## National Drug List

### Drug list — Five Tier Drug Plan

Your prescription benefit comes with a drug list, which is also called a formulary. This list is made up of brand-name and generic prescription drugs approved by the U.S. Food & Drug Administration (FDA). We’re here to help. If you are a current Anthem member with questions about your pharmacy benefits, we’re here to help. Just call us at the Member Services number on your ID card.

The plan names to which this formulary applies are shown below.

<table>

Here are a few things to remember:

- You can view and search our current drug lists when you visit anthem.com/ca/pharmacyinformation. Please note: The formulary is subject to change and all previous versions of the formulary are no longer in effect.
- Additional tools and resources are available for current Anthem members to view the most up-to-date list of drugs for your plan - including drugs that have been added, generic drugs and more – by logging in at anthem.com/ca/pharmacyinformation.
- Your coverage has limitations and exclusions, which means there are certain rules about what's covered by your plan and what isn't. Already a member? You can view your Certificate/Evidence of Coverage or your Summary Plan Description by logging in at anthem.com/ca and go to My Plan ->Benefits-> Plan Documents.
- You and your doctor can use this list as a guide to choose drugs that are best for you. Drugs that aren't on this list may not be covered by your plan and may cost you more out of pocket. To help you see how the drug list works with your drug benefit, we've included some frequently asked questions (FAQ) in this document about how the list is set up and what to do if a drug you take isn't on it.
Table of Contents
**PERITONEAL DIALYSIS SOLUTIONS** - DRUGS FOR THE KIDNEYS

