## **Prior Authorization Criteria**

## Non-Formulary Medications and Medications Requiring Medical Necessity Review

All requests for Non-Formulary Medications and Medications Requiring Medical Necessity Review. require a prior authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

For all requests for non-formulary medications and medications that require medical necessity review all of the following criteria must be met:

- The requested medication has a diagnosis that is:
  - an FDA-approved indication or
  - a medically accepted indication that is supported by nationally recognized compendia
- The medication is aligned with pertinent clinical treatment modalities based on current national treatment guidelines or peer reviewed literature.
- If an FDA-approved companion diagnostic test for the requested agent exists, documentation that the test was performed to confirm the diagnosis
- If a test with adequate ability is necessary to confirm a disease mutation exists, documentation that the test was performed to confirm the diagnosis
- The requested medication is being prescribed by or in consultation with an appropriate specialist (when applicable (i.e. a formulary product from the same class requires a specialist in its specific prior authorization criteria)).
- Documentation of all pertinent clinical information related to the request from available sources (i.e., Primary Care Physician, Facility Utilization Review Department, Medical Record Department) including but not limited to:
  - Age
  - Contraindications or intolerances member had to previous therapies
  - Treatment history
  - Past medications
  - Diagnosis/co-morbidities
  - Medical history
  - Current medications
  - Previous test results
  - Current laboratory results
  - Physical exam findings
  - Any other data or rationale to support the medical necessity of the request
- The request cannot be for an experimental, cosmetic, or investigational treatment
- The dose and frequency of the requested medication is appropriate based upon the FDA-approved package insert, nationally recognized compendia or peer-reviewed medical literature.
- Formulary alternative(s) were adequately tried and failed. Documentation must be provided to support the following:
  - Whether or not the member was recently hospitalized and if so, whether or not the requested medication was initiated during this hospital stay. (While

Wholecare.

hospitalization will not guarantee approval of the medication, it will be factored in to the medical necessity review.)

- Medication name(s) and dose(s)of the formulary alternative(s) tried
- Dates of trial of the formulary alternative(s)

lt's

- Documentation of reason for failure /discontinuation of formulary alternative(s)
  - If the discontinuation of formulary alternative(s) was due to side effect(s), documentation of the nature of the side effect(s)
  - If inadequate response to a formulary alternative(s) is noted, documentation that shows whether or not the dose was increased in an attempt to achieve a greater level of efficacy
- The member has tried the possible formulary alternatives for their diagnosis(es) OR reasonable rationale has been provided to indicate why other formulary alternatives cannot be tried.
- The medication does not interact with other medications, which may result in a serious or life threatening adverse reaction.
- The member does not have a contraindication to the requested medication
- **Initial Duration of Approval:** Up to 12 months dependent upon clinical discretion with consideration given to if the requested medication is classified as a maintenance drug.
- Reauthorization criteria:
  - Documentation from the provider the member had a positive clinical response and is able to tolerate therapy.
- **Reauthorization Duration of Approval:** Benefit is approved for the requested duration or up to 12 months dependent on clinical discretion.

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.

When criteria are not met, the request will be forwarded to a Medical Director for review. The physician reviewer must override criteria when, in their professional judgment, the requested medication is medically necessary.
