

Select Drug List

Drug list — Four-tier drug plan

Your prescription benefit comes with a drug list, which is also called a formulary. This list is made up of BRAND-name and generic prescription drugs approved by the U.S. Food & Drug Administration (FDA).

Here are a few things to remember about the list:

- You and your doctor can use it as a guide to choose the drugs that are best for you. Drugs not on this list may not be covered by your plan and may cost you more out of pocket.
- Your coverage has limitations and exclusions, which means there are certain rules about what's covered by your plan and what isn't. To find out more, view your Certificate/Evidence of Coverage or your Summary Plan Description by logging in at wellpoint.com and go to **My Plan → Medical Benefits → Plan Documents**.
- To help you see how the drug list works with your drug benefit, we've included some frequently asked questions (FAQs) about how the list is set up and what to do if a drug you take isn't on it.
- This booklet is updated on a quarterly basis. To view the most up-to-date list of drugs for your plan — including drugs that have been added, generic drugs and more — log in at wellpoint.com/pharmacyinformation.

If you have questions about your pharmacy benefits, we're here to help. Just call us at the Pharmacy Member Services number on your ID card.

Select Drug List

What is a drug list?

The drug list, also called a formulary, is a list of prescription medicines your plan covers. It includes hundreds of BRAND-name and generic drugs approved by the U.S. Food & Drug Administration (FDA).

Is this a complete listing of all covered drugs?

Yes, but it is possible that certain drugs on this list may not be covered by your specific plan. Your coverage has limitations and exclusions, which means that certain conditions determine what is and is not covered by your plan. To find out more, read your Certificate/Evidence of Coverage or your Summary Plan Description, which you received when you signed up for your plan.

How can I find a drug on the list?

Drugs are listed in alphabetical order based on the name of their drug class, also known as their therapeutic class. You can search the PDF drug list by:

- Drug name, using Ctrl + F on your keyboard and then typing the name of the drug you're looking for.
- Drug class, using the alphabetically listed categories.

The Notes column will tell you if you need preapproval (called prior authorization, or PA) before you can take the drug, or if you need to try other drugs first for your treatment (called step therapy, or ST).

When I search the list, I see that each drug is on a tier. What are the tiers for?

The drug list is set up in tiers, or levels. We place drugs on different tiers based on how well they work to improve health, whether there are over-the-counter (OTC) options, and their costs compared to other drugs used for the same type of treatment. Your share of a drug's cost will depend on that drug's tier — the lower the tier, the lower your share of the cost. Here's a breakdown of the tiers in your plan:

- **Tier 1** drugs have the lowest cost share. These are usually generic drugs that offer the best value compared to other drugs that treat the same conditions.
- **Tier 2** drugs have a higher cost share than Tier 1. They may be preferred BRAND drugs, based on how well they work and their cost compared to other drugs used for the same type of treatment. Some are generic drugs that may cost more because they're newer to the market.
- **Tier 3** drugs have a higher cost share. They often include non-preferred BRAND and generic drugs that may cost more than lower-tier drugs used to treat the same condition. Tier 3 may also include drugs that were recently approved by the FDA, or specialty drugs that are used to treat serious, long-term health conditions and may need special handling.
- **Tier 4** drugs have a higher cost share and usually include specialty BRAND and generic drugs. They may cost more than lower-tier drugs used to treat the same condition. Tier 4 may also include drugs recently approved by the FDA, or specialty drugs used to treat serious, long-term health conditions and may need special handling.

How will I know if my drug is covered, and what it will cost?

You can use our online [Price a Medication](#) tool to get specific drug coverage details and pricing from a number of retail pharmacies in your zip code.

What are my options if my medicine isn't on the drug list?

