

Prialt (ziconotide)

Override(s)	Approval Duration
Prior Authorization	1 year

Medications
Prialt (ziconotide)

APPROVAL CRITERIA

Requests for Prialt (ziconotide) may be approved if the following criteria are met:

- I. Individuals has a diagnosis of severe chronic pain; **AND**
- II. Intrathecal therapy for chronic pain is warranted; **AND**
- III. Individual is intolerant of or refractory to other treatment, including systemic analgesics, adjunctive therapies or intrathecal morphine.

Requests for Prialt (ziconotide) may not be approved for the following:

- I. All other indications not included above; **OR**
- II. Individual is using to treat other pain types all other uses, including but not limited to post-operative pain, acute brain injury, and spasticity associated with spinal cord trauma; **OR**
- III. Individual has a pre-existing history of psychosis; **OR**
- IV. Individual has a contraindication to intrathecal administration of medications, including presence of infection at the microinfusion injection site, uncontrolled bleeding diathesis, and spinal canal obstruction that impairs circulation of cerebrospinal fluid (CSF).

Note:

Prialt (ziconotide) has a black box warning regarding the potential of neuropsychiatric adverse events. Prialt is contraindicated in those with a preexisting history of psychosis. Individuals should be monitored for evidence of cognitive impairment, hallucinations, or changes in mood or consciousness. Prialt should be discontinued in the event of serious neurological or psychiatric signs or symptoms.
