

Anthem BlueCross BlueShield – New York Essential Plan – Drug List

Table of Contents

NOTE: Not all medications and not all plans are subject to prior authorization and quantity limits. For more information regarding prior authorization or quantity limits, contact Member Services at the telephone number listed on your identification card.

Tier 1: Tier 1 drugs have the lowest cost share for you. These are usually generic drugs that offer the best value compared to other drugs that treat the same conditions.

Tier 2: Tier 2 drugs have a higher cost share than Tier 1. They may be preferred brand drugs, based on how well they work and their cost compared to other drugs used for the same type of treatment. Some are generic drugs that may cost more because they're newer to the market.

Tier 3: Tier 3 drugs have the highest cost share. They often include non-preferred brand and generic drugs. They may cost more than drugs on lower tiers that are used to treat the same condition. Tier 3 may also include drugs that were recently approved by the FDA or specialty drugs that are used to treat serious, long-term health conditions and that may need special handling.

Brand name drugs are in **UPPER CASE, bold type**.

Generic drugs are in lower case, plain type.

\$0: preventive drugs. For some members, this product may be covered at 100% with \$0 cost share with a prescription from your provider if specified criteria are met.

BE = benefit exclusion. This drug may not be covered depending on your plans design. To find out if your drug is covered, log into your member portal or use the Sydney app to [Price a Medication](#) and refer to your plan documents.

DO: dose optimization. Usually, this means you may have to switch from taking a drug twice a day to taking it once a day at a higher strength.

LD: limited distribution. These drugs are available only through certain pharmacies or wholesalers, depending on what the manufacturer decides.

PA: prior authorization. You may need to get benefits approved before certain prescriptions can be filled.

QL: quantity limits. There are limits on the amount of medicine covered within a certain amount of time.

SP: specialty drugs. Specialty drugs are used to treat difficult, long-term conditions. You may need to get this drug through a specialty pharmacy.

ST: step therapy. You may need to use another recommended drug first before a prescribed drug is covered.
