

HEALTH OPTIONS DMMA Ag Request for Prior Authorization for Remicade (infliximab) Website Form – <u>www.highmark.healthoptions.com</u> Submit request via: Fax - 1-855-476-4158

All requests for Remicade (infliximab) require a Prior Authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

Remicade (infliximab) Prior Authorization Criteria:

For all requests for Remicade (infliximab) all of the following criteria must be met:

- Must be prescribed by or in consultation with a Rheumatologist, Gastroenterologist, or Dermatologist.
- Must have a therapeutic failure, contraindication, or intolerance to the biosimilar agent(s) approved or medically accepted for the member's diagnosis
- The requested dose and frequency is in accordance with FDA-approved labeling, nationally recognized compendia, and/or evidence-based practice guidelines.

Coverage may be provided with a <u>diagnosis</u> of **Rheumatoid Arthritis** and the following criteria is met:

- Member is 18 years of age or older.
- Member must have a history of trial and failure, contraindication, or intolerance to a three-month trial with methotrexate, or another DMARD.
- Initial Duration of Approval:
 - o 6 months

• Reauthorization Criteria

• Reauthorization benefit will be approved if there is evidence of positive clinical response and/or stabilization involving the following clinical/laboratory parameters: Number of swollen joints, number of tender joints, patient's assessment of pain, member's global assessment of disease activity, HAQ score, and/or CRP (C-Reactive Protein).

• Reauthorization Duration of Approval: 12 months

Coverage may be provided with a <u>diagnosis</u> of **Psoriatic Arthritis** and the following criteria is met:

- Member is 18 years of age or older.
- Member has moderately to severely active psoriatic arthritis indicated by the presence of at least ONE of the following:
 - o Erosive Disease
 - o Elevated Markers of inflammation attributable to psoriatic arthritis
 - o Long-term damage that interferes with function (i.e., joint deformities)
 - o Highly active disease that causes a major impairment in quality of life
 - o Active PsA at many sites including dactylitis, enthesitis
 - Function-limiting PsA at a few sites
 - Rapidly progressive disease.

HEALTH OPTIONS

• Member must have a history of trial and failure, contraindication, or intolerance to a fourweek trial each of at least 2 NSAIDs

Updated: 01/2021

DMMA Approved: 01/2021

- Initial Duration of Approval:
 - o 6 months
- Reauthorization Criteria
 - Reauthorization benefit will be approved if there is evidence of positive clinical response and/or stabilization involving the following clinical/laboratory parameters: Number of swollen joints, number of tender joints, patient's assessment of pain, member's global assessment of disease activity, HAQ score, and/or CRP (C-Reactive Protein).
 - Reauthorization Duration of Approval: 12 months

Coverage may be provided with a <u>diagnosis</u> of **Crohn's Disease** and the following criteria is met:

- Member must be 6 years of age or older.
- Member must have a history of trial and failure, contraindication, or intolerance to conventional treatments including two or more of the following for at least 3 months of each medication:
 - o Aminosalicylates, 5-ASAs (*i.e.*, Sulfasalazine, Pentasa[®], Asacol[®], Colazal[®])
 - o Antibiotics (*i.e.*, Metronidazole, Ciprofloxacin)
 - Steroids (*i.e.*, prednisone, Entocort[®])
 - o Immunomodulators (i.e., Azathioprine, 6-Mercaptopurine, Methotrexate)
- Initial Duration of Approval: 6 months
- Reauthorization criteria:
 - Reauthorization benefit will be approved if there is documented, significant improvement with prior courses of treatment.
 - Reauthorization Duration of Approval: 12 months

Coverage may be provided with a <u>diagnosis</u> of **Fistulizing Crohn's Disease** and the following criteria is met:

- Member must be 6 years of age or older.
- Member must have clinical documentation of Crohn's disease with actively draining fistulas.
- Member must have a history of trial and failure, contraindication, or intolerance to conventional treatments including all of the following for at least 3 months of each medication:
 - Antibiotics (*i.e.*, Metronidazole, Ciprofloxacin)
 - Immunomodulators (*i.e.*, Azathioprine, 6-Mercaptopurine, Methotrexate)
- Initial Duration of Approval: 6 months
- Reauthorization Criteria:
 - Reauthorization benefit will be approved if there is documented, significant improvement with prior courses of treatment.
 - Reauthorization Duration of Approval: 12 months

HEALTH OPTIONS DMMA Approved: 01/20 Coverage may be provided with a <u>diagnosis</u> of **Ulcerative Colitis** and the following criteria is met:

- Member must meet the following age requirements:
 - Member must be 6 years of age or older to utilize Remicade, Renflexis, Avsola, or Inflectra.
 - o Member must be 18 years of age or older to utilize Ixifi.
- Member must have a history of trial and failure, contraindication, or intolerance to conventional treatments including all of the following for at least 3 months:
 - Aminosalicylates, 5-ASAs (*i.e.*, Sulfasalazine, Pentasa[®], Asacol[®], Colazal[®])
 - Steroids (*i.e.*, prednisone, Entocort[®])
 - Immunomodulators (*i.e.*, Azathioprine, 6-Mercaptopurine, Methotrexate)
- Initial Duration of Approval: 6 months
- Reauthorization Criteria:
 - Reauthorization benefit will be approved if there is documented, significant improvement with prior courses of treatment.
- Reauthorization Duration of Approval: 12 months

Coverage may be provided with a <u>diagnosis</u> of **Ankylosing Spondylitis and axial spondyloarthritis** and the following criteria is met:

- Member must be 18 years of age or older
- Member must have a history of trial and failure, contraindication, or intolerance to a fourweek trial each of at least 2 NSAIDs.
- Initial Duration of Approval: 6 months
- Reauthorization Criteria:
 - Reauthorization benefit will be approved if there is evidence of positive clinical response and/or stabilization involving the following clinical/laboratory parameters: Patient global assessment, back pain, BASFI (Bath Ankylosing Spondylitis Functional Index, CRP, Modified Schober's test, chest expansion, occiput-to-wall measurement.
- **Reauthorization Duration of Approval**: 12 months

Coverage may be provided with a <u>diagnosis</u> of **Plaque Psoriasis** and the following criteria is met:

- Member must be 18 years of age or older
- Member must have clinical documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 10% body surface involved or disease affecting crucial body areas such as hands, feet, face, or genitals.
- Members must have therapeutic failure of a three-month trial or a contraindication to at least BOTH of the following:
 - Psoralens with UVA light (PUVA) or UVB light
 - Systemic treatments including ONE of the following:
 - Immunomodulators (i.e. Methotrexate, Cyclosporine)
 - Retinoids (i.e. Soriatane)

- Initial Duration of Approval: 6 months
- Reauthorization Criteria:
 - Clinical documentation that supports a decrease in percent of body surface area involvement when compared to baseline must be submitted
- **Reauthorization Duration of Approval**: 12 months

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.

Drugs are authorized in generic form unless the branded product is on the preferred drug list or the prescriber has indicated in writing that the branded product is medically necessary. If only the branded product is on the preferred drug list, the generic form will be considered non-preferred and shall not require the prescriber to indicate in writing that the branded product is medically necessary.
