**Request for Prior Authorization for Krystexxa (pegloticase)**
**Website Form – www.highmarkhealthoptions.com**
**Submit request via: Fax - 1-855-476-4158**

All requests for Krystexxa (pegloticase) require a Prior Authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

**Krystexxa (pegloticase) Prior Authorization Criteria:**

- The member must be 18 years of age or older
- The medication must be prescribed by or in consultation with a rheumatologist
- Documentation the member will be using the medication in combination with methotrexate unless methotrexate is contraindicated or not clinically appropriate
- An attestation from the prescriber that the member has discontinued all oral urate-lowering medications prior to starting Krystexxa and will not restart therapy with an oral urate-lowering agent while on Krystexxa
- There must be documentation of a recent (within 1 month) serum uric acid level ≥ 6 mg/dL
- The member must have tried and failed or had an intolerance or contraindication to 3 months of therapy with allopurinol
    - Failure is considered both of the following:
        - the inability to normalize uric acid to less than 6mg/dL
        - frequent gout flares (≥2 flares/year) and/or nonresolving subcutaneous tophi
- The member must have tried and failed or had an intolerance or contraindication to 3 months of therapy with at least one of the following:
    - allopurinol in combination with an uricosuric agent (i.e. probenecid.)
    - another xanthine oxidase inhibitor (XOI) (i.e. febuxostat ( non-preferred XOIs require prior authorization))
    - Failure is considered both of the following:
        - the inability to normalize uric acid to less than 6mg/dL
        - frequent gout flares (≥2 flares/year) and/or nonresolving subcutaneous tophi
- The requested dose and frequency is in accordance with FDA-approved labeling, nationally recognized compendia, and/or evidence-based practice guidelines

- **Initial Duration of Approval:** 6 months

- **Reauthorization criteria:**
    - The member must have documentation from the prescriber indicating improvement or stabilization in condition

- Documentation of two recent consecutive (within the last 12 months) serum uric acid levels.
  - Rationale from the prescriber for why treatment must be continued if serum uric acid levels increase to above 6 mg/dL, particularly when 2 consecutive levels above 6 mg/dL are observed.

- **Reauthorization Duration of Approval:** 12 months

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.