**PHOSPHATIDYLINOSITOL 3-KINASE (PI3K) INHIBITORS** - DRUGS FOR CANCER

**PHOSPHODIESTERASE 4 (PDE4) INHIBITORS** - DRUGS FOR THE SKIN

**PHOSPHODIESTERASE 4 (PDE4) INHIBITORS** - DRUGS FOR PAIN AND FEVER

**PLASMA KALLIKREIN INHIBITORS** - MONOCLONAL ANTIBODIES - DRUGS FOR THE HEART

**PLEOMUTILINS** - DRUGS FOR INFECTIONS

**POLY (ADP-RIBOSE) POLYMERASE (PARP) INHIBITORS** - DRUGS FOR CANCER

**POLY (ADP-RIBOSE) POLYMERASE (PARP) INHIBITORS** - DRUGS FOR CANCER

**POSTHERPETIC NEURALGIA (PHN) COMBINATION AGENTS** - DRUGS FOR THE NERVOUS SYSTEM

**POSTHERPETIC NEURALGIA (PHN)/NEUROPATHIC PAIN AGENTS** - DRUGS FOR THE NERVOUS SYSTEM

**POSTHERPETIC NEURALGIA (PHN)/NEUROPATHIC PAIN COMB AGENTS** - DRUGS FOR THE NERVOUS SYSTEM

**POTASSIUM REMOVING AGENTS** - DRUGS FOR NUTRITION

**PRENATAL MV & MINERALS W/FA WITHOUT IRON** - DRUGS FOR NUTRITION

**PROGESTINS** - HORMONES

**PROTEASE-ACTIVATED RECEPTOR-1 (PAR-1) ANTAGONISTS** - DRUGS FOR THE BLOOD

**PROTEIN-CARBOHYDRATE-LIPID WITH ELECTROLYTE COMBINATIONS** - DRUGS FOR NUTRITION

**PSYCHOTHERAPEUTIC AND NEUROLOGICAL AGENTS** - MISCELLANEOUS - DRUGS FOR THE NERVOUS SYSTEM

**PULMONARY FIBROSIS AGENTS** - KINASE INHIBITORS - DRUGS FOR CANCER

**PULMONARY FIBROSIS AGENTS** - DRUGS FOR THE LUNGS

**PULMONARY HYPERTENSION - PROSTACYCLIN RECEPTOR AGONIST** - DRUGS FOR THE HEART

**RESPIRATORY AGENTS** - MISCELLANEOUS - DRUGS FOR THE LUNGS

**SCLEROSTIN INHIBITORS** - HORMONES

**SEBORRHEIC KERATOSIS PRODUCTS** - DRUGS FOR THE SKIN

**SELECTIN BLOCKERS** - DRUGS FOR THE BLOOD

**SELECTIVE SEROTONIN AGONISTS 5-HT(1F)** - DRUGS FOR THE NERVOUS SYSTEM

**SEPTAL AGENTS** - ABLATION

**SEROTONIN 1A RECEPT AGONIST/SEROTONIN 2A RECEPT ANTAG** - DRUGS FOR THE NERVOUS SYSTEM

**SEROTONIN MODULATORS** - DRUGS FOR THE NERVOUS SYSTEM

**SINUS NODE INHIBITORS** - DRUGS FOR THE HEART

**SMALL INTERFERING RIBONUCLEIC ACID (SIRNA) AGENTS** - HORMONES

**SODIUM-GLUCOSE CO-TRANSPORTER 2 INHIBITOR-BIGUANIDE COMB** - HORMONES

**SPLEEN TYROSINE KINASE (SYK) INHIBITORS** - DRUGS FOR THE BLOOD

**STEROIDS - MOUTH/THROAT/DENTAL** - DRUGS FOR THE MOUTH AND THROAT

**SULFONAMIDES** - DRUGS FOR INFECTIONS

**TETRACYCLINES** - DRUGS FOR INFECTIONS

**TETRAHYDROISOQUINOLINES** - DRUGS FOR CANCER

**THYROID AGENTS** - HORMONES

**TOXOIDS** - BIOLOGICAL AGENTS

**TRANSTHYRETIN STABILIZERS** - HORMONES

**TRYPTOPHAN HYDROXYLASE INHIBITORS** - DRUGS FOR THE STOMACH

**ULCER DRUGS** - DRUGS FOR THE STOMACH

**URINARY ANTI-INFECTIVES** - DRUGS FOR THE URINARY SYSTEM

**URINARY ANTISPASMODICS** - DRUGS FOR THE URINARY SYSTEM

**VACCINES** - BIOLOGICAL AGENTS

**VAGINAL CONTRACEPTIVE PH MODULATOR** - COMBINATIONS - DRUGS FOR WOMEN

**VAGINAL PRODUCTS** - DRUGS FOR WOMEN

**VASOPRESSORS** - DRUGS FOR THE HEART

**VESICOURETERAL REFLUX (VUR) AGENT COMBINATIONS** - MEDICAL SUPPLIES AND DURABLE MEDICAL EQUIPMENT

**VITAMINS** - DRUGS FOR NUTRITION

**X-LINKED HYPOPHOSPHATEMIA (XLH) TREATMENT** - AGENTS - HORMONES
**Definitions**

“$0” next to a drug means this is a preventive drug. For some members, this product may be covered at 100% with $0 cost share with a prescription from your provider if specified criteria are met.

“BRAND name drug” means a drug that is marketed under a proprietary, trademark-protected name. A BRAND name drug is listed in this formulary in all **CAPITAL** letters.

“Coinsurance” means a percentage of the cost of a covered health care benefit that you pay after you have paid the deductible, if a deductible applies to the health care benefit.

“Copayment” means a fixed dollar amount that you pay for a covered health care benefit after you have paid the deductible, if a deductible applies to the health care benefit.

“Deductible” means the amount you pay for covered health care benefits that are subject to the deductible before your health insurer begins to pay. If your health insurance policy has a deductible, it may have either one deductible or separate deductibles for medical benefits and prescription drug benefits. After you pay your deductible, you usually pay only a copayment or coinsurance for covered health care benefits. Your insurance company pays the rest.

“Dose Optimization (DO)” means dose optimization. Usually, this means you may have to switch from taking a drug twice a day to taking it once a day at a higher strength.

“Drug Tier” means a group of prescription drugs that correspond to a specified cost sharing tier in your health insurance policy. The drug tier in which a prescription drug is placed determines your portion of the cost for the drug.

“Exception request” means a request for coverage of a non-formulary drug. If you, your designee, or your prescribing health care provider submits a request for coverage of a non-formulary drug, your insurer must cover the non-formulary drug when it is medically necessary for you to take the drug.

“Exigent circumstances” means when you are suffering from a medical condition that may seriously jeopardize your life, health, or ability to regain maximum function, or when you are undergoing a current course of treatment using a non-formulary drug.

