharmacist trained in cancer therapies will assist a member through their treatment course. During the first three months of treatment members will only receive two weeks of medication at a time.

The Quartz Specialty Pharmacy program DOES NOT apply to medications administered in your physician's office, a hospital, or other health care facility. Coverage for medications administered in a health care facility falls under your medical benefit and may be subject to other requirements.

Please refer to www.Quartzbenefits.com for further details on the Quartz Specialty Pharmaceuticals Program.

Choice90 (A90): Medications listed with "A90" have been designated as maintenance medications by a national database (First Databank) and **MAY** qualify for a 3-month supply fill at the pharmacy. The drug must cost less than \$1,000 per month. Three copays will be charged for the 3-month supply. All additional restrictions apply. The pharmacy must be participating in the Quartz Choice90 pharmacy network to dispense 90 day supplies. Medications listed as Tier 4 are not eligible for Choice90.

Mandatory Substitution Exception (MSE) Drug: Some medications do not require use of the generic formulation when one is available. These are exemptions to the generic substitution policy and are designated by "MSE". Medications that are included on the MSE list will be covered at the brand copay if the prescription is filled with the brand name product.

Medical Benefit Drugs (MB): Drug that are given in the clinic or an infusion center and are restricted (require prior authorization for coverage) are listed on the formulary and in Appendix C. These medications are not covered at the pharmacy by your prescription drug benefits. A Medication Prior Authorization Request form must be submitted for consideration of coverage.

Blood Clotting Factor Products: For patients with hemophilia or other bleeding disorders who require treatment with clotting factor products. Blood clotting factor products are not covered on the prescription drug benefit. Factor products are covered under the Medical Benefit, require prior authorization, and are provided by UW Health Specialty Pharmacy. Contact UW Health Pharmacy at (866) 894-3784 for additional information.
