FORMULARY GUIDE (ENGLISH)

INTRODUCTION

We are pleased to provide the *2023 Molina Healthcare of Utah Preferred Drug List (Formulary)* as a useful reference and informational tool. This document can assist medical providers in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. All the information in the document is provided as a reference for drug therapy selection.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of a Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an advisory body of clinical professionals. The P&T Committee's voting members include physicians and pharmacists, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, general principles are noted below.

- The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., atorvastatin).
- The second column (labeled Drug Tier) will list what tier the drug is placed on in the Drug Formulary.
- The third column (Requirements/Limits) contains any special requirements for coverage of your drug.
- If the OTC and Prescription versions of the product are covered, then both are listed.
- Extended-release and delayed-release products require their own entry.
- Dosage forms on the document will be consistent with the category and use where listed.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. In this document, lowercase italicized type indicates generic availability. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product to the market. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Prescription generic drugs are:

- Usually priced lower than their brand-name equivalents
- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug
- Manufactured in the same strength and dosage form as the brand-name drugs

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

PLAN DESIGN

The document represents a closed formulary plan design. Drugs represented on the document may have varying cost to the plan member. Generic medications typically are available at the lowest cost, brand-name medications on the document will generally cost more than generics, and medications not on the list will generally cost the most.

Type of Drug	Plan B	Plan C
Tier 1: Preferred Generic	\$5	\$15
Tier 2: Preferred Brand	5%	25%
Tier 3: Non-Preferred Drugs	5%	50%

Some members qualify for \$0 copays based on eligibility information from the state. Members are also exempt from copays when the state notifies us that members have reached their max out of pocket expenses.

The tiered format places drugs into tiers in the following manner:

Tier 1: Preferred Generic Drugs

Tier 2: Preferred Brand Drugs

Tier 3: Non-Preferred Drugs - Medications not listed on the document are considered Non-Preferred

The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria. Log into www.molinahealthcare.com to check coverage.

PRIOR AUTHORIZATION REQUEST PROCEDURE

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when formulary options have demonstrated ineffectiveness. When these exceptional situations arise, the physician may fax a completed drug prior authorization form to Molina at (866) 497-7448. The forms may be obtained by logging into the website www.molinahealthcare.com. Trials of pharmaceutical samples will not be considered as rationale for approving a prior authorization request.

PRIOR AUTHORIZATION HELPFUL HINTS

To ensure the quickest response possible from MHU Pharmacy Department, please provide relevant information with the Prior Authorization request.

The following are examples:

Class of Medication/Diagnosis	Requested Clinical Information
Cholesterol Lowering	Lipid Panel, Cardiovascular risk factors
Diabetes	A1c Report
Non-Formulary/Non-Preferred Medication	Medication Log and/or Progress Notes documenting previous use of Formulary medications

REQUESTING FORMULARY CHANGES

If you are a prescriber and would like to request a formulary change, please submit your request and rationale to Molina's Pharmacy Department with your contact information.

Fax: (855) 714-2419

CATEGORIES OF CONSIDERATION

OPIOID ANALGESICS

All Opioid Analgesics are subject to a Morphine Equivalent Dose of 90 mg per day. Concurrent use of opioids with benzodiazepines or muscle relaxants is excluded.

GUÍA DE FORMULARIO (ESPAÑOL)

INTRODUCCIÓN

Nos complace proporcionar la *Lista de Medicamentos Preferidos de Molina Healthcare of Utah 2023 (Formulario)* como una herramienta de referencia e información útil. Este documento puede ayudar a los proveedores médicos a seleccionar productos clínicamente apropiados y rentables para sus pacientes.

Los medicamentos representados fueron revisados por un Comité de Farmacia y Terapéutica (P&T, *Pharmacy and Therapeutics*) y están aprobados para su inclusión. En el documento se refleja la práctica médica actual a la fecha de revisión.

La información contenida en este documento y sus apéndices se proporciona únicamente para la conveniencia de los proveedores médicos. No garantizamos ni aseguramos la exactitud de dicha información. Tampoco fue hecha con un propósito integral. Toda la información del documento se proporciona como referencia para la selección de la terapia con medicamentos.

El documento está sujeto a normas y reglamentos específicos del estado, incluidos, entre otros, aquellos relacionados con la sustitución genérica, los programas de sustancias de administración controlada, la preferencia de marcas y los genéricos obligatorios cuando corresponda.

No asumimos responsabilidad alguna por las acciones u omisiones de cualquier proveedor médico en función de la confianza, total o parcial, en la información contenida en el presente documento. El proveedor médico debe consultar la documentación del producto provista por el fabricante del medicamento o las referencias estándar para obtener información más detallada.

PREFACIO

El documento está organizado en secciones. Cada sección se divide según la clase terapéutica del fármaco, la cual está definida principalmente por el mecanismo de acción.

COMITÉ DE FARMACIA Y TERAPÉUTICA (P&T)

Los servicios de un Comité de Farmacia y Terapéutica (P&T) se utilizan para aprobar tratamientos con medicamentos seguros y clínicamente eficaces. El Comité de P&T es un organismo asesor de profesionales clínicos. Entre los miembros votantes del Comité de P&T, se encuentran médicos y farmacéuticos, los cuales tienen una amplia experiencia clínica y académica respecto de los medicamentos recetados. Los miembros

votantes del Comité de P&T deben divulgar cualquier relación financiera o conflicto de intereses con cualquier fabricante farmacéutico.

DESCRIPCIONES DE LOS PRODUCTOS DE LA LISTA DE MEDICAMENTOS

Para ayudar a entender cuáles son las fortalezas específicas y las formas de dosificación que se incluyen en el documento, los principios generales se describen a continuación.

