Excluded Drugs List Medications

Custom Premium Drug List – Closed Formulary

Your benefit plan does not cover all medications. Your benefit plan may exclude coverage for medications with one or more principal ingredients that are already available in greater/lesser strengths and/or combinations. Your plan may also exclude medications that only modify the dosage form (tablet, capsule, liquid, suspension, extended release, tamper resistant) for a medication that is already available in a common dosage form.

For each excluded medication, we have also provided examples of alternative options. Any alternatives are subject to normal plan requirements including utilization management and medical necessity.

Alternatives are also subject to member cost share requirements such as copayments or coinsurance. Some alternatives may not be covered due to other plan limitations (i.e., because the alternative is available over the counter). If you are currently taking, or have been prescribed, one of these non-covered medications, talk to your prescriber about whether one of the alternatives would work for you.

Be sure to review the *Pharmacy Benefit* section for benefit-specific exclusions and *What is Not Covered* in your benefit book for general exclusions and limitations that apply to all benefits.

To check coverage and copay information for a medication under your plan, visit azblue.com and log into MyBlue. If you do not have access to the website, call the Pharmacy Benefits number on the back of your member ID card.
