

STEP THERAPY CRITERIA

This list is current as of 8/1/2024 and pertains to Independent Health's 2024 Child Health Plus Formulary.

In some cases, Independent Health requires that you first try certain medications to treat your medical condition before we will cover another medication for that condition. Step therapy is a way to help you get the best quality and value from your prescription medication benefit. This usually means that an equally effective generic medication is prescribed before a more expensive brand-name medication. Step therapy may also ensure that two medications are used together if they are more effective.

Medications that require Step Therapy have an "ST" in the Notes column of the formulary. This document contains the Step Therapy protocols that are associated with our Child Health Plus Formulary.

If you have any questions, please contact our Member Services Department at (716) 250-7183 or 1-833-891-9372, Monday through Friday from 8 a.m. to 8 p.m. TTY users please call 711.

The formulary may change at any time. You will receive notice when necessary.

Airsupra

Products Affected

- AIRSUPRA AEROSOL 90-80 MCG/ACT INHALATION

Details

Criteria	A prescription for this medication goes through online if the patient's Independent Health prescription history documents that an inhaled corticosteroid or its combination (such as budesonide inhalation suspension or fluticasone-salmeterol inhaler) was filled within the previous 120 days.
