Prior Authorization Criteria

<u>Tepezza (teprotumumab-trbw)</u>

All requests for Tepezza (teprotumumab-trbw) require a prior authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

For all requests for Tepezza (teprotumumab-trbw) all of the following criteria must be met:

- The requested dose and frequency is in accordance with FDA-approved labeling, nationally recognized compendia, and/or evidence-based practice guidelines
- Is age-appropriate according to FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature
- Must be prescribed by or in consultation with a specialist in ophthalmology or endocrinology

Coverage may be provided with a <u>diagnosis</u> of Thyroid Eye Disease (TED) and the following criteria is met:

- Must be euthyroid or have thyroxine and free triiodothyronine levels less than 50% above or below normal limits or the member has been initiated on antithyroid medication.
- **Duration of Approval:** Eight Infusions

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.

When criteria are not met, the request will be forwarded to a Medical Director for review. The physician reviewer must override criteria when, in their professional judgment, the requested medication is medically necessary.
