Prior Authorization Criteria

**Rituxan (Rituximab) and rituximab biosimilars**

All requests for Rituxan (rituximab) and rituximab biosimilars require a prior authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

Rituxan and rituximab biosimilars include Rituxan (rituximab), Truxima (rituximab-abbs), and Ruxience (rituximab-pvvr). New products with this classification will require the same documentation.

For all requests for Rituxan and rituximab biosimilars all of the following criteria must be met:

- Medication must be prescribed by or in association with a Hematologist, Oncologist, Immunologist, Ophthalmologist, Neurologist, Dermatologist, or Rheumatologist
- Member should not have active HBV liver disease.
- The requested dose and frequency is in accordance with FDA-approved labeling, nationally recognized compendia, and/or evidence-based practice guidelines

For oncology indications (not otherwise listed below), refer to the Oncology Agents, IV/Injectable policy.

Coverage may be provided with a **diagnosis** of Granulomatosis with Polyangiitis (GPA or Wegener’s Granulomatosis) and Microscopic Polyangiitis (MPA) and the following criteria is met:

- Member is age 2 years or older.
- Must be used in combination with glucocorticoids.
- Member must have a history of trial and failure, contraindication, or intolerance to oral cyclophosphamide for at least 3 months.
- **Initial Duration of Approval**: 1 month
- **Reauthorization Criteria**: If 6 months or greater have elapsed since the first dose of the previous rituximab product regimen and there is documented, significant improvement with prior courses of treatment.
- **Reauthorization Duration of approval**: 1 month

Coverage may be provided with a **diagnosis** of Rheumatoid Arthritis and the following criteria is met:

- The member is age 18 years or older
- Member must have a history of trial and failure, contraindication, or intolerance of at least 3 months of treatment with methotrexate or another DMARD.
- Member must have a history of trial and failure, contraindication, or intolerance of at least 3 months of treatment with a tumor necrosis factor (TNF) inhibitor.
- Medication will be used in combination with Methotrexate (if not contraindicated or member does not have intolerance to methotrexate).
- **Initial Duration of Approval**: 6 months
- **Reauthorization Criteria**:
  - There must be documented, significant improvement with prior courses of treatment.
- **Reauthorization Duration of approval**: 6 months
Coverage may be provided with a diagnosis of Pemphigus Vulgaris and the following criteria is met:

- The member is age 18 years or older
- Member must have mucosal involvement and diagnosis confirmed by ONE of the following:
  - Lesional skin or mucosal biopsy for routine hematoxylin and eosin (H&E) staining.
  - A perilesional skin or mucosal biopsy for direct immunofluorescence (DIF)
  - Serum collection for enzyme-linked immunosorbent assay (ELISA) and indirect immunofluorescence (DIF)
- Member must have a history of trial and failure, contraindication, or intolerance with corticosteroids, and ONE of the following:
  - Azathioprine.
  - Mycophenolate Mofetil
  - Cyclophosphamide

- **Initial Duration of Approval:** 1 month
- **Reauthorization Criteria**
  - There must be documented, significant improvement with prior course of treatment.
  - A time period of 6 months has passed since previous treatment.
- **Reauthorization Duration of Approval:** 1 month

Coverage may be provided with a diagnosis of Neuromyelitis Optica (NMO) and the following criteria is met:

- The member is age 18 years or older.
- Member must have a history of trial and failure, contraindication, or intolerance with ONE of the following immunosuppressive agents for at least 1 month:
  - Azathioprine.
  - Mycophenolate Mofetil
- **Initial Duration of Approval:** 1 month
- **Reauthorization Criteria:**
  - There must be documented, significant improvement with prior courses of treatment.
- **Reauthorization Duration of Approval:** 6 months

Coverage may be provided with a diagnosis of Relapsing forms of Multiple Sclerosis (relapsing-remitting, secondary-progressive, or progressive-relapsing multiple sclerosis) and the following criteria is met:

- The member is age 18 years or older
- Member must have a medical history of one of the following:
  - One clinical relapse documented (e.g. functional disability, hospitalization, acute steroid therapy, etc.) during the prior year
  - Two relapses within the prior two years
  - A single clinical demyelinating event and 2 or more brain lesions characteristic of MS
- If coverage is provided for situations in which there is functional status that can be preserved, ONE of the following must be met:
  - Member must still be able to walk at least a few steps
  - Member must have some functional arm/hand use consistent with performing activities of daily living
- Must provide documentation showing the member has tried and failed another MS treatment for at least 90 days
• **Initial Duration of Approval:** 6 months
• **Reauthorization criteria**
  o Documentation of clinical response defined as:
    ▪ Member continues to receive benefit from treatment by having the ability to walk at least a few steps or alternatively have some functional arm/hand use consistent with performing activities of daily living.
    ▪ Member did not experience 1 or more relapses
    ▪ Member does not have 2 or more unequivocally new MRI-detected lesions
• **Reauthorization Duration of approval:** 12 months

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.