“Formulary” or “prescription drug list” means the list of drugs that is covered by your health insurance policy under the prescription drug benefit of the policy.

“Generic drug” means a drug that is the same as its BRAND name drug equivalent in dosage, strength, effect, how it is taken, quality, safety, and intended use. A generic drug is listed in this formulary in **italicized lowercase letters**.

“Limited Distribution (LD)” means limited distribution. These drugs are available only through certain pharmacies or wholesalers, depending on what the manufacturer decides.

“Medically Necessary” means health care benefits needed to diagnose, treat, or prevent a medical condition or its symptoms and that meet accepted standards of medicine. Health insurance usually does not cover health care benefits that are not medically necessary.

“Non-formulary drug” means a prescription drug that is not listed on this formulary.

“Oral Chemotherapy (OC)” Notwithstanding any deductible, the total amount of copayments and coinsurance an insured is required to pay shall not exceed two hundred dollars ($200) for an individual prescription of up to a 30-day supply of a prescribed orally administered anticancer medication covered by the policy.

“Out-of-pocket costs” means your expenses for health care benefits that aren't reimbursed by your health insurance. Out-of-pocket costs include deductibles, copayments, and coinsurance for covered health care benefits, plus all costs for health care benefits that are not covered.
“Prescribing provider” means a health care provider who can write a prescription for a drug to diagnose, treat, or prevent a medical condition.

“Prescription” means an oral, written, or electronic order from a prescribing provider authorizing a prescription drug to be provided to a specific individual.

“Prescription drug” means a drug that by law requires a prescription.

“Prior Authorization (PA)” means a decision by your health insurer that a health care benefit is medically necessary for you. If a prescription drug is subject to prior authorization in this formulary, your prescribing provider must request approval from your health insurer to cover the drug before you fill your prescription. Your health insurer must grant a prior authorization request when it is medically necessary for you to take the drug.

“Quantity limit (QL)” means a restriction on the number of doses of a prescription drug covered by a health insurance product during a specific time period, or any other limitation on the quantity of a drug that is covered.

“Specialty Drugs (SP)” means specialty drugs. Specialty drugs are used to treat difficult, long-term conditions. You may need to get this drug through a specialty pharmacy.

“Step therapy (ST)” means a specific sequence in which prescription drugs for a particular medical condition must be tried. If a drug is subject to step therapy in this formulary, you may have to try one or more other drugs before your health insurance policy will cover that drug for your medical condition. If your prescribing provider submits a request for an exception to the step therapy requirement, your health insurer must grant the request when it is medically necessary for you to take the drug.
Frequently Asked Questions

How do I know what drugs are covered under my benefits?
This is a complete listing of all the drugs on the drug list. But, it’s possible a drug(s) on this list may not be covered, depending on your plan’s design.

Your pharmacy benefit covers prescription drugs, including Specialty Drugs, that may be administered to you as part of a doctor’s visit, home care visit, or at an outpatient Facility when they are Covered Services. Benefits that are administered to you in your provider’s office are typically covered under your medical benefit. This may include Drugs for infusion therapy, chemotherapy, blood products, certain injectables and any drug that must be administered by a Provider.

How can I find a drug on the list?
(A) A prescription drug may be located by looking up the therapeutic category and class to which the drug belongs or the BRAND name or generic name of the drug in the alphabetical index; and
(B) If a generic equivalent for a BRAND name drug is not available on the market or is not covered, the drug will not be separately listed by its generic name.

You can search the PDF drug list by:
- Drug name, using Ctrl + F on your keyboard, then type in the name of the drug you’re looking for.
- Drug class, using the categories listed in alphabetical order.

How are drugs shown on the list?
- A drug is listed alphabetically by its BRAND name and generic names in the therapeutic category and class to which it belongs;
- The generic name for a BRAND name drug is included after the BRAND name in parentheses and all lowercase italicized letters;
- If a generic equivalent for a BRAND name drug is both available and covered, the generic drug will be listed separately from the BRAND name drug in all lowercase italicized letters; and
- If a generic drug is marketed under a proprietary, trademark-protected BRAND name, the BRAND name will be listed after the generic name in parentheses and regular typeface with the first letter of each word capitalized.

