

An Introduction to Independent Health's 2027 Drug Formulary I

The following information applies to plans offered through large group employers. Before using your prescription drug benefit, check your summary of benefits to ensure this formulary (Drug Formulary I) is associated with the plan offered to you by your employer.

Note: If you are reading a printed version of this drug formulary, it may be outdated. Please visit independenthealth.com to view your current drug formulary.

The drugs on this list are chosen for their effectiveness and safety. This formulary provides our members with options for their care at different costs. This allows members to work with their doctor to choose the medicine that is best for them.

Understanding this 3-Tier Formulary

Independent Health's 3-tier formulary offers generic, brand-name and specialty medicines with three different member cost-sharing levels:

- Tier 1 drugs have the lowest cost share.
- Tier 2 drugs have a higher member cost sharing.
- Tier 3 drugs have the highest member cost sharing.

For more information regarding tiers and copays, see your member contract.

Can the formulary change?

If you are impacted by a formulary change, that change will not affect you until your plan renews the following year. You can view a list of changes and their effective date on our website. Refer to the document called "Notice of Change."

Note, drugs may change tiers or be removed from the formulary if a generic equivalent or interchangeable biological product becomes available. Also, if the FDA or a drug's manufacturer finds a drug is unsafe, it is immediately removed from the formulary. We will communicate changes to members based on notification requirements.

What are generic drugs, biological products and biosimilars?

- Generic drugs have the same active ingredient as the brand name drug.
- Biological products are made in a more complex way than conventional drugs.
- Since biological products are more complex, instead of having a generic form, they have alternatives called biosimilars.

Generics, biological products and biosimilars must all be approved by the FDA. Generally, generics and biosimilars work just as well as the brand name drug or biological product and usually cost less. Choosing a generic drug may help keep your prescription drug costs down. Generic drugs are listed on the formulary in lower case (i.e., fluticasone-salmeterol), while brand name drugs are capitalized (i.e., ADVAIR HFA).

What if a medicine I take is not on the formulary?

If your doctor feels a non-formulary drug is medically necessary, they can request a medical exception from Independent Health's Medical Director. Your doctor must complete a medical exception form and fax it to Independent Health's Prior Authorization Department, who will review the details of the case. If the request is approved, that drug will be covered at your Tier 3 member cost sharing.

What if I have questions about my pharmacy benefit?

Please call our Member Services Department at (716) 631-8701 or 1-800-501-3439, Monday through Friday from 8 a.m. to 8 p.m. TTY users call 711.

Prior Authorization

Independent Health requires you to get prior authorization for certain medications. To obtain coverage for a medication requiring prior authorization, a prior authorization request for medical exception must be submitted by your health care provider and approved by Independent Health. Medications that require prior authorization are listed with a "PA" in the formulary.

Step Therapy

In some cases, Independent Health requires you to first try certain medications to treat your medical condition before we cover another medication for that condition. Step therapy is a way to help you get the best quality and value from your prescription medication benefit. This usually means that an equally effective generic medication is prescribed before a more expensive brand-name medication. Step therapy may also ensure that two medications are used together if they are more effective. Medications that require step therapy are listed with a “ST” in the formulary.

Quantity Limitations

Quantity limitations may apply to certain medications. Some medications are covered up to a specific quantity per 30 or 90 days. Some examples of medications with a quantity limitation are: sumatriptan (generic Imitrex®) and aprepitant (generic Emend®). Medications with quantity limitations are listed with a “QL” in the formulary.

For some items that come pre-packaged (for example: tube/container, inhaler device, single dose units, or liquid container), one package size is allowed per fill of these items. If a quantity limit is designated on the formulary, this restriction will take precedence over the pre-packaged limitations, when applicable.

Specialty Medications

To add value and accessibility in your pharmacy benefits, we offer a specialized prescription medication program for certain specialty medications through Reliance Rx® Specialty Pharmacy. Specialty medications include those that are either self-injectable, require special distribution, handling and/or are at limited supply and certain oral oncology medications. You may fill these medications at designated pharmacies such as Reliance Rx. Reliance Rx specializes in providing high-quality service for complex chronic conditions such as hepatitis, multiple sclerosis, cancer and rheumatoid arthritis.

