Prior Authorization Criteria

Latuda (lurasidone) Step

All requests for Latuda (lurasidone) require a step therapy prior authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

Grandfather provision: Prior authorization criteria will apply to new starts only.

Members with historical pharmacy claims data meeting the following criteria will receive automatic authorization at the pharmacy point of service without the requirement for documentation of additional information. If pharmacy claims data cannot obtain the criteria below, documentation will be required to indicate the member meets the criteria. Claims will automatically adjudicate on-line, without a requirement to submit for prior authorization when the following criteria is met:

Latuda (lurasidone) Step Therapy Prior Authorization Criteria:

- The member has tried and failed or had an intolerance to a generic formulary oral atypical antipsychotic.
- When all criteria is met, benefit is approved for 12 months

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.

When criteria are not met, the request will be forwarded to a Medical Director for review. The physician reviewer must override criteria when, in their professional judgment, the requested medication is medically necessary.