The “Under Coverage Requirements and Limits” section will indicate if you need preapproval before you can take the drug (called prior authorization or PA), or if you need to try other drugs first for your treatment (called step therapy or ST).

Note: The presence of a prescription drug on the formulary does not guarantee that your doctor will prescribe that prescription drug for a particular medical condition.

What are my options for getting my prescriptions?
You have plenty of choices about how and where to get your prescription medicines, including local pharmacies in your plan, convenient home delivery or specialty pharmacies. Most plans include our home delivery program at no extra cost to you.

Current Anthem members can find out more by logging in at anthem.com/ca and choose Prescription Benefits or call 833-236-6196. For more details about your coverage, you can call the phone number on your member ID card.
What if my drug isn’t on the list?
We understand that only you and your doctor know what is best for you. If you want to take a drug that’s not on the drug list, you may have to pay the full cost for it. You can also talk to your doctor or pharmacist to see if there’s another drug covered by your plan that will work just as well, or if generic or OTC drugs are an option. Only you and your doctor can decide what drugs are right for you.

If a drug you’re taking isn’t covered, your doctor can ask us to review the coverage. This process is called preapproval or prior authorization.

Your doctor can get the process started by completing an electronic Prior Authorization, calling the Pharmacy Member Services number on the back of your member ID card or by downloading a prior authorization form from our website and submitting it. If your request is approved, the amount you pay for the drug will depend on your plan’s benefit.

There are a few options for your doctor to start the Prior Authorization (PA) process:
2. Log in at anthem.com/ca and choose Pharmacy.
   o Go to Pharmacy Resources and Search Your Drug List for your medication.
   o Choose the correct medication strength and form.
   o Scroll down to Definition of Restrictions and locate the applicable Fax Form in the table.
   o Your doctor completes and faxes the form to us at 844-474-3347.
3. Calling Pharmacy Member Services number on the back of your member ID card.

Who decides what drugs are on the list?
The drugs on the list are reviewed through our Pharmacy and Therapeutics (P&T) process. In this process, a group of independent doctors, pharmacists and other health care professionals decides which drugs we include on our lists. This group meets regularly to look at new and existing drugs and recommends drugs based on how safe they are, how well they work and the value they offer our members.

What is a specialty drug and how do I get them?
If you’re taking a medicine that is considered a specialty drug, you may need to use a specialty pharmacy in order for your drug to be covered. Specialty drugs come in many forms like pills, liquids, injections (shots), infusions or inhalers and may need special storage and handling. Typically benefits for specialty drugs that are self-administered will be covered under the pharmacy benefit. Benefits for specialty drugs that are administered to you in your provider’s office are typically covered under your medical benefit. If you use pharmacies that are not in the network, your medicine may not be covered and you may have to pay the full cost. For more details about your coverage, you can call the phone number on your member ID card.

Does the drug list change, and how will I know if it does?
Drugs on our list are reviewed and updated on a monthly basis. Sometimes, drugs are added, removed, change tiers or have updated requirements. The changes will usually go into effect the first day of the month. But don’t worry, we’ll let you know if a drug you take is taken off the list and, in some cases, if a drug you take is moved to a higher tier.

You can always check the drug list to make sure medicines you take are still on it. You’ll find the most up-to-date drug list when you log in at anthem.com/ca.

What kind of drugs can I find on the formulary?
We cover FDA-approved preventive care drugs with zero cost share in compliance with the Affordable Care Act (ACA) and California state regulations. Your doctor may need to write a prescription for these preventive services to be covered by your plan, even if they are listed as over-the-counter. The availability or coverage of these medications without cost-sharing may be subject to criteria established by the health plan.

