

Prior Authorization Criteria
Brineura (cerliponase alfa)

All requests for Brineura (cerliponase alfa) require a prior authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

Coverage may be provided with a diagnosis of late infantile neuronal ceroid lipofuscinosis type 2 (CLN2) and the following criteria is met:

- Must be prescribed by, or in consultation with a neurologist or physician that specializes in the treatment of NCL diseases
- Confirmation of late infantile neuronal ceroid lipofuscinosis type 2 by one of the following:
 - laboratory testing demonstrating deficient TPP1 enzyme activity
 - molecular analysis that has detected two pathogenic variants/mutations in the TPP1/CLN2 gene
- Member is at least 3 years of age or older
- Documentation of a baseline evaluation, including an assessment of motor (ambulatory) function (see Attachment I for CLN2 Disease Clinical Rating Scale used in clinical trials)
- The requested dose and frequency is in accordance with FDA-approved labeling, nationally recognized compendia, and/or evidence-based practice
- **Initial Duration of Approval:** 12 months
- **Reauthorization** requires documentation of the following:
 - Documentation the member is tolerating and receiving a clinical benefit from Brineura treatment based on the prescriber's clinical judgement (e.g., slowed loss of ambulation, motor skills maintained, etc.)
 - Member is being monitored for infection and cardiovascular adverse reactions (e.g., vital signs [blood pressure, heart rate] prior to, during, and post-infusion; ECG monitoring)
- **Reauthorization Duration of Approval:** 12 months

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.

When criteria are not met, the request will be forwarded to a Medical Director for review. The physician reviewer must override criteria when, in their professional judgment, the requested medication is medically necessary.

MEDICAL HISTORY (Complete for ALL requests)

Diagnosis: Late Infantile Neuronal Ceroid Lipofuscinosis type 2 (CLN2) **ICD-10 code:** _____
 Other: _____ **ICD-10 code:** _____

How was the diagnosis confirmed (please submit chart documentation)?

- The member is deficient in TPP1 enzyme activity
 The member has two pathogenic variants/mutations in the TPP1/CLN2 gene

Please provide the following Hamburg CLN2 Disease Clinical Rating Scale scores for the member:

total combined baseline score: _____
baseline motor domain score: _____
baseline language domain score: _____

Does the member have ambulatory function that can be preserved? Yes No

Will this medication be used to slow the loss of ambulation? Yes No

CURRENT or PREVIOUS THERAPY

Medication Name	Strength/ Frequency	Dates of Therapy	Status (Discontinued & Why/Current)

REAUTHORIZATION

Has the member experienced a significant improvement with treatment? Yes No
Please provide documentation.

Is the member is being monitored for infection and cardiovascular adverse reactions (e.g., vital signs [blood pressure, heart rate] prior to, during, and post-infusion; ECG monitoring)? Yes No
