2020 Commercial 3-Tier Formulary (List of Covered Drugs)

What is the Drug List?

Also called a “formulary” by doctors and pharmacists, the Drug List is an extensive list of safe and effective, FDA-approved, brand name and generic prescription drugs used to treat the most common medical conditions.

The Health First Pharmacy and Therapeutics Committee (P&T), a panel of physicians and pharmacists, developed our Drug List and updates it regularly. The list includes quality drugs available to you at a reasonable cost. Only those medications that have successfully passed federally required clinical testing and evaluation and have been proven effective are included. The P&T Committee reviews and evaluates all available literature about a drug when updating the list.

About Tiers

Most covered prescription drugs will be categorized into one of three cost-sharing tiers. Drug costs vary widely, even though several different medications may be used to treat the same condition. What you pay for the prescription depends upon what tier the drug is listed in. Health First Health Plans and Insurance (The Plan) offers many benefit plans that can vary in coverage for each tier. Details about your specific benefit for each tier are included in The Plan’s Summary of Benefits.

Prescriptions that exceed a 30-day supply will default to a 90-day supply copay (this does not apply to coinsurances). For coinsurances, you will always pay a percentage of the total cost after the applicable deductible is met.

- **Tier 1 (T1)** - Includes low-cost preferred generic drugs.
- **Tier 2 (T1)** - Includes preferred brand-name drugs and some higher-cost generic drugs.
- **Tier 3 (T1)** - Includes higher-cost non-preferred brand-name drugs and generic drugs (some plans may be limited to a 30-day supply).
- **Tier 3 Specialty (T1 SP)** — Includes higher-cost biologics or prescription drugs that require close monitoring for safety and efficacy. These medications must be obtained from Accredo Pharmacy when possible and are limited to a 30-day supply.
- **Preventive Care (NCS)** - Includes some select preventive products, prescription medications and specific over-the-counter (OTC) medications available to you at no cost-sharing (\$0) when applicable conditions are met.

Generic drugs are prescription drugs that have the same active ingredients as brand drugs and are prescribed for the same reasons. When the patent expires on a brand name drug, the FDA permits new manufacturers to produce an equivalent of the brand name drug and make it available to the public. Generally, more than one manufacturer will produce generic versions, although often the same pharmaceutical firm that produces the brand name drug also makes the generic version. This prompts competitive pricing of the generic version and usually results in a less expensive drug that is as safe and effective as the brand name drug.

What will my expenses be?

Every plan is different, and your financial obligation will vary based on your specific plan. You are responsible for any cost sharing your plan requires.

What is a deductible?

A deductible is a set dollar amount that you must pay each calendar year before your health plan starts paying. If your plan includes an integrated pharmacy deductible, it will accumulate with your in-network medical deductible. Refer to your plan documents to see when your deductible starts over for your plan.

What is the difference between a copayment and coinsurance?

Copayments and coinsurance are types of member cost sharing, and they represent the portion of covered prescription expenses members must pay. A copayment is a flat dollar amount while coinsurance is a percentage of the total allowable charges.

What does out-of-pocket maximum mean?

The out-of-pocket maximum protects you from catastrophic medical and prescription drug expenses by limiting how much you have to pay during the benefit year. Your cost sharing for covered prescription drugs (deductible, coinsurance and copayment) all accumulate with your in-network medical out-of-pocket maximum. Refer to your plan documents to see when your out-of-pocket maximum starts over for your plan and to verify the specific cost sharing you have for specific tiers.

The Drug List is subject to change

In order to continue to offer a safe and cost effective selection of prescription drugs, The Plan periodically makes changes to the Drug List. These changes may include removing medications, adding restrictions, and/or covering a drug at a higher tier. Updated formularies are posted to the website as changes are made. The following list represents some of the most common scenarios in which changes to drug coverage will occur:

- Throughout the year, new medications are approved by the FDA. It is the policy of The Plan that new drugs will be excluded for 6 months from the date of FDA approval, during which time the Health First P&T Committee can review the drug for safety and efficacy.
- When a medication is withdrawn from the market due to safety reasons or if it becomes available over-the-counter (OTC). At the time that a medication on the HFP Drug List becomes available OTC, it may be excluded from coverage from that point forward.
- When a brand-name prescription drug loses its patent and the equivalent generic form is added to the Drug List, the brand-name drug may be moved to Tier 3 or removed from the formulary.

This formulary is current as of **September 1, 2020**. To get updated information about covered drugs, please visit our Web site at myHFHP.org or call Customer Service toll-free at 1.855.443.4735 (TTY/TDD relay: 1.800.955.8771) Monday through Friday from 8 a.m. to 6 p.m.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** The Plan requires you and/or your physician to get prior authorization for certain drugs. This means that you will need to get approval from us before you fill your prescriptions. In order for The Plan to pay for these drugs, the physician ordering the prescription is required to submit all medical information to The Plan documenting the medical necessity. These drugs are identified in the Drug List.
- **Step Therapy:** In some cases, The Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B. A complete list of drugs which require Step Therapy is listed in the reference table on page 6.

- **Quantity Limits:** For some covered drugs, there is a maximum amount that will be covered by The Plan over a certain period of time. For example, The Plan covers 30 tablets every 30 days or 90 tablets every 90 days for TRADJENTA.

