

## An Introduction to Independent Health's 2024 Child Health Plus Formulary

The following information applies to Independent Health's New York State Sponsored Child Health Plus plan. Before using your prescription drug benefit, check your summary of benefits to ensure this formulary is associated with your plan.

**Note:** If you are reading a printed version of this drug formulary, it may be outdated. Please visit [independenthealth.com](https://independenthealth.com) to view your current drug formulary.

This drug formulary lists generic and brand-name medicines covered under Child Health Plus. Independent Health makes every attempt to provide you with the most accurate medicine list possible. However, this list and the availability of generic medicine can change frequently. When a generic medicine becomes available for a formulary brand-name medicine, the generic medicine will be covered, and the brand-name medicine will become non-formulary and will require prior authorization to be covered. Please talk to your doctor about any questions you may have about the formulary.

### Prior Authorization

Independent Health requires you to get prior authorization for certain medicine. To obtain coverage for a medicine requiring prior authorization, a prior authorization request for medical exception must be submitted by your health care provider and approved by Independent Health. Medicines that require Prior Authorization are listed with a "PA" in the formulary.

### Step Therapy

In some cases, Independent Health requires you to first try certain medicines to treat your medical condition before we cover another medicine for that condition. Step therapy is a way to help you get the best quality and value from your prescription drug benefit. This usually means that an equally effective

generic medicine is prescribed before a more expensive brand-name medicine. Step therapy may also ensure that two drugs are used together if they are more effective. Medicines that require Step Therapy are listed with a "ST" in the formulary.

### Quantity Limitations

Quantity limitations may apply to certain medicines. Some medicine is covered up to a specific quantity per 30 days. Some examples of medicine with a quantity limitation are: sumatriptan (generic Imitrex<sup>®</sup>) and aprepitant (generic Emend<sup>®</sup>). Medicine with a quantity limitation is listed with a "QL" in the formulary.

For items that come pre-packaged (for example: tube/container, inhaler device, single dose units, or liquid container), one package size is allowed per fill of these items. If a quantity limit is designated on the formulary, this restriction will take precedence over the pre-packaged limitations, when applicable.

### Age Restriction

Prescription medicines restricted by age due to safety reasons are listed with an "AL" on the formulary. Age restrictions based on Food and Drug Administration (FDA) recommended labeling may not be listed on the formulary but still apply.

### Dental Formulary

Medicines covered on our Dental Formulary are available when prescribed by a dental provider. Medicines included in our Dental Formulary are listed with a "DF" on the formulary. Medicine without a "DF" will not be covered when written by a Dental Provider.

### Limited Distribution Drugs

Some specialty medicine can only be obtained through designated specialty pharmacies due to limited distribution placed on the medicine by

the manufacturer. These medicines are listed with "LDD" on the formulary.

### **Key**

AL – Age Limit

DF – Dental Formulary

LDD – Limited Distribution Drugs

PA – Prior Authorization Required

QL – Quantity Limits Apply

ST – Step Therapy

### **Over-the-Counter (OTC) Medicine**

The Child Health Plus benefit allows coverage for Medicaid-approved over-the-counter drugs. For a full list of covered OTC medicine visit [www.emedny.org/info/formfile.aspx](http://www.emedny.org/info/formfile.aspx). A prescription is required for coverage of these OTC medicines.

### **Compounded Prescription Medications**

Compounded prescriptions (medicines that are not commercially manufactured) must be prepared by a participating pharmacy and contain at least one prescription component. The dispensing pharmacy is required to submit for prior approval and when covered, will take the applicable copay. Compounds which cost under \$200 do not require prior authorization if all other requirements are met. Compounds which cost more than \$200 will require prior authorization.

Coverage is provided in accordance with our Compounding Medication Products Policy. Bulk products and powders are excluded from coverage.

### **Diabetic Supplies**

Products listed in this section are a covered benefit based on your plan. Products not listed require prior authorization. Copays vary by plan.

BD needles and syringes are our preferred needle/syringe products. Sizes typically used for insulin are covered. Other sizes will require prior authorization.

