I. Requirements for Prior Authorization of H. Pylori Treatments

A. Prescriptions That Require Prior Authorization

All prescriptions for a non-preferred H. Pylori Treatment must be prior authorized.

See the Preferred Drug List (PDL) for the list of preferred H. Pylori Treatments at: https://papdl.com/preferred-drug-list.

B. Review of Documentation for Medical Necessity

In evaluating a request for prior authorization of a prescription for a non-preferred H. Pylori Treatment, the determination of whether the requested prescription is medically necessary will take into account whether:

1. The H. pylori treatment regimens recommended by the American College of Gastroenterology, taken as the individual components and in the same combination, dose, and frequency, cannot be used by the beneficiary because of clinical reasons as documented by the prescriber.

   NOTE: If the beneficiary does not meet the clinical review guidelines listed above but, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary, the request for prior authorization will be approved.

C. Clinical Review Process

Prior authorization personnel will review the request for prior authorization and apply the clinical guidelines in Section B. above to assess the medical necessity of a prescription for an H. Pylori Treatment. If the guidelines in Section B. are met, the reviewer will prior authorize the prescription. If the guidelines are not met, the prior authorization request will be referred to a physician reviewer for a medical necessity determination. Such a request for prior authorization will be approved when, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary.
