FORMULARY GUIDE (ENGLISH)

INTRODUCTION

We are pleased to provide the *2023 Molina Healthcare (Molina) Preferred Drug List (Formulary)* as a useful reference and informational tool. This guide can help medical providers select clinically appropriate and cost-effective products for their patients.

The drugs in this guide have been reviewed by a Pharmacy and Therapeutics (P&T) Committee and are approved before being included. This guide reflects current medical practice as of the date of review.

The information in this guide is provided solely for the benefit of medical providers. We do not guarantee accuracy of such information. This guide is not intended to be comprehensive in nature. All the information in the guide is provided as a reference for drug therapy selection.

This guide is subject to state-specific regulations and rules, including, but not limited to, those about generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

Molina is not responsible for the actions or omissions of any medical provider based on information in this guide. The medical provider should check the drug manufacturer's product literature or standard references for more detailed information.

PREFACE

This guide is organized by sections. Each section is divided by therapeutic drug class by type.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

We use the services of a Pharmacy and Therapeutics Committee ("P&T Committee") to approve safe and clinically effective drug therapies. The P&T Committee is an advisory body of clinical professionals. The P&T Committee's voting members include physicians and pharmacists who all have a broad background of clinical and academic expertise on prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To help you understand which specific strengths and dosage forms are covered, some general guidelines are noted below.

- The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., atorvastatin).

- The second column (labeled Drug Tier) will list what tier the drug is placed on in the Drug Formulary.
- The third column (Requirements/Limits) contains any special requirements for coverage of your drug.
- If the OTC and prescription versions of the product are covered, then both are listed.
- Extended-release and delayed-release products require their own entry.
- Dosage forms will be consistent with the category and use where listed.

GENERIC SUBSTITUTION

Generic substitution is when your pharmacy may dispense a generic version instead of a prescribed brand-name product. In this guide, lowercase italicized type means a generic version is available. In most instances, if there's a generic product available, the brand-name version will become non-formulary. The generic product will be covered instead of the brand-name version. However, this guide is subject to state specific regulations and rules for generic substitution and mandatory generic rules apply where appropriate.

Prescription generic drugs are:

- Usually priced lower than their brand-name equivalents
- Approved by the U.S. Food and Drug Administration for safety and effectiveness. They are manufactured under the same strict standards that apply to brand-name drugs
- Tested in humans to make sure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter how safe and effective they are
- Manufactured in the same strength and dosage form as the brand-name drugs

When a generic drug is substituted for a brand-name drug, the generic should be just as safe and effective as the brand-name drug (therapeutic equivalence).

PLAN DESIGN

- This guide represents Molina and Virginia Medicaid's Common Core Formulary. Generic medications are typically available at the lowest cost. Brand-name medications usually cost more than generic versions. Medications not on the list will usually cost the most.

This guide lists drugs in the following manner:

Preferred Drugs

Non-Preferred Drugs

The medications listed in this guide are covered by Molina as represented. Molina covers certain medications on the list if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.). Molina will review requests for such medications outside of their listed criteria for medical necessity. If a medication is not listed, you may request a formulary exception for coverage. We will review medical necessity or formulary exception requests based on

drug-specific prior authorization criteria or standard non-formulary prescription request criteria. Log into molinahealthcare.com to check coverage.

PRIOR AUTHORIZATION REQUEST PROCEDURE

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when formulary options have proven not to work. When this happens, the physician may fax a completed drug prior authorization form to Molina at (844) 278-5731. You can find these forms at molinahealthcare.com. We will not consider trials of pharmaceutical samples as rationale for approving a prior authorization request.

PRIOR AUTHORIZATION HELPFUL HINTS

For the quickest response possible from Molina's pharmacy department, please provide relevant information with the Prior Authorization request.

The following are examples:

Class of Medication/Diagnosis	Requested Clinical Information
Cholesterol Lowering	Lipid Panel, Cardiovascular risk factors
Diabetes	A1c Report
Non-Formulary/Non-Preferred Medication	Medication Log and/or Progress Notes documenting previous use of Formulary medications

EXCLUDED SERVICES

Please note that certain medications are excluded. These include, but are not limited to:

- Drugs used for anorexia or weight gain
- Drugs used to promote fertility
- Agents used for cosmetic purposes or hair growth
- Agents used for the treatment of sexual or erectile dysfunction, unless such agents are used to treat a condition other than sexual or erectile dysfunction, for which the agents have been approved by the FDA
- All DESI (Drug Efficacy Study Implementation) drugs as defined by the FDA to be less than effective. Compound prescriptions, which include a DESI drug, are not covered
- Drugs which have been recalled
- Experimental drugs or non-FDA-approved drugs
- Any legend drugs marketed by a manufacturer who does not participate in the Medicaid Drug Rebate program