We cover FDA-approved equipment and supplies for the management and treatment of insulin-using diabetes, non-insulin-using diabetes and gestational diabetes as medically necessary. Medication encompasses insulin, insulin pumps, and oral hypoglycemic agents. Covered supplies and equipment are limited to glucose monitors, test strips, syringes and lancets. Covered benefits also include outpatient self-management and educational services used to treat diabetes if services are provided through a program authorized by the State’s Diabetes Control Project within the Bureau of Health.
What drugs can I find in each tier?
We place drugs on different tiers based on how well they work to improve health, whether there are over-the-counter (OTC) options and their costs compared to other drugs used for the same type of treatment. The lower the tier, the lower your share of the cost. Here’s a breakdown of the tiers in your plan:

- Tier 1 drugs have the lowest cost share for you. These are usually generic drugs that offer the best value compared to other drugs that treat the same conditions. Some plans split Tier 1 into Tier 1a and Tier 1b:
  - Tier 1a drugs have the lowest cost share. These are often generic drugs that offer the greatest value compared to others that treat the same conditions.
  - Tier 1b drugs have a low cost share. These are typically generic drugs that offer the greatest value compared to others that treat the same conditions.

- Tier 2 drugs have a higher cost share than Tier 1. They may be preferred brand drugs, based on how well they work and their cost compared to other drugs used for the same type of treatment. Some are generic drugs that may cost more because they’re newer to the market.

- Tier 3 drugs have a higher cost share. They often include brand and generic drugs that may cost more than drugs on lower tiers that are used to treat the same condition. Tier 3 may also include drugs that were recently approved by the FDA.

- Tier 4 drugs have a higher cost share and usually include preferred specialty brand and generic drugs. They may cost more than drugs on lower tiers that are used to treat the same condition. Tier 4 may also include drugs recently approved by the FDA or specialty drugs used to treat serious, long-term health conditions and that may need special handling.

- Tier 5 drugs have the highest cost share. Drugs in this tier are non-preferred specialty brand and generic drugs. Tier 5 may also include drugs recently approved by the FDA or specialty drugs used to treat serious, long-term health conditions and that may need special handling.

How will I know how much my drug will cost?
Current Anthem members can go online and with the Price a Medication Tool, get pharmacy-specific pricing from a number of local retail pharmacies in your zip code.

Note: For oral chemotherapy drugs - Notwithstanding any deductible, the total amount of copayments and coinsurance an insured is required to pay shall not exceed two hundred dollars ($200) for an individual prescription of up to a 30-day supply of a prescribed orally administered anticancer medication covered by the policy.
How does Anthem promote safety?
When you go to a pharmacy, the pharmacist will get an electronic message from Anthem if a drug needs prior authorization, requires step therapy or has a limit on the amount that can be given. Here’s a closer look at all of the programs we’ve put into place to help make sure you get the care you need, while helping to keep you safe.¹

Our clinical edit programs are:
- Prior authorization, which requires you to get approval before taking a medicine. This helps make sure a drug is used properly and focuses on drugs that may have:
  - Risk of side effects.
  - Risk of harmful effects when taken with other drugs.
  - Potential for incorrect use or abuse.
  - Rules for use with certain conditions.
- Step therapy, which requires that other drugs be tried first. It focuses on whether a drug is right for your condition.
- Dose optimization, which involves changing from taking a dose twice a day to once a day, when medically appropriate. Taking fewer doses may lower your costs; a single higher dose of a drug taken once a day may cost less than a lower dose taken twice a day.
- Quantity Limits impose a limit on the amount in a prescription and how often it can be refilled.
  - If a refill request is submitted too soon or the doctor prescribes an amount that's higher than what is allowed, the drug won't be covered at that time.
  - If there are medical reasons to prescribe the drug as originally dosed, the doctor can ask for review by our Prior Authorization Center.

Also, if you’re taking a medicine that is considered a specialty drug, you may need to use a specialty pharmacy in order for your drug to be covered.

How does my doctor start the Prior Authorization process?
If your drug is on our formulary but requires a PA or Step Therapy, there are a few options for your doctor to start the Prior Authorization (PA) process:
2. Log in at anthem.com/ca and choose Pharmacy:
   - Go to Pharmacy Resources and Search Your Drug List for your medication.
   - Choose the correct medication strength and form.
   - Scroll down to Definition of Restrictions and locate the applicable Fax Form in the table.
   - Your doctor completes the form and faxes it to Anthem at 844-474-3347.
3. Calling Pharmacy Member Services number on the back of your member ID card.