Alcohol swabs to prep for using diabetic medicines are covered.

OneTouch glucose meters, lancets, test strips, and supplies are our preferred diabetic supplies and do not require prior authorization.

OneTouch will provide a glucose meter to you with no copay. Quantities are limited to one meter per member. You can obtain a meter by calling LifeScan, Inc. at 1-888-377-5227, offer code 289IHA001. Please have your ID number available when you call.

Diabetic test strips are limited to a maximum of 100 per 30 days for non-insulin dependent diabetics. Diabetic test strips are limited to a maximum of 300 per 30 days for insulin dependent diabetics.

FreeStyle Libre, FreeStyle Libre 2 and FreeStyle Libre 3 continuous glucose monitors and sensors are available at retail pharmacies without prior authorization for members using insulin (short or rapid-acting) multiple times a day to control their diabetes.

- Freestyle Libre, Freestyle Libre 2 & FreeStyle Libre 3: If covered, members may fill up to two sensors per 28-day supply, or six sensors per 84-day supply subject to the Independent Heath formulary limits; one receiver per plan year.

Dexcom G6 and G7 continuous glucose monitors are available at retail pharmacies without prior authorization only for those between the ages of 2 to under 4 years old. The member must be using insulin (short or rapid-acting) multiple times a day to control their diabetes.

- Dexcom G6 & Dexcom G7: If covered, members may fill up to three sensors per 30-day supply, or nine sensors per 90-day supply subject to the Independent Heath formulary limits; one wireless transmitter every 90 days (Dexcom G7 sensors include a built-in transmitter); one receiver per plan year.

### **Lost/Stolen/Damaged Medications and Vacation Supplies**

Replacement of any lost, stolen or damaged medications is the responsibility of the member. Vacation supplies are not covered under this benefit. Prior authorization cannot be used to obtain early refills for lost, stolen, or damaged medications; or for extended supplies or vacation supplies.

## **Pharmacy Administered Immunizations**

Vaccinations are covered when administered by licensed pharmacists who obtain additional certification to administer vaccinations to adults 19 years of age and older. Vaccines for children 18 years and younger can be obtained through any New York Vaccines for Children (VFC) Program.

### **Additional Formulary Information:**

- Opioid medications are limited to a maximum of four (4) fills per 30 days.
- Appetite suppressants/weight-loss medications are excluded from coverage.
- Medications used for cosmetic purposes are excluded from coverage.
- Medical foods other than those to treat inborn errors of metabolism, such as PKU, are excluded from coverage.
- Prenatal vitamins classified as medical foods are not covered.
- Medications used for the treatment of sexual or erectile dysfunction are not covered.
- Any/all medicine used to promote fertility is not covered for those with a Child Health Plus plan.
- Growth hormones are excluded from coverage when prescribed for the treatment of short stature.
- Medicines that are excluded from coverage under state and/or federal law are not covered by Independent Health.
- In order to ensure the safest and most appropriate care, Independent Health's drug coverage criteria is limited to medically-accepted indications based on FDA approved labeling and guidelines not otherwise excluded from New York State Medicaid.
- Medicines listed on the drug formulary as covered without restriction may require prior authorization or may not be covered if it is determined that they are being used for a non-FDA-approved indication or in

conjunction with a procedure or treatment not covered under the member's Health Contract.

- Prescription medicines not recognized by the FDA without a National Drug Code (NDC) are excluded from coverage.
- Prescription medicines not approved by the FDA are excluded from coverage.
- Drugs found to be less than effective by the FDA's drug efficacy study implementation (DESI) are not covered. These drugs were approved before the FDA required drugs to be effective as well as safe.
- Generic substitution is used only as required by state pharmacy laws. Therapeutic interchange is not utilized.
- Only OTC COVID tests approved by the FDA (including the EUA process) are covered. These tests are administered and read by the member without a doctor's order or clinical assessment and are not sent to a lab for processing.

Each member may get up to eight (8) OTC tests in a 30-day period without a doctor's order. Since most test kits have two tests in them, a member would be able to get four (4) test kits per 30-days.