When criteria are not met, the request will be forwarded to a Medical Director for review. The physician reviewer must override criteria when, in their professional judgment, the requested medication is medically necessary.
**RITUXAN (RITUXIMAB) AND RITUXIMAB BIOSIMILARS PRIOR AUTHORIZATION FORM**

Please complete and fax all requested information below including any progress notes, laboratory test results, or chart documentation as applicable to Gateway Health Pharmacy Services. **FAX:** (888) 245-2049

If needed, you may call to speak to a Pharmacy Services Representative. **PHONE:** (800) 392-1147 Monday through Friday 8:30am to 5:00pm

### MEDICAL HISTORY (Complete for ALL requests)

- Does the member have active HBV liver disease? [ ] Yes [ ] No

- Which of the following diagnoses will the medication be used for?
  - [ ] Granulomatosis with Polyangiitis (GPA or Wegener’s Granulomatosis) and Microscopic Polyangiitis (MPA). If selected, please answer the following question:
    - a. Will the medication be used in combination with glucocorticoids? [ ] Yes [ ] No
    - b. Does the member have a history of trial and failure, contraindication, or intolerance to oral cyclophosphamide for at least 3 months? [ ] Yes [ ] No

  - [ ] Rheumatoid Arthritis. If selected, please answer the following question:
    - a. Does the member have a history of trial and failure, contraindication, or intolerance to the following for at least 3 months?
      - Methotrexate or another DMARD? [ ] Yes [ ] No
      - TNF Inhibitor? [ ] Yes [ ] No
    - b. Will the medication be used in combination with methotrexate unless contraindicated or member does not have an intolerance to methotrexate? [ ] Yes [ ] No

  - [ ] Neuromyelitis Optica. If selected, please answer the following question:
    - Does the member have a history of trial and failure, contraindication, or intolerance to the following for at least 1 month:
      - [ ] Azathioprine [ ] Yes [ ] No
      - [ ] Mycophenolate Mofetil [ ] Yes [ ] No
Pemphigus Vulgaris. If selected, please answer the following question:
- Does the member must have mucosal involvement and diagnosis confirmed by ONE of the following:
  - Lesional skin or mucosal biopsy for routine hematoxylin and eosin (H&E) staining
  - A perilesional skin or mucosal biopsy for direct immunofluorescence (DIF)
  - Serum collection for enzyme-linked immunosorbent assay (ELISA) and indirect immunofluorescence (DIF)
- Does the member have a history of trial and failure, contraindication, or intolerance with corticosteroids, and ONE of the following:
  - Azathioprine
  - Mycophenolate Mofetil
  - Cyclophosphamide

Relapsing form of Multiple Sclerosis. If selected, please answer the following question:
- Does the member have a medical history of ONE of the following:
  - One clinical relapse documented (e.g. functional disability, hospitalization, acute steroid therapy, etc.) during the prior year
  - Two relapses within the prior two years
  - A single clinical demyelinating event and 2 or more brain lesions characteristic of MS
- If member is using for situations in which functional status can be preserved, does any of the following apply:
  - Member is able to walk at least a few steps
  - Member has some functional arm/hand uses consistent with performing activities of daily living
  - This situation does not apply to member

REAUTHORIZATION
Which of the following diagnoses has the medication been used for?
- Granulomatosis with Polyangiitis (GPA or Wegener’s Granulomatosis) and Microscopic Polyangiitis (MPA). If selected, please answer the following question:
  - Is there documented, significant improvement with prior courses of treatment?
  - Has 6 months or more elapsed since the first dose of the previous rituximab regimen?
- Rheumatoid Arthritis. If selected, please answer the following question:
  - Is there documented, significant improvement with prior courses of treatment?
- Pemphigus Vulgaris. If selected, please answer the following question:
  - Is there documented, significant improvement with prior courses of treatment?
  - Has 6 months or more elapsed since the first dose of the previous rituximab regimen?
- Neuromyelitis Optica. If selected, please answer the following question:
  - Is there documented, significant improvement with prior courses of treatment?
☑ Relapsing forms of Multiple Sclerosis
   a. Is there documented, significant improvement with prior courses defined by the following?
      i. Member continues to receive benefit from treatment by having the ability to walk at least a few steps or alternatively have some functional arm/hand use consistent with performing activities of daily living.
         ☐ Yes   ☐ No
      ii. Member did not experience 1 or more relapses  ☐ Yes   ☐ No
      iii. Member does not have 2 or more unequivocally new MRI-detected lesions  ☐ Yes   ☐ No
