

I. Requirements for Prior Authorization of Pancreatic Enzymes

A. <u>Prescriptions That Require Prior Authorization</u>

Prescriptions for a non-preferred Pancreatic Enzyme must be prior authorized.

See the Preferred Drug List (PDL) for the list of preferred Pancreatic Enzymes at: https://papdl.com/preferred-drug-list.

B. Review of Documentation for Medical Necessity

In evaluating a request for prior authorization of a prescription for a non-preferred Pancreatic Enzyme, the determination of whether the requested prescription is medically necessary will take into account whether the beneficiary:

1. Has **one** of the following:

- a. A documented history of therapeutic failure, contraindication, or intolerance of the preferred Pancreatic Enzymes
- b. A current history (within the past 90 days) of being prescribed the same non-preferred Pancreatic Enzyme.

NOTE: If the beneficiary does not meet the clinical review guidelines listed above but, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary, the request for prior authorization will be approved.

C. Clinical Review Process

Prior authorization personnel will review the request for prior authorization and apply the clinical guidelines in Section B. above to assess the medical necessity of a prescription for a non-preferred Pancreatic Enzyme. If the guidelines in Section B. are met, the reviewer will prior authorize the prescription. If the guidelines are not met, the prior authorization request will be referred to a physician reviewer for a medical necessity determination. Such a request for prior authorization will be approved when, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary.