- En la primera columna del cuadro se indica el nombre del medicamento. Los medicamentos de marca están en letra mayúscula (p. ej., LIPITOR). Los medicamentos genéricos se indican en letra minúscula en cursiva (p. ej., atorvastatin).
- En la segunda columna (categoría de medicamento etiquetado) se indica en qué categoría se ubica el medicamento en el formulario.
- La tercera columna (Requisitos/límites) contiene cualquier requisito especial para la cobertura de su medicamento.
- Si las versiones de productos de venta libre (OTC, *Over The Counter*) y las versiones de productos con receta médica están cubiertas, se indican ambas.
- Los productos de liberación prolongada y de liberación retardada requieren su propia entrada.
- Las formas de dosificación en el documento serán coherentes con la categoría y el uso en que se clasificaron.

SUSTITUCIÓN GENÉRICA

La sustitución genérica es una acción de farmacia en la que se administra una versión genérica en lugar de un producto de marca recetado. En este documento, la letra minúscula en cursiva indica la disponibilidad genérica. En la mayoría de los casos, un medicamento de marca registrada para el cual haya un producto genérico disponible no tendrá formulario y presentará el producto genérico cubierto en su lugar en el momento de lanzar el producto genérico al mercado. Sin embargo, el documento está sujeto a regulaciones y normas específicas del estado relacionadas con la sustitución genérica y se aplican normas genéricas obligatorias si corresponde.

Los medicamentos genéricos con receta médica cuentan con las siguientes características:

- Normalmente, tienen un precio menor que sus equivalentes de marca.
- Están aprobados por la Administración de Alimentos y Medicamentos de los EE. UU. en términos de seguridad y eficacia. Además, se fabrican bajo las mismas normas estrictas que se aplican a medicamentos de marca.
- Se probaron en humanos para garantizar que el genérico sea absorbido en el torrente sanguíneo en una tasa y extensión similares en comparación con el

medicamento de marca (bioequivalencia). Los genéricos pueden ser diferentes de los de la marca en cuanto a tamaño, color e ingredientes inactivos, pero esto no altera su eficacia o capacidad para ser absorbidos, tal como el medicamento de marca.

- Se fabrican con la misma concentración y dosificación que los medicamentos de marca.

Cuando un medicamento genérico es sustituido por un medicamento de marca, se puede esperar que el medicamento genérico tenga el mismo efecto clínico y perfil de seguridad que el medicamento de marca (equivalencia terapéutica).

DISEÑO DE PLANES

El documento representa un diseño de planificación de formulario cerrado. Los medicamentos que se presentan en el documento pueden tener un costo variable para el miembro del plan. Los medicamentos genéricos suelen estar disponibles al menor precio, mientras que los medicamentos de marca presentes en el documento, por lo general, serán más caros que los genéricos. Además, los medicamentos que no están presentes en la lista suelen tener el mayor precio.

Tipo de medicamento	Plan B	Plan C	Plan D
Medicamentos genéricos preferidos	\$5	\$15	\$0
Medicamentos de marca preferidos	5 %	25 %	\$0
Medicamentos de marca no preferidos	5 %	50 %	\$0

Este formato ordena los medicamentos en categorías de acuerdo con lo siguiente:

Categoría 1: Medicamentos Genéricos Preferidos

Categoría 2: Medicamentos de Marca Preferidos

Categoría 3: Medicamentos de Marca no Preferidos: Los medicamentos que no aparecen en el documento se consideran como “No Preferidos”

Los medicamentos que aparecen en el documento están cubiertos por el plan según lo que se representa. Algunos medicamentos de la lista están cubiertos si se cumplen los criterios de administración de utilización (es decir, terapia progresiva, autorización previa, límites de cantidad, etc.). Las solicitudes de uso de dichos medicamentos que estén fuera de los criterios enumerados se revisarán según la necesidad médica. Si un medicamento no aparece en el documento, es posible que se solicite una excepción de formulario para la cobertura. Las solicitudes de necesidad médica o de excepción de formulario se revisarán en función de los criterios de autorización previos específicos para el medicamento o los criterios estándar de solicitud de receta médica no convencional. Inicie sesión en www.molinahealthcare.com para revisar la cobertura.

PROCEDIMIENTO DE SOLICITUD DE AUTORIZACIÓN PREVIA

Las recetas de medicamentos que requieren aprobación previa o para medicamentos que no están incluidos en el Formulario de Medicamentos de Molina pueden ser aprobadas cuando son médicamente necesarias y cuando se haya demostrado que las alternativas del formulario son ineficaces. Cuando estas situaciones excepcionales ocurren, su proveedor puede enviar por fax un formulario completado de autorización previa de medicamentos a Molina al (866) 497-7448. Inicie sesión en el sitio web de www.molinahealthcare.com para obtener los formularios. Los ensayos de muestras farmacéuticas no se considerarán como justificativos para la aprobación de una solicitud de autorización previa.

CONSEJOS ÚTILES DE AUTORIZACIÓN PREVIA

Para garantizar la respuesta más rápida posible del Departamento de Farmacia de MHU, proporcione la información pertinente con la solicitud de autorización previa.

Observe los siguientes ejemplos:

Clase de medicamento o diagnóstico	Información clínica solicitada
Reducción de colesterol	Perfil lipídico, factores de riesgo cardiovasculares
Diabetes	Resultados de prueba de A1c
Medicamento no preferido/fuera del formulario	Los Registros de Medicamentos o Notas de Progreso en los cuales se documente que el medicamento del formulario se utilizó con anterioridad

SOLICITUD DE CAMBIOS EN EL FORMULARIO

Si usted es un recetador y desea solicitar un cambio en el formulario, envíe su solicitud y fundamento al Departamento de Farmacia de Molina con su información de contacto.

Fax: (855) 714-2419