GUÍA DE FORMULARIO (ESPAÑOL)

INTRODUCCIÓN

Nos complace proporcionar *Lista de Medicamentos Preferidos de [Molina Healthcare (Molina)] [2023] (Formulario)* como una herramienta de referencia e información útil. Esta guía puede ayudar a los proveedores médicos a seleccionar productos clínicamente apropiados y rentables para sus pacientes.

Los medicamentos que se indican en esta guía fueron revisados por un Comité de Farmacia y Terapéutica (P&T, *Pharmacy and Therapeutics*) y están aprobados antes de su inclusión. Esta guía refleja la práctica médica actual a la fecha de revisión.

La información en esta guía se proporciona únicamente para el beneficio de los proveedores médicos. No garantizamos la exactitud de dicha información. Esta guía no fue hecha con un propósito integral. Toda la información de esta guía se proporciona como referencia para la selección de la terapia con medicamentos.

Esta guía está sujeta a normas y reglamentos específicos del estado, incluidos, entre otros, aquellos relacionados con la sustitución genérica, los programas de sustancias de administración controlada, la preferencia de marcas y los genéricos obligatorios cuando corresponda.

[Molina] no asume la responsabilidad por las acciones u omisiones de cualquier proveedor médico en función de la información contenida en esta guía. El proveedor médico debe revisar la documentación del producto provista por el fabricante del medicamento o las referencias estándar para obtener información más detallada.

PREFACIO

Esta guía está organizada en secciones. Cada sección se divide según la clase terapéutica del fármaco, por tipo.

COMITÉ DE FARMACIA Y TERAPÉUTICA (P&T)

Utilizamos los servicios de un Comité de Farmacia y Terapéutica (P&T) para aprobar tratamientos con medicamentos seguros y clínicamente eficaces. El Comité de P&T es un organismo asesor de profesionales clínicos. Entre los miembros votantes del Comité de P&T, se encuentran médicos y farmacéuticos, los cuales tienen una amplia experiencia clínica y académica en medicamentos recetados. Los miembros votantes del Comité de P&T deben divulgar cualquier relación financiera o conflicto de intereses con cualquier fabricante farmacéutico.

DESCRIPCIONES DE LOS PRODUCTOS DE LA LISTA DE MEDICAMENTOS

Para ayudar a entender cuáles son las fortalezas específicas y las formas de dosificación cubiertas, algunas pautas generales se describen a continuación.

- En la primera columna del cuadro se indica el nombre del medicamento. Los medicamentos de marca están en letra mayúscula (p. ej., LIPITOR). Los medicamentos genéricos se indican en letra minúscula en cursiva (p. ej., atorvastatin).
- En la segunda columna (categoría de medicamento etiquetado) se indica en qué categoría se ubica el medicamento en el formulario.
- La tercera columna (Requisitos/Límites) contiene cualquier requisito especial para la cobertura de su medicamento.
- Si las versiones de productos de venta libre (OTC, *Over The Counter*) y las versiones de productos con receta médica están cubiertas, se indican ambas.
- Los productos de liberación prolongada y de liberación retardada requieren su propia entrada.
- Las formas de dosificación serán coherentes con la categoría y el uso en que se clasificaron.

SUSTITUCIÓN GENÉRICA

La sustitución genérica es cuando su farmacia puede administrar una versión genérica en lugar de un producto de marca recetado. En esta guía, la letra minúscula en cursiva significa que hay una versión genérica disponible. En la mayoría de los casos, si hay un producto genérico disponible, la versión de marca registrada no tendrá formulario. El producto genérico estará cubierto en lugar de la versión de marca registrada. Sin embargo, esta guía está sujeta a regulaciones y normas específicas del estado sobre la sustitución genérica y se aplican normas genéricas obligatorias si corresponde.

Los medicamentos genéricos con receta médica cuentan con las siguientes características:

- Normalmente, tienen un precio menor que sus equivalentes de marca.
- Están aprobados por la Administración de Alimentos y Medicamentos de los EE. UU. en términos de seguridad y eficacia. Se fabrican bajo las mismas normas estrictas que se aplican a medicamentos de marca.
- Se probaron en humanos para garantizar que el genérico sea absorbido en el torrente sanguíneo en una tasa y extensión similares en comparación con el medicamento de marca (bioequivalencia). Los genéricos pueden ser diferentes de los de la marca en cuanto a tamaño, color e ingredientes inactivos, pero esto no altera lo efectivos ni seguros que son.
- Se fabrican con la misma concentración y dosificación que los medicamentos de marca.