Here are a few things to think about:

- If you want to take a drug that's not on the drug list, you may have to pay full cost for that drug.
- You can speak with your prescriber or pharmacist to see if other drugs covered by your will work just as well, or if generic or OTC drugs are an option. Only you and your prescriber can decide what drugs are right for you.
- You can search for generic drugs at [wellpoint.com](https://www.wellpoint.com). OTC drugs aren't shown on the list.
- If you are taking a non-covered drug, your prescriber can ask us to review the coverage. This process is called preapproval or prior authorization. Your prescriber can start the process by calling the Member Services number on the back of your member ID card, or by downloading a prior authorization form from our website and submitting it. If your request is approved, the amount you pay for the drug will depend on your plan's benefit.
- If you are taking a contraceptive that is medically necessary but not in the formulary, your prescriber can contact us and we will waive your cost share.

Who decides what drugs are on the list?

The drugs on the list are reviewed through our Pharmacy and Therapeutics (P&T) process. In this process, a group of independent doctors, pharmacists, and other healthcare professionals decides which drugs to include on our lists. This group meets regularly to look at new and existing drugs, and recommends drugs based on how safe they are, how well they work, and the value they offer our members.

What's the difference between brand-name and generic drugs?

BRAND-name drugs are FDA-approved and usually available from only one manufacturer. They may be protected by a patent, which means they can only be made or sold by the company that has that patent.

Generic drugs are also FDA-approved; they have the same active ingredients as BRAND-name drugs but are typically available only after the patent on the equivalent BRAND-name drug ends. Generic drugs may look different, but they work the same as their BRAND-name equivalents.

Does the drug list change, and how will I know if it does?

Drugs on our list are reviewed on a regular basis. During those reviews drugs may be added, removed, or moved to different tiers. We'll let you know if a drug you take is taken off the list or moved to a higher tier.

You can always check the drug list to make sure your medicines are still on it. You'll find the most up-to-date drug list when you log in at [wellpoint.com](https://www.wellpoint.com).

Does my plan cover preventive drugs?

We cover preventive care drugs with zero cost share in compliance with the Affordable Care Act (ACA).

Key terms

Here are some terms and notes you'll find on the drug list:

BRAND-name drugs are in UPPER CASE. Generic drugs are in lower-case, plain type.

\$0 = preventive drugs. For some members, certain prescribed drugs may be covered at 100% with \$0 cost share if specified criteria are met.

AL = age limits. Some drugs require a prior authorization if your age does not meet drug manufacturer, FDA, or clinical recommendations.

BE = benefit exclusion. This drug may not be covered, depending on your plan's design. To find out if your drug is covered, log into your member portal or use the SydneySM Health app to [Price a Medication](#) and refer to your plan documents.

DO = dose optimization. This normally means you may have to switch from taking a drug twice a day to taking it once a day at a higher strength.

LD = limited distribution. These drugs are available only through certain pharmacies or wholesalers, as chosen by the manufacturer.

PA = prior authorization. You may need to get benefits approved before certain prescriptions can be filled.

QL = quantity limits. This means there are limits on the amount of medicine covered within a certain amount of time.

SP = specialty drugs. Specialty drugs are used to treat difficult, long-term conditions. You may need to get these drugs through a specialty pharmacy.

ST = step therapy. You may need to try a recommended drug before a specific prescribed drug is covered.

For information about your pharmacy benefit, log in at [wellpoint.com](https://www.wellpoint.com).

You'll find the most up-to-date drug list and details about your benefits. If you still have questions, we're here. Just call the Pharmacy Member Services number on your ID card.

Most plans include our home delivery program at no extra cost to you. Find out more by visiting **[wellpoint.com](https://www.wellpoint.com)** or calling **833-236-6196**.

A note about opioid analgesics: In response to the opioid epidemic, the U.S. Food and Drug Administration (FDA) encouraged the development of painkillers that prevent misuse. You may pay less for these types of opioids in certain states.

Drug(s) may be excluded from the list based on your plan's benefit design.

Coverage provided by Simply Healthcare Plans, Inc. doing business as Wellpoint Florida, Inc.
