

## **STEP THERAPY CRITERIA**

This list is current as of 10/1/2024 and pertains to the following Independent Health 2025 Formularies:

Independent Health's Drug Formulary I  
Independent Health's Drug Formulary II  
Independent Health's Drug Formulary III  
Independent Health's FEHB Drug Formulary  
Independent Health's Essential Plan Formulary

In some cases, Independent Health requires that you first try certain medications to treat your medical condition before we will cover another medication for that condition. Step therapy is a way to help you get the best quality and value from your prescription medication benefit. This usually means that an equally effective generic medication is prescribed before a more expensive brand-name medication. Step therapy may also ensure that two medications are used together if they are more effective.

Medications that require Step Therapy have an "ST" in the Notes column of the formulary.

If you have any questions, please contact our Member Services Department at 1-800-501-3439 or (716) 631-8701, Monday through Friday from 8 a.m. to 8 p.m. TTY users please call 711.

The formulary may change at any time. You will receive notice when necessary.