Cuando un medicamento genérico es sustituido por un medicamento de marca, el medicamento genérico debe ser igual de efectivo y seguro que el medicamento de marca (equivalencia terapéutica).

DISEÑO DE PLANES

Esta guía representa el Formulario Básico Común de [Molina] y Virginia Medicaid. Los medicamentos que se presentan en el documento pueden tener un costo variable para el miembro del plan. Los medicamentos genéricos suelen estar disponibles al menor precio. Los medicamentos de marca, por lo general, serán más caros que las versiones genéricas. Los medicamentos que no están presentes en la lista suelen tener el mayor precio.

En esta guía se indican los medicamentos de la siguiente manera:

Categoría 1: Medicamentos Genéricos Preferidos

Categoría 2: Medicamentos de Marca Preferidos

Categoría 3: Medicamentos de Marca no Preferidos: Los medicamentos que no aparecen en el documento se consideran como “No Preferidos”

Los medicamentos que aparecen en esta guía están cubiertos por [Molina] según lo que se representa. [Molina] cubra algunos medicamentos de la lista si se cumplen los criterios de administración de utilización (es decir, terapia progresiva, autorización previa, límites de cantidad, etc.). [Molina] revisará las solicitudes de dichos medicamentos que estén fuera de los criterios enumerados se revisarán según la necesidad médica. Si un medicamento no aparece, puede solicitar una excepción de formulario para la cobertura. Revisaremos las solicitudes de necesidad médica o de excepción de formulario en función de los criterios de autorización previos específicos para el medicamento o los criterios estándar de solicitud de receta médica no convencional. Inicie sesión en [molinahealthcare.com] para revisar la cobertura.

PROCEDIMIENTO DE SOLICITUD DE AUTORIZACIÓN PREVIA

Las recetas de medicamentos que requieren aprobación previa o para medicamentos que no están incluidos en el Formulario de Medicamentos de [Molina] pueden ser aprobadas cuando son médicamente necesarias y cuando se haya demostrado que las alternativas del formulario no funcionan. Cuando esto ocurra, su proveedor puede enviar por fax un formulario completado de autorización previa de medicamentos a [Molina] al [(844) 278-5731]. Puede encontrar estos formularios en [molinahealthcare.com]. No consideraremos los ensayos de muestras farmacéuticas como justificativos para la aprobación de una solicitud de autorización previa.

CONSEJOS ÚTILES DE AUTORIZACIÓN PREVIA

Para la respuesta más rápida posible del Departamento de Farmacia de [Molina], proporcione la información pertinente con la solicitud de autorización previa.

Observe los siguientes ejemplos:

Clase de medicamento o diagnóstico	Información clínica solicitada
Reducción de colesterol	Perfil lipídico, factores de riesgo cardiovasculares
Diabetes	Resultados de prueba de A1c
Medicamento no preferido/fuera del formulario	Los Registros de Medicamentos o Notas de Progreso en los cuales se documente que el medicamento del formulario se utilizó con anterioridad

SERVICIOS EXCLUIDOS

Tenga en cuenta que algunos medicamentos están excluidos. Estos incluyen, entre otros:

- Medicamentos contra la anorexia, pérdida de peso o aumento de peso.
- Medicamentos para promover la fertilidad.
- Medicamentos para fines cosméticos o el crecimiento del cabello.
- Medicamentos para el tratamiento de disfunción sexual o eréctil; a menos que dichos medicamentos se utilicen para tratar una afección distinta de la disfunción eréctil; para la que los medicamentos estén aprobados por la FDA.
- Todos los medicamentos DESI (*Drug Efficacy Study Implementation*, Implementación del Estudio de la Eficacia de los Medicamentos) que, según la definición de la FDA, no tengan el nivel requerido de eficacia. Recetas de compuestos, lo que incluye medicamentos DESI no cubiertos.
- Medicamentos que se hayan retirado del Mercado.
- Medicamentos experimentales o no aprobados por la FDA.
- Cualquier medicamento de venta bajo receta archivada que se comercialice por un fabricante no perteneciente al Programa de Devolución de Medicamentos de Medicaid.
