THIS DOCUMENT HAS INFORMATION ABOUT THE PRESCRIPTION DRUGS WE COVER FOR QUALIFIED HEALTH PLANS.

Qualified Health Plans (QHP) are Affordable Care Act-compliant plans that cover essential health benefits and follow established limits on cost-sharing.

In addition to frequently asked questions regarding our drug formulary and prescription coverage, the actual list of covered drugs for our health plans is also included herein. This list is current as of March 2020.

If you have questions about your health plan, please call a Customer Service at the number on your ID card or log in at hap.org and send us a message.

Please note: A drug's formulary status may change prior to being updated in this document. The listing of a drug does not imply coverage for all benefits. Some dosage forms or strengths of an existing formulary drug may not be covered. Please contact us for more details.

Q&A

Q. What is the drug formulary?
A. A formulary is a list of covered prescription drugs. Prescription drugs are self-administered medications that you can obtain from pharmacies and that you use in the outpatient setting. The list of covered prescription drugs is selected with a team of health care providers. This represents the prescription therapies believed to be a necessary part of a quality treatment program. We will cover the drug listed in our formulary as long as it is medically necessary, the prescription is filled at an in-network pharmacy and other rules of the health plan are followed.

Formulary list can change over time. We may add new drugs as they are approved by the FDA and likewise we may remove drugs as new information about safety and effectiveness is available. We may also change the tier which reflects your cost-share for the drug. We may update our rules for coverage meaning that we may add or remove the need for prior approval, quantity limits or criteria for coverage.

The Qualified Health Plan Formulary is available at hap.org/prescription-drug.

Q. How do I use the drug formulary?
A. The formulary has a list of covered generic and brand name drugs and is organized by categories. Each category depends on the type of medical conditions that the drugs are used to treat. For example, drugs used to treat a heart condition are listed under the category “Cardiovascular Agents.” If you know
what a drug is used for, look for the category name in the list. Then look under the category name for the
drug.

If you are not sure what category to look under, you should look for your drug in the Index that is at the end of
formulary list. The Index provides an alphabetical list of all of the drugs included in this document.

If you are using a computer, you can search for a specific drug within the formulary, just select Ctrl-F
and enter the name of the drug in the search box. The cursor will highlight the drug you are looking for.

Q. What is a *generic substitution*?
A. When an FDA approved generic drug is available, your prescription will be filled with the generic form
of the medication. Generic drugs contain the same active ingredients and are equivalent in strength and
dosage to the original brand name product. Generic drugs cost you and your health plan less money
than a brand name drug.

Q. What are *specialty drugs*?
A. Specialty drugs are biologics or prescription drugs that require close monitoring for safety and
efficacy. For this reason we contract with Pharmacy Advantage, a specialty pharmacy, from whom you
can obtain specialty drugs. Specialty drugs require prior authorization and Pharmacy Advantage can
help you and your doctor submit a request. You or your doctor can contact Pharmacy Advantage at
(800) 456-2112.

Q. Are there any restrictions on my coverage?
A. Some covered drugs may have additional requirements or limits on coverage. The coverage
requirements are listed on the drug formulary. These requirements and limits may include:

- **Prior Authorization** – Some medications on our formulary have criteria you must meet before
  we cover them. This means that you will need to get approval from us before you fill your
  prescriptions for these drugs.
- **Step Therapy** – In some cases, we require you to first try certain drugs to treat your medical
  condition before we will cover another drug for that condition. For example, if Drug A and Drug B
  both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A
  does not work for you, we will then cover Drug B.
- **Quantity Limits** – Certain drugs have quantity limits. A quantity limit is the maximum quantity
  that can be dispensed on each fill of medication or the maximum number of fills allowed for
  treatment of certain conditions. Specialty/injectable drugs (except insulin) and select oral drugs
  (e.g. opioid analgesics) are limited to a maximum 30-day supply per fill. Some specialty drugs
  require a 15-day supply for the first fill.

**Benefit limitations**
Our drug formulary applies to drugs used in an outpatient setting. It does not include medication
administered in the doctor's office or while in the hospital. These are known as *medical drugs*. Note that
some medical drugs are listed on this formulary because they are part of our Specialty Program. Please
refer to “what are specialty drug?” section for information about these medications.