Along with providing these specialized medications, Reliance Rx also provides a convenient way for you to receive the medication, by arranging delivery at no charge directly to your home. They can also provide you with education on the medication you’re taking, refill reminders and even the necessary supplies,

if applicable. Specialty medications are listed with an “SP” on the formulary. Reliance Rx can be reached at 1-800-809-4763.

Limited Distribution Drugs

Some specialty medications can only be obtained through designated specialty pharmacies due to limited distribution placed on the medication by the manufacturer. These medications are listed with a “LDD” on the formulary.

Affordable Care Act (ACA) Preventive Services

Medications covered under the Affordable Care Act as preventive services are listed with an “ACA” on the formulary. Certain restrictions may apply. As medications are added or removed from the United States Preventive Services Task Force recommendations list, these medications may not be available to you through the ACA until you renew your plan. There is no member cost sharing for these medications.

Preventive/Expanded Preventive

Some medications are considered preventive care for those with qualifying chronic conditions. There is no member cost sharing for these medications. These medications are listed with a “PV” on the formulary. This benefit does not apply to standard plans. Please refer to your member contract to see if this applies.

Some plans cover an Expanded Preventive list. Expanded Preventive medications are marked with “EP” on the formulary. There is no member cost sharing for these medications if your plan has one of these expanded lists. Please refer to your member contract to see if this applies.

Age Restriction

Prescription medicines restricted by age due to safety reasons are listed with an “AL” on the formulary. Age restrictions based on Food and Drug Administration (FDA) recommended labeling may not be listed on the formulary but still apply.

Maintenance Medications

Independent Health allows up to a 90-day supply of certain medications to be filled. Medications eligible to be filled for a 90-day maintenance supply are indicated on the formulary with an “MM.”

Insulin

Insulin is an injectable drug that helps people control their diabetes. It has a maximum cost share per 30-day supply. Refer to your member contract for more information.

Over-the-Counter (OTC) Medications

Certain medications listed on the formulary are available over the counter. A prescription is required for coverage of the OTC products. OTC products that we cover are listed with an "OTC" on the formulary.

Split Fill Dispensing Program

Prescription drugs included in the Split Fill Dispensing Program require close monitoring by your doctor or may be difficult for some people to tolerate. If you start taking one of the medicines in this program, marked on the formulary with "SF," we will cover up to a 15-day supply. Once you've shown that the medicine works well for you, we will cover the 30-day supply.

Substance Related and Addictive Disorder (SRAD)

Medications used to treat Substance Related and Addictive Disorder (SRAD) are marked on the formulary with "SRAD." They are covered under your medical benefit and available to members without a prescription rider.

Dental Formulary

Medications covered on our Dental Formulary are available when prescribed by a dental provider. Medications included in our Dental Formulary are listed with a "DF" on the formulary. Medications without a "DF" will not be covered when written by a dental provider.

Compounded Prescription Medications

Compounded prescriptions (medications that are not commercially manufactured) must be prepared by a participating pharmacy and contain at least one prescription component. The dispensing pharmacy is required to submit for prior approval and when covered the compounded prescription will be available at a Tier 2 cost share. Compounds which cost under \$200 do not require prior authorization if all other requirements are met. Compounds which cost more than \$200 will require prior authorization.

Coverage is provided in accordance with our Compounding Medication Products Policy. Bulk

products and powders are excluded from coverage.

Key

ACA – Affordable Care Act

AL – Age Limit

DF – Dental Formulary

EP – Expanded Preventive

I – Insulin

LDD – Limited Distribution Drugs

MM – 90-day supply

OTC – Over the Counter

PA – Prior Authorization Required

PV – Preventive

QL – Quantity Limits Apply

SF – Split Fill Dispensing Program

SP – Specialty Pharmacy

SRAD – Substance Related and Addictive Disorder

ST – Step Therapy

Diabetic Supplies

Products listed in this section are a covered benefit based on your plan. Products not listed require prior authorization. For most plans, your cost share will be \$0. Please refer to your member contract to see if this applies.

Embeta needles and syringes are our preferred needle/syringe products. Sizes typically used for insulin are covered. Other sizes will require prior authorization.

Alcohol swabs to prep for using diabetic medicines are covered.

FreeStyle glucose meters, lancets, test strips, and supplies are our preferred diabetic supplies and do not require prior authorization.

