

## Focused Drug List

### Five-tier drug plan

Your prescription benefit comes with a drug list, also called a formulary. This list is made up of brand-name and generic prescription drugs approved by the U.S. Food and Drug Administration (FDA).

Here are things to remember about the drug list:

You and your doctor can use it as a guide to choose drugs that are best for you. Drugs that are not on this list may not be covered by your plan and may cost you more out of pocket.

- There are rules that affect which drugs your plan covers. You can find these limitations and exclusions when you log in to **carelonrx.com** and go to **Manage prescriptions > Benefits**.
- We update this booklet every quarter. To access the most up-to-date drug list for your plan, log in to **carelonrx.com** and choose **Tools and resources**.

If you have questions about your pharmacy benefits, we're here to help. Just call us at the Pharmacy Member Services number on your ID card.

## Frequently asked questions

### What is a drug list?

The drug list, also called a formulary, is a list of prescription medicines your plan covers. It includes brand-name and generic drugs approved by the FDA.

### What is the difference between brand-name and generic drugs?

A **brand-name drug** is FDA approved and usually available from only one company. It may be protected by a patent, which means it can only be made or sold by the company that has the patent.

Brand-name drugs are in **UPPER CASE, bold type** on the drug list.

A **generic drug** is also FDA approved. It has the same active ingredients and works the same as the brand-name drug. A generic drug is usually available only after the patent on the brand-name drug ends.

Generic drugs are in lower case, plain type on the drug list.

### Is this a complete list of all covered drugs?

Yes, this is a complete listing of all the drugs on the drug list. But it's possible a drug(s) on this list may not be covered, depending on your plan's design. Your coverage has limitations and exclusions, which means there are certain conditions that determine what's covered by your plan and what isn't. To find out more, log in to [carelonrx.com](https://carelonrx.com) and go to **Manage prescriptions > Benefits**.

### How can I find a drug on the list?

Drugs are organized by their drug class, also called therapeutic class.

### I see a tier next to each drug. What do the tiers mean?

The drug list is set up in multiple tiers or levels. We place drugs in different tiers based on:

- How well they work to improve health.
- If there are over-the-counter (OTC) options available.
- Their costs compared to other drugs used for the same type of treatment.

## How do the tiers affect how much a drug costs?

Typically, the lower the tier, the lower your share of the cost. Here is a breakdown of the tiers in your plan:

- Tier 1 drugs have the lowest cost share for you. These are usually generic drugs that offer the best value compared to other drugs that treat the same conditions. Some plans split Tier 1 into Tier 1a and Tier 1b:
  - Tier 1a drugs have the lowest cost share. These are often generic drugs that offer the greatest value compared to others that treat the same conditions.
  - Tier 1b drugs have a low cost share. These are typically generic drugs that offer greater value compared to others that treat the same conditions.
- Tier 2 drugs have a higher cost share for you than Tier 1 drugs. They may include:
  - **Preferred brand-name drugs.** They are preferred because of how well they work and their cost compared to other drugs used for the same type of treatment.
  - Generic drugs that may cost more because they're newer to the market.
- Tier 3 drugs have a higher cost share than Tier 2. They may include:
  - **Nonpreferred brand-name and generic drugs.** They may cost more than drugs in lower tiers that are used to treat the same condition.
  - Drugs recently approved by the FDA.
- Tier 4 drugs have a higher cost share than Tier 3. They may include:
  - **Preferred specialty** brand-name and generic drugs. Specialty drugs are used to treat serious, long-term health conditions and may need special handling.
  - Drugs recently approved by the FDA.
- Tier 5 drugs have the highest cost share. They may include:
  - **Nonpreferred specialty** brand-name and generic drugs. They may cost more than the specialty drugs in Tier 4.
  - Drugs recently approved by the FDA.

## How can I tell what my cost share may be?

Log in to [carelonrx.com](https://carelonrx.com) and enter the drug name in our [Price a Medication](#) tool on the *Member Resources* page. Search results will show how much the drug costs at pharmacies near you.

## If a drug I take isn't on the list, what are my options?

Here are things to think about:

- If you want to take a drug that's not on the drug list, you may have to pay the full cost for it.
- Your plan may cover another brand-name or generic drug that works just as well. You can search for recent updates about generic drugs at [carelonrx.com](https://www.carelonrx.com).
- Talk to a doctor or pharmacist to see if over-the-counter (OTC) drugs are an option. OTC drugs are not included on the drug list.
- If a drug you take isn't covered, your doctor can ask us to review your coverage. This process is called **preapproval** or **prior authorization**. The doctor can start the process by calling the Pharmacy Member Services number on your member ID card or by downloading a prior authorization form from our website. If we approve the request, the amount you pay for the drug will depend on your plan's benefit.
- Only you and your doctor can decide which medications are best for you.

## What do I need to look for in the Notes column?

If a drug needs preapproval or prior authorization, you will see "PA" next to it. If you need to try another drug first, which is called step therapy, you will see "ST" next to it.

## Who decides which drugs to include on the list?

The drugs on the list are reviewed through our Pharmacy and Therapeutics (P&T) process. In this process, a group of independent doctors, pharmacists, and healthcare professionals decides which drugs we include. The group meets regularly to review new and existing drugs. They recommend drugs based on their safety, how well they work to improve health, and the value they offer our members.

## Does the drug list change? How will I know if it does?

Drugs on our list are reviewed regularly. They are sometimes added, removed, or moved to a different tier. We will send you a letter if a drug you take is removed from the list, and in some cases, if a drug you take is moved to a higher tier. You can always check the drug list to make sure medicines you take are still on it. To access the most up-to-date drug list, log in to [carelonrx.com](https://www.carelonrx.com).

## Does my plan cover preventive drugs?

We cover preventive care drugs with zero cost share in compliance with the Affordable Care Act (ACA) when specific criteria are met.

## How can I find a pharmacy in my plan's network?

Log in to **carelonrx.com** to find the closest pharmacy in your plan's network.

## Key terms

Here are terms and notes you'll find on the drug list.

Brand name drugs are in **UPPER CASE, bold type**.

Generic drugs are in lower case, plain type.

**\$0** = preventive drugs. For some members, this drug may be covered at 100% with \$0 cost share with a prescription from your doctor if specified criteria are met.

**BE** = benefit exclusion. This drug may not be covered depending on your plans design. To find out if your drug is covered, log into your member portal or use the Sydney app to [Price a Medication](#) and refer to your plan documents.

**DO** = dose optimization. Usually, this means you may have to switch from taking a drug twice a day to taking it once a day at a higher strength.

**LD** = limited distribution. These drugs are available only through certain pharmacies or wholesalers, depending on what the manufacturer decides.

**PA** = prior authorization. You may need to get benefits approved before certain prescriptions can be filled.

**QL** = quantity limits. There are limits on the amount of medicine covered within a certain amount of time.

**SP** = specialty drugs. Specialty drugs are used to treat difficult, long-term conditions. You may need to get this drug through a specialty pharmacy.

**ST** = step therapy. You may need to use another recommended drug first before a prescribed drug is covered.

## Online pharmacy resources

Log in to [carelonrx.com](http://carelonrx.com) to find the closest pharmacy in your plan's network and the most up-to-date drug list information, including pricing, brands and generics, and dosage options.

## We're here to help

If you have questions about the drug list or your pharmacy benefits, call the Pharmacy Member Services number on your ID card.

A note about opioid analgesics: In response to the opioid epidemic, the U.S. Food and Drug Administration (FDA) encouraged the development of painkillers that prevent misuse. You may pay less for these types of opioids in certain states. Drug(s) may be excluded from the list based on your plan's benefit design.