How can I make the most of my prescription drug benefit?

Prescription drug costs continue to rise every year and can represent a significant part of your healthcare expenses. The Plan helps you pay for your medications by sharing the cost with you and providing substantial discounts for covered medications. To help you manage your drug costs, here are some money-saving tips to consider:

- **Use generic medications whenever possible.** Generic drugs are the chemical equivalent of brand name drugs and are just as effective in most cases. If you take generic drugs you will generally pay less. Talk to your doctor to see if switching to a generic equivalent of any brand-name drug you are taking is appropriate. Please see the list of drugs below to determine which generic drugs are included in lower cost-sharing tiers.

What if my drug is not on the Formulary?

If your drug is not included in this formulary, you should first contact Customer Service and confirm that your drug is not covered. If you learn that The Plan does not cover your drug, you have two options:

- You can ask Customer Service for a list of similar drugs that are covered by The Plan. When you receive the list, show it to your doctor and ask if switching to a covered medication is appropriate.
- You can ask your physician to send The Plan information requesting we make an exception and cover your drug.

If The Plan approves the request for an exception to the formulary, the approved drug will be covered at the Tier 3 cost share.

Excluded drugs

The Plan does not provide coverage for all drugs. In addition to the drugs marked “excluded” in this drug list, newly FDA approved drugs are not covered unless the Health First P&T Committee in its sole discretion approves these drugs for coverage. The Plan will automatically exclude a particular drug if a generic version becomes available and an entire class of drugs if a particular drug within that class becomes available over the counter.

The following are NOT covered by The Plan:

- Compounded drugs
- Cosmetics or any drugs used for cosmetic purposes
- Diabetic supplies, blood glucose monitors and test strips other than those manufactured by Abbott under the product name Freestyle, Precision, and test strips®
- Erectile dysfunction drugs (such as Viagra)
- Infertility drugs (such as Clomid)
- Some injectables (except insulin, Imitrex, and those requiring prior authorization)
- Most multivitamins and nutritional supplements (except prescription pre-natal vitamins and products covered under the Preventive Care benefit)
- Nonprescription supplies or substances
- Over-the-counter (OTC) medications (except products covered under the Preventive Care benefit), or any drug for which a similar over-the-counter version is available
- All new drugs approved by the FDA will be excluded from the preferred drug list/formulary unless the Health First P&T Committee, in its sole discretion, decides to waive this exclusion for a particular drug.
- Support garments
- Syringes, needles, or other disposable supplies (except those used with insulin).

Preventive Care Medications: \$0 Cost-share Medications and Products

The Affordable Care Act (ACA), commonly known as health care reform, was signed into federal law in 2010. The ACA requires private insurers to cover certain preventive services without any patient cost-sharing (i.e., copayments, coinsurance and deductible) when they are delivered by a network provider.

The Department of Health and Human Services (HHS) has recognized several recommending bodies (e.g., United States Preventive Services Task Force [USPSTF], Advisory Committee on Immunization Practices [ACIP], and Health Resources and Services Administration [HRSA]) who have identified several medication categories that fall within the preventive health mandate.

The following products, prescription medications and specific over-the-counter (OTC) medications (notated in Tier NCS throughout this formulary) are available to our members at no (\$0) cost-sharing when:

- Prescribed by a health care professional (all prescription **and** OTC medications will require a prescription)
- Age and/or gender appropriate

This list will be reviewed periodically and is subject to change.

Health First Health Plans and Insurance Formulary

The formulary provides coverage information about some of the drugs covered by The Plan. If you have trouble finding your drug in the list, turn to the Index that begins on page 102. The first column of the chart lists the drug name. Brand name drugs are capitalized (e.g., PRADAXA) and generic drugs are listed in lower-case italics (e.g., *lisinopril*).

The information in the Notes column tells you if The Plan has any special requirements for coverage of your drug.

Specialty Pharmacy (SP):

Must be obtained from Accredo Pharmacy and are limited to a 30-day supply. *For members who reside outside the state of Florida, an exception will be considered to allow the medication to be filled at another pharmacy. Please contact Customer Service Department to initiate this process.*

Prior Authorization (PA):

The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from The Plan before you fill your prescriptions. If you don't get approval, the drug will not be covered.

Quantity Limit (QL):

Quantity Limits may also be listed. For example, "30 EA per 30 days" would mean your coverage of this drug is limited to 30 pills every 30 days. Prescriptions written for more than the suggested Quantity Limits will only be honored up to the listed amount unless an exception is requested by your physician and approved by The Plan.

Step Therapy (ST):

In some cases, The Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B. A complete list of drugs which require Step Therapy is listed in the reference table on page 6.

Maintenance Drug (MD):

You may be taking these drugs on a long-term basis. Maintenance medications are generally those used to treat chronic conditions and long-term conditions. ****Some exceptions may apply (i.e. certain medications used for ADHD, asthma/COPD rescue, acute pain, and acute infections).**

No Cost-Share (NCS):

Select preventive products, prescription medications and specific over-the-counter (OTC) medications available to our members at no cost-sharing (\$0) when applicable conditions are met
