

## **STEP THERAPY CRITERIA**

This list is current as of 4/1/2025 and pertains to the following formularies:

2025 Independent Health's Medicare Advantage C-SNP Part D Formulary

In some cases, we require that you first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B. This document contains the Step Therapy protocols that are associated with our Medicare Advantage Part D Formularies.
