STEP THERAPY CRITERIA FOR MEDICARE PART B DRUGS

This list is current as of 4/1/2025 and pertains to the following Independent Health Medicare Advantage Plans for 2025:

Independent Health's Encompass 65® Basic (HMO)
Independent Health's Encompass 65® Core (HMO)
Independent Health's Encompass 65® Direct (HMO)
Independent Health's Medicare Passport® Access (PPO)
Independent Health's Medicare Passport® Connect (PPO)
Independent Health's Medicare Family Choice® (HMO I-SNP)
Independent Health's Assure Advantage (HMO C-SNP)
Independent Health's Medicare Advantage Employer Group Waiver Plans (EGWP)

In some cases, we require that you first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug X and Drug Y both treat your medical condition, we may not cover Drug Y unless you try Drug X first. If Drug X does not work for you, we will then cover Drug Y.

The therapy outlined in this document may also involve a combination of Part B and Part D drugs. For example, we may not cover a Part B drug unless you try a Part D drug first. Or, we may not cover a Part D drug unless you try a Part B drug first. This is dependent on the therapy described to treat your medical condition. This document contains the Step Therapy protocols for Medicare Part B drugs that are associated with the Independent Health Medicare Advantage Plans mentioned above.

If you have any questions, please contact our Medicare Member Services Department at 1-800-665-1502 or, for TTY users 711, October 1st – March 31st: Monday through Sunday from 8 a.m. to 8 p.m., April 1st – September 30th: Monday through Friday from 8 a.m. to 8 p.m.

The formulary may change at any time. You will receive notice when necessary.
