## **Medicare Part B Drug Prior Authorization**

Our job as your health plan is to make sure that you receive the right care at the right time and at the most affordable price. Providence Medicare Advantage Plans requires you (or your physician) to get approval for certain medical services, including administration of certain medications, before we will agree to cover the drug for you. This is called “prior authorization.” Sometimes the requirement for getting approval in advance helps guide appropriate use of certain drugs including specialty drugs injected or infused by your provider. If you do not get this approval, your drug might not be covered by the plan.

This document contains the Prior Authorization requirements for certain Part B eligible drugs.
