

## I. Requirements for Prior Authorization of Intranasal Rhinitis Agents

### A. Prescriptions That Require Prior Authorization

Prescriptions for Intranasal Rhinitis Agents that meet the following conditions must be prior authorized:

1. A non-preferred Intranasal Rhinitis Agent. See the Preferred Drug List (PDL) for the list of preferred Intranasal Rhinitis Agents at: <https://papdl.com/preferred-drug-list>.
2. An Intranasal Rhinitis Agent containing an antihistamine when there is a record of a recent paid claim for another Intranasal Rhinitis Agent containing an antihistamine (therapeutic duplication).
3. An Intranasal Rhinitis Agent containing a steroid when there is a record of a recent paid claim for another Intranasal Rhinitis Agent containing a steroid (therapeutic duplication).

EXEMPTION FROM PRIOR AUTHORIZATION: Triamcinolone acetonide nasal spray is exempt from prior authorization when prescribed for a child under four (4) years of age.

### B. Review of Documentation for Medical Necessity

In evaluating a request for prior authorization of a prescription for an Intranasal Rhinitis Agent, the determination of whether the requested prescription is medically necessary will take into account whether the beneficiary:

1. For a non-preferred Intranasal Rhinitis Agent, has a history of therapeutic failure, contraindication, or intolerance of the preferred Intranasal Rhinitis Agents with the same mechanism of action; **AND**
2. For therapeutic duplication, **one** of the following:
  - a. Is being titrated to or tapered from another Intranasal Rhinitis Agent containing an agent with the same mechanism of action
  - b. Has a medical reason for concomitant use of the requested medications that is supported by peer-reviewed literature or national treatment guidelines;

NOTE: If the beneficiary does not meet the clinical review guidelines above but, in the professional judgement of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary, the request for prior authorization will be approved.

### C. Clinical Review Process

Prior authorization personnel will review the request for prior authorization and apply the clinical guidelines in Section B. above to assess the medical necessity of a prescription for an Intranasal Rhinitis Agent. If the guidelines in Section B. are met, the reviewer will prior authorize the prescription. If the guidelines are not met, the prior authorization request will be referred to a physician reviewer for a medical necessity determination. Such a request for prior authorization will be approved when, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary.

### NON-PREFERRED MEDICATION PRIOR AUTHORIZATION FORM *(form effective 01/01/20)*