Abbott will provide a glucose meter to you with no member cost sharing. Quantities are limited to one meter per member. FreeStyle Glucose Meters can be obtained by calling Abbott's diabetes care division at 1-800-680-6850, offer code DOVL6F17. Please have your ID number available when you call.

Diabetic test strips are limited to a maximum of 100 per 30 days for non-insulin dependent diabetics. Diabetic test strips are limited to a maximum of 300 per 30 days for insulin dependent diabetics.

FreeStyle Libre, FreeStyle Libre 2 and FreeStyle Libre 3 are the preferred continuous glucose monitors and sensors for Independent Health members. Preferred products are available at retail pharmacies without prior authorization for members using at least one injection of insulin per day to control their diabetes.

- Freestyle Libre, Freestyle Libre 2 & FreeStyle Libre 3: If covered, members may fill up to two sensors per 28-day supply, or six sensors per 84-day supply subject to the Independent Health formulary limits; and one receiver per plan year.

Dexcom G6 and G7 continuous glucose monitors are non-preferred products and require prior authorization. Patients must have tried and failed, or have a contraindication to, the FreeStyle Libre continuous glucose monitoring system to gain access to Dexcom continuous glucose monitors.

- Dexcom G6 & Dexcom G7: If approved, members may fill up to three sensors per 30-day supply; one Dexcom G6 wireless transmitter every 90 days (Dexcom G7 sensors include a built-in transmitter); and one receiver per plan year.

Cost Share for diabetic medications

For certain diabetic medications, your diabetic cost share may apply. Please refer to your member contract.

Lost/Stolen/Damaged Medications

Replacement of any lost, stolen or damaged medications is the responsibility of the member.

Post-Exposure Prophylaxis

Medications for HIV post-exposure prophylaxis are covered when a diagnosis is documented.

Epinephrine Devices

Your epinephrine devices may have a maximum cost share per plan year. Refer to your member contract for more information.

Additional Formulary Information

- Medications used for cosmetic purposes are excluded from coverage.
- Medical devices: only previously listed diabetic supplies and spacers for inhalers (which may or may not require a prescription) are covered. All other devices are excluded from coverage.

- Medical foods other than those to treat inborn errors of metabolism, such as PKU, are excluded from coverage.
- Medications used for the treatment of sexual dysfunction (SD) may be subject to quantity limits. Duplicate therapy with other SD medications is not allowed.
- Multivitamins are NOT included in the formulary as various OTC products are available.
- Contraceptives (for members with contraceptive coverage): Formulary contraceptive medications are covered at a \$0 cost share. Cervical caps, diaphragms, condoms, spermicides and any other FDA-approved contraceptives are covered at a \$0 cost share. Both prescription and over-the-counter (OTC) products are covered only when prescribed by a licensed health care provider and require a valid prescription.
- Medications listed on the drug formulary as covered without restriction may require prior authorization or may not be covered if it is determined that they are being used for a non-FDA-approved indication or in conjunction with a procedure or treatment not covered under the member's Health Contract.
- Medications not recognized by the FDA without a National Drug Code (NDC) are excluded from coverage.
- Prescription medications not approved by the FDA are excluded from coverage.
- Drugs found to be less than effective by the FDA's drug efficacy study implementation (DESI) are not covered. These drugs were approved before the FDA required drugs to be effective as well as safe.
- Generic substitution is used only as required by state pharmacy laws. Therapeutic interchange is not utilized.
- Members in an "unmanaged" prescription plan are not subject to prior authorization requirements, step therapies, and quantity limits other than when imposed for safety purposes. Additionally, all non-formulary FDA approved medications are covered as a Tier 3 benefit.

- Certain benefit changes are implemented on a rolling basis and effective on your plan renewal date.
- Oral anti-cancer medications not covered under the Affordable Care Act (ACA) are covered at a \$0 cost share, or a \$0 cost share after reaching your deductible. Please refer to your member contract for more information.
- Asthma Medications: Maintenance inhalers (Fluticasone/salmeterol diskus, Fluticasone/salmeterol inhaler and Fluticasone HFA inhaler) are covered at a \$0 cost share. Rescue inhalers (generic Albuterol HFA inhalers) are covered at a \$0 cost share, or a \$0 cost share after reaching your deductible. Please refer to your member contract for more information.