What is Step Therapy? How does it work?
Step therapy requires trying other drugs before certain medications may be covered. The pharmacy will let you know if step therapy is required and you must first try the drug or treatment included in the program. If the drug or treatment does not treat the condition well, the doctor can contact our Prior Authorization Center to ask that we approve the original drug.¹

A few more notes about the exception process:
- If we fail to respond to a completed prior authorization or step therapy exception request within 72 hours of receiving a non-urgent request and 24 hours of receiving a request based on exigent circumstances, the request is deemed approved and we may not deny any subsequent requests for this medication.
- Don’t worry, if you’ve changed policies, we won’t ask you to repeat an approved step therapy request that is already being used to treat a medical condition provided that the drug is still appropriately prescribed and is considered safe and effective.

A note about opioid analgesics. The member cost share for certain abuse-deterrent opioid analgesics may be lower in some states because of laws in those states. Opioid analgesics are a type of painkiller. In response to the global opioid epidemic, the U.S. Food and Drug Administration (FDA) has encouraged drug manufacturers to develop opioids with properties that help deter their misuse and abuse.

Drug(s) may be excluded from the list based on your plan’s benefit design.

¹ If the Prior Authorization Center concludes the prescription claim should be denied, members and their doctors will get letters that explain the appeals and/or grievance process.
KEY
Here are some terms and notes you’ll find on the drug list.

**Brand name drugs are in UPPER CASE, bold type.**

**Generic drugs are in lower case, plain type.**

**$0** = preventive drugs. For some members, this product may be covered at 100% with $0 cost share with a prescription from your provider if specified criteria are met.

**DO** = dose optimization. Usually, this means you may have to switch from taking a drug twice a day to taking it once a day at a higher strength.

**LD** = limited distribution. These drugs are available only through certain pharmacies or wholesalers, depending on what the manufacturer decides.

**OC** = oral chemotherapy. These drugs after deductible shall not exceed $200 per an individual prescription for up to a 30 day supply.

**PA** = prior authorization. You may need to get benefits approved before certain prescriptions can be filled.

**QL** = quantity limits. There are limits on the amount of medicine covered within a certain amount of time.

**SP** = specialty drugs. Specialty drugs are used to treat difficult, long-term conditions. You may need to get this drug through a specialty pharmacy.

**ST** = step therapy. You may need to use another recommended drug first before a prescribed drug is covered.

**Tier 1** = drugs have the lowest cost share for you. These are usually generic drugs that offer the best value compared to other drugs that treat the same conditions.

**Tier 1a** = drugs have the lowest cost share. These are often generic drugs that offer the greatest value compared to others that treat the same conditions.

**Tier 1b** = drugs have a low cost share. These are typically generic drugs that offer the greatest value compared to others that treat the same conditions.

**Tier 2** = drugs have a higher cost share than Tier 1. They may be preferred brand drugs, based on how well they work and their cost compared to other drugs used for the same type of treatment. Some are generic drugs that may cost more because they’re newer to the market.

**Tier 3** = drugs have a higher cost share. They often include brand and generic drugs that may cost more than drugs on lower tiers that are used to treat the same condition.

**Tier 4** = Tier 4 drugs have a higher cost share and usually include preferred specialty brand and generic drugs.

**Tier 5** = Tier 5 drugs have the highest cost share. Drugs in this tier are non-preferred specialty brand and generic drugs.

*Your plan may include Tiers 1a/1b. Refer to your pharmacy benefit summary for more information.

**Tier 1** or **1a** = Drugs with the lowest cost share  
**Tier 1 or 1b** = Drugs with a low cost share  
**Tier 2** = Drugs with a higher cost share than Tier 1  
**Tier 3** = Drugs with a higher cost share than Tier 2  
**Tier 4** = Drugs with a higher cost share than Tier 3 and usually include preferred specialty brand and generic drugs  
**Tier 5** = Drugs with the highest cost share and are non-preferred specialty brand and generic drugs  
$0$ = Preventive Drug  
**DO** = Dose Optimization  
**LD** = Limited Distribution  
**OC** = Oral Chemotherapy  
**PA** = Prior Authorization  
**QL** = Quantity Limit  
**SP** = Specialty Pharmacy  
**ST** = Step Therapy
