

4 Tier Drug Formulary - 2020

Avera Health Plans

2020 4-Tier Drug Formulary

PLEASE READ: THIS DOCUMENT HAS INFORMATION ABOUT THE DRUGS WE COVER IN THIS PLAN.

Please refer to your Certificate of Coverage, Master Contract, Plan Document or other plan materials to determine if your drug is covered. The Drug Formulary does not guarantee coverage and is subject to change. The Drug Formulary is subject to change without notice. Members must use participating pharmacies to fill their prescription drugs.

What is the Avera Health Plans Drug Formulary?

The Drug Formulary is a list of covered prescription drugs, which are approved for use for specific treatments and dispensed through participating pharmacies. Avera Health Plans works with a team of health care providers to choose drugs that provide quality treatment. Avera Health Plans covers drugs on the Drug Formulary that are:

- Medically necessary
- Approved by the United States Food and Drug Administration (FDA)
- Filled at a participating pharmacy

For more information on how to fill your prescriptions and determine if your drug is covered, please review your Certificate of Coverage, Master Contract, Plan Document or other plan materials.

Can the Drug Formulary change?

The Drug Formulary may change from time to time as described in the Certificate of Coverage, Master Contract, Plan Document or other plan materials. The enclosed Drug Formulary is the most current Drug Formulary covered by Avera Health Plans. To get updated information about the drugs covered by Avera Health Plans, please visit us online at AveraHealthPlans.com or call our Service Center at 605-322-4545 or toll-free at 1-888-322-2115, 8 a.m. to 5 p.m. CT, Monday through Friday.

How do I use the Drug Formulary?

There are two ways to find your drug on the drug list:

1. Drug Therapeutic Classification or Plain Language Medical Condition

The Drug Formulary starts on page 7. The drugs on this Drug Formulary are grouped by the type of therapeutic class the drugs fall into. These classes of drugs are also grouped with plain language descriptions for the medical conditions for which these drugs aim to treat. For example, drugs used to treat high blood pressure are listed under “Antihypertensives” and “Drugs for the Heart.”

2. Alphabetical Listing

If you are not sure what category to look under, look for your drug in the Index that starts near the end of the formulary document after the drug therapeutic classes have been presented. The Index is an alphabetical list of all the drugs in this document. Both brand-name drugs and generic drugs are in the Index.

- Look in the Index and find your drug
- Next to your drug, see the page number where you can find coverage information
- Turn to the page listed in the Index and find the name of your drug in the first column of the list

For more information about your Avera Health Plans prescription drug coverage, please look at your Certificate of Coverage, Master Contract, Plan Document or other plan materials. If you have questions about this Drug Formulary, please call our Service Center at 605-322-4545 or toll-free at 1-888-322-2115, 8 a.m. to 5 p.m. CT, Monday through Friday. Avera Health Plans Drug Formulary

The Drug Formulary that starts on page 7 gives you information about the drugs covered by Avera Health Plans. A generic drug is a drug that has the same active ingredients as its brand-name counterpart, and has been approved by the FDA as being interchangeable with the brand-name drug as approved by your provider. Upon release of a generic drug to the market, the generic drug will **generally** be added to the formulary and the associated brand drug will be considered non-preferred or not covered. However, some generic drugs do not cost less than brand-name drugs and may not be added to your formulary.

The first column of the chart lists the drug name. Brand-name drugs are **bolded** (e.g., **Lipitor**). Generic drugs are listed in lower-case italics (e.g., *atorvastatin*).

The second column (labeled Drug Tier) will list what tier the drug is placed on in the Drug Formulary. Refer to your Summary of Benefits and Coverage to find the associated co-pay for that drug tier.

The information in the Requirements/Limits column tells you if Avera Health Plans has any special requirements for coverage of your drug. These requirements and limits may include:

- **Preauthorization (PA):** Avera Health Plans needs your healthcare provider to get preauthorization for certain drugs. This means that approval from Avera Health Plans must be obtained before you fill your drug. If you don't get approval, Avera Health Plans will not cover the cost of the drug. Additional information can be found online at AveraHealthPlans.com.
- **Quantity Limits (QL):** For certain drugs, Avera Health Plans limits the amount of the drug that it will cover. For example, Avera Health Plans only covers 18 tablets of *sumatriptan* 50mg per 30 days. Avera Health Plans also limits the amount of drugs you may receive within a class of drugs. These classes have an "§" next to them on the drug list. For these classes, only one drug should be taken at a time for safety reasons. This may be in addition to a standard one-month or three-month supply.
- **Step Therapy (ST):** Avera Health Plans utilizes step therapy to provide the most cost-effective and safest drugs available for a specific medical condition. Step therapy programs require your healthcare provider to prescribe a step-one drug before a step-two drug will be covered. If the step-one drugs do not work for you, Avera Health Plans will cover the step-two drugs. Visit us online at AveraHealthPlans.com to review a list of Step Therapy Programs.
- **Age Limits:** Certain drugs approved by the FDA or other prescribing guidelines are not appropriate based on age. In some instances Avera Health Plans may restrict use of certain FDA approved drugs to people within a certain age range.
- **Gender Limits:** Certain drugs approved by the FDA or other prescribing guidelines are not

appropriate based on gender.

- **Provider Restriction (PR):** For certain drugs, Avera Health Plans limits the prescribing to certain provider specialties.

What if my drug is not on the Drug Formulary?

If your drug is not on this Drug Formulary, you have two choices:

- Your healthcare provider can prescribe a drug that is similar that is covered on the Drug Formulary. Similar drugs that are preferred and covered on the Drug Formulary may be easier to obtain and lower cost to you.
- You can request a formulary exception if you believe the drug you take should be covered because other treatment options on the Drug Formulary do not work for you. To request a formulary exception, you or your healthcare provider must provide written documentation to include the following:
 - Why no other prescription on the Drug Formulary will work as well as the requested drug,
 - A list of other drugs that have been tried and how you responded to these drugs
 - Medical documentation to support the medical necessity

How likely is it that I will get the formulary exception?

We will review the information and when a decision has been made, you and your healthcare provider will receive a letter that states the decision. If a formulary exception is approved, the non-preferred co-pay (for the applicable drug type) will be applied. The prescription must be a covered benefit on your plan. Formulary exceptions do not include reductions on prescription co-pays.

What do the tiers mean on the Drug Formulary?