The following are general drug coverage exclusions that apply to all members:

- Over-the-counter (OTC) medications and their equivalents are not covered unless specified in
  the formulary or on the rider
- Drug products used for cosmetic purposes are not covered
- Experimental drugs and/or any drug products used in an experimental manner are not covered
- Replacement of lost or stolen medication is not covered
Since the selected drug packages and coverage vary for each Qualified Health Plan, check your Summary of Benefits and Coverage (SBC) for your cost-sharing and exclusions.

Q. What if my drug is not on the drug formulary?
A. When your drug is not listed on the formulary it is considered non-formulary. You or your doctor can ask us to make an exception and cover your drug and one of HAP clinical specialists will evaluate if the medication will be covered by your plan. However it is best to first discuss with your doctor or pharmacist if one of the formulary alternatives will work for you.

Exception approvals for standard non-formulary medications will process at the highest non specialty copayment. Exception approvals for non-formulary specialty drugs will process at the highest Specialty copayment. Non-formulary drugs when approved by plan are limited for up to 30 day supply at a time. Non-formulary specialty drugs when approved for use by the health plan can be required to be dispensed by Pharmacy Advantage.

Q. How do I request prior authorization or drug formulary exception?
A. You or your doctor can ask us to make an exception to our requirements or limits. You may also ask us to cover a drug not included on our formulary or ask us to exempt you from a formulary requirement through the exception process. Your doctor must submit a request to us indicating why formulary requirements should not apply. Your doctor may use the forms available at hap.org/providers to send us information when requesting either prior authorization or exception to the formulary.

Q. What is included in the drug formulary?
A. The name of the covered drug is listed in the first column. Brand name drugs are capitalized (e.g., ADVAIR DISKUS) and generic drugs are listed in lower-case (e.g., gabapentin). When a generic drug is listed on the formulary, only the generic is covered.

The second column represents the drug’s cost-sharing level, or Tier. Every drug on the formulary is in one of six cost-sharing Tiers. The following table will translate how the six Tiers shown on the formulary are applicable to your health plan’s prescription drug benefit. Refer to your Summary of Benefits and Coverage for your cost-sharing information.

<table>
<thead>
<tr>
<th>Description of Tier</th>
<th>Copay</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preventive— generic preventive prescription drugs that are covered at zero cost share per the Affordable Care Act when Health Care Reform (HCR) rules are met.</td>
<td>Tier 0 (Zero Cost Share)</td>
</tr>
<tr>
<td>Preferred Generic – non-brand name drugs that have the lowest copay</td>
<td>Tier 1</td>
</tr>
<tr>
<td>Generic- non–brand name drugs that are designated by Us to be Non Preferred Generic</td>
<td>Tier 1A</td>
</tr>
<tr>
<td>Preferred Brand – brand name formulary drugs that have the lowest brand copay</td>

</tr>
<tr>
<td>Non-Preferred Brand – brand name formulary drugs that are designated by Us to be Non Preferred Brand</td>
<td>Tier 3</td>
</tr>
<tr>
<td>Preferred Specialty Drugs – biologics or drugs that require close monitoring for safety and efficacy and as designated by us to be a specialty drug</td>
<td>Tier 4</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>Non Preferred Specialty Drug – biologics or drugs that are designated by us to be Non Preferred Specialty drug</td>
<td>Tier 4A</td>
</tr>
<tr>
<td>Medical Drugs - These are drugs that are infused or administered in doctor’s office or facility, are covered under your medical benefit, and may be required by Us to be obtained from Specialty Pharmacy.</td>
<td>Tier 7 (Medical Coinsurance)</td>
</tr>
</tbody>
</table>

The third column lists the requirements or limits that must be met for coverage of your drug. The explanations for the abbreviations are as follows:

**PA (Prior Authorization)** – You or your doctor is required to get prior authorization from us before you fill your prescription for this drug. Without prior approval, we may not cover this drug.

**QL (Quantity Limit)** – We limit the amount of these drugs that are covered for each prescription. For example, if it is normally considered safe to take only one pill per day for a certain drug, we may limit coverage for your prescription to no more than one pill per day.

**ST (Step Therapy)** – Before we will provide coverage for this drug, you must first try another drug(s) to treat your medical condition. This drug may only be covered if the other drug(s) does not work for you.

**SP (Specialty Pharmacy)** – This specialty drug can only be obtained from Pharmacy Advantage by calling them at (800) 456 2112.

**HCR (Health Care Reform)** – You must meet the Health Care Reform requirements for preventive use to obtain the drug at zero cost sharing.
