Request for Prior Authorization for Compounds
Website Form – www.highmarkhealthoptions.com
Submit request via: Fax - 1-855-476-4158

All requests for Compounds require a Prior Authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

Prior Authorization Criteria:

For all requests for Compounds all of the following criteria must be met:

- Documentation by the prescribing physician must include:
  - The indication the medication is being requested to treat
  - Any comparable commercially available preparations of the active ingredient or that contain similar active ingredients that the member has tried and/or failed and why they cannot take these medications
  - The clinical rationale for using a compounded medication versus an FDA approved product
  - Any published or clinical evidence that this compounded prescription is clinically superior to FDA approved existing therapies
- The physician or the pharmacy must document all ingredients that will be used to compound the prescription
- The requested compound must be included as a covered outpatient medication as defined by CMS
- Each of the active ingredients in the compound must be used for an indication that is FDA approved or compendia supported
- Must meet at least 1 of the following:
  - There is a current supply shortage of the commercial product
  - The patient has a medical need for a dosage form or strength that is not commercially available
  - The patient had a trial and intolerance or contraindication to the commercially available product
  - The commercially available product has been discontinued by the manufacturer for reasons other than lack of safety or effectiveness
- If there are FDA-approved therapies or other standard therapies for the medical condition being treated, such therapies must have been tried and failed or been contraindicated for the patient. (Medication usage must be documented in patient's medical records)
- Prior authorization criteria will apply to all compounded products that exceed a cost threshold of one hundred and fifty dollars ($150) per claim
- **Initial Duration of Approval:** 6 months
- **Reauthorization criteria**
  - Requires documentation demonstrating improvement in condition and tolerance to therapy
  - If previously approved due to shortage or discontinuation of the commercial product, a commercial product must still be unattainable at time of reauthorization

- **Reauthorization Duration of Approval:** 6 months. Reauthorization is for 12 months if the compounded medication is for a chronic condition necessary for the life of the patient and one of the following:
    - The patient has a medical need for a dosage form or strength that is not commercially available
    - The patient had a trial and intolerance or contraindication to the commercially available product

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.
