

## An Introduction to Independent Health's 2019 MediSource and Child Health Plus Formulary

**The following information applies to Independent Health's New York State Sponsored Plans, Child Health Plus and MediSource (Medicaid). Check your summary of benefits to ensure this formulary is associated with your plan prior to using your prescription drug benefit.**

This drug formulary lists covered generic and brand-name drugs covered under our Managed Medicaid Plans, MediSource and Child Health Plus. Independent Health makes every attempt to provide you with as accurate a listing of medications as possible. However the list of drugs and availability of generic medications can change frequently. When a generic medication becomes available for a formulary brand-name medication, the generic medication will be covered and the brand-name medication will become non-formulary and will require prior authorization to be covered. Please discuss any questions you may have about the formulary with your provider.

### **Prior-Authorization**

Independent Health requires you to get prior authorization for certain medications. To obtain coverage for a medication requiring prior authorization, a prior authorization request for medical exception must be submitted by your health care provider and approved by Independent Health's Medical Director. Medications that require Prior Authorization are listed with a "PA" in the formulary.

### **Step Therapy**

In some cases, Independent Health requires you to first try certain medications to treat your medical condition before we cover another medication for that condition. Step therapy is a way to help you get the best quality and value from your prescription medication benefit. This usually means that an equally effective generic medication is prescribed before a more expensive brand-name medication. Step therapy may also ensure that two

medications are used together if they are more effective. Medications that require Step Therapy are listed with a "ST" in the formulary.

### **Quantity Limitations**

Quantity limitations may apply to certain medications. Some medications are covered up to a specific quantity per 30 days. Some examples of medications with a quantity limitation are: sumatriptan (generic Imitrex®) and zolpidem tartrate (generic Ambien®). Medications with quantity limitations are listed with a "QL" in the formulary.

For items that come pre-packaged (for example: tube/container, inhaler device, single dose units, or liquid container), one package size is allowed per fill of these items. If a quantity limit is designated on the formulary, this restriction will take precedence over the pre-packaged limitations, when applicable.

### **Age Restriction**

Some prescription medications are restricted by age due to safety reasons or Food and Drug Administration (FDA) recommended labeling. Medications with an Age Limit are listed with an "AL" in the formulary.

### **Dental Formulary**

Drugs covered on our Dental Formulary are available when prescribed by a dental provider. Drugs included in our Dental Formulary are listed with a "DF" on the formulary. Drugs without a "DF" will not be covered when written by a Dental Provider.

### **Limited Distribution Drugs**

Some specialty medications can only be obtained through designated specialty pharmacies due to limited distribution placed on the medication by the manufacturer. These medications are listed with a "LDD" on the formulary.

### **Maximum Daily Dose (MDD)**

Certain medications are dose limited by a maximum daily dose (MDD) as recommended by the Food and Drug Administration (FDA) for safety reasons. Limits may be set by the number of tablets/capsules per day or the total daily dose.

### **Over-the-Counter (OTC) Medications**

Certain medications listed in the formulary are available over the counter. A prescription is required for coverage of the OTC products.

### **Sedative/Hypnotic Medications**

Sedative/hypnotic medications are limited for all prescribers except sleep specialists to 14 tablets/capsules per month with a maximum of 3 fills per year (3 fills/365 days).

### **Compounded Prescription Medications**

Compounded prescriptions (medications that are not commercially manufactured) must be prepared by a participating pharmacy and contain at least one prescription component. The dispensing pharmacy is required to submit for prior approval and when covered, will take the applicable copayment. Coverage is provided in accordance with our Compounding Medication Products Policy. Bulk products and powders are excluded from coverage because they are not prescription medication products that are approved under sections 505, 505(j) or 507 of the Federal Food Drug and Cosmetic Act.

### **Diabetic Supplies/Medications**

Products listed in this section are a covered benefit based on your plan. Products not listed require prior authorization. Copayments vary by plan.

BD needles and syringes are our preferred needle/syringe products.

OneTouch glucose meters, lancets, test strips, and supplies are our preferred diabetic supplies and do not require prior authorization.

OneTouch will provide a glucose meter to you with no copayment. Quantities are limited to one meter per member. You can obtain a meter by calling

LifeScan, Inc. at 1-888-377-5227, offer code 289IHA001. Please have your ID number available when you call.

Diabetic test strips are limited to a maximum of 100 per fill/30 days.

### **Affordable Care Act (ACA)**

#### **Preventive Services**

Medications listed on the formulary that are covered as preventive services under the Affordable Care Act may be covered. Certain restrictions may apply.

#### **Lost/Stolen/Damaged Medications and Vacation Supplies**

Replacement of any lost, stolen or damaged medications is the responsibility of the member. Vacation supplies are not covered under this benefit. Prior authorization cannot be used to obtain early refills for lost, stolen, or damaged medications; or for extended supplies or vacation supplies.

#### **Emergency Room Prescriptions**

Emergency Room prescriptions are limited to a 10-day supply.

#### **Enteral and Parenteral**

##### **Nutritional Formulas**

Enteral Nutritional Formula and Parenteral Nutritional Formula benefit coverage is based on medical necessity and prior authorization is required. Supplies that are necessary to administer the specific type of feeding, and maintain the feeding site are covered. This includes, but is not limited to: syringes, measuring containers, tip adapters, anchoring devices, gauze pads, protective-dressing wipes, tape, and tube cleaning brushes.

#### **Pharmacy Administered Immunizations**

Influenza and pneumococcal vaccinations are covered when administered by licensed pharmacists who obtain additional certification to administer influenza and pneumococcal vaccinations to adults 18 years of age and older.

### **Additional Formulary Information:**

- Appetite suppressants/weight-loss medications are excluded from coverage.
- Medications used for cosmetic purposes are excluded from coverage.
- Medical foods other than PKU supplements (which may or may not require a prescription) are excluded from coverage.
- Prenatal vitamins classified as medical foods are not covered.
- Medications used for the treatment of sexual or erectile dysfunction are not covered.
- Up to three cycles of the following drugs used to promote fertility are covered: Bromocriptine, Clomiphene Citrate, Letrozole and Tamoxifen. Prior authorization may be needed before we will cover these drugs for infertility. All other drugs used to promote fertility are not covered.
- Growth hormones are excluded from coverage when prescribed for the treatment of short stature.
- Medications that are excluded from coverage under state and/or federal law are not covered by Independent Health.
- In order to ensure the safest and most appropriate care, Independent Health's drug coverage criteria is limited to medically-accepted indications based on FDA approved labeling and guidelines not otherwise excluded from New York State Medicaid.
- Medications listed on the drug formulary as covered without restriction may require prior authorization or may not be covered if it is determined that they are being used in conjunction with a procedure or treatment not covered under the member's Health Contract.
- Medications not recognized by the FDA without a National Drug Code (NDC) are excluded from coverage.
- Generic substitution is used only as required by

state pharmacy laws. Therapeutic interchange is not utilized.

- Prescriptions are generally limited to a maximum of a 30-day supply per fill.
- Diabetic Test Strips are limited to a maximum of 100 per fill/30 days.
- FreeStyle Libre continuous glucose monitors and sensors are also available at retail pharmacies, if member is concurrently on insulin.
- Dexcom G6 continuous glucose monitoring system covered with concurrent use of bolus insulin.

### **Cost-share change for diabetic equipment, supplies, and medications**

The cost share for insulin and oral anti-diabetic medications will depend on where you obtain these medications. This is a change from your current coverage:

- If you obtain your medication at the pharmacy, you will pay your appropriate pharmacy cost share.
- If you obtain the medication at a medical supply provider, you will pay your office visit cost share.
