

# 2018 MHC

## Commercial Group Preferred Drug List

## **How to use the Preferred Drug List**

The Preferred Drug List (PDL) is a summary of prescription drugs covered under your plan. This contains the most commonly prescribed drugs with their dosing and forms. This list is not a complete list and additional drugs may be covered. *Please note that the Preferred Drug List is subject to change as new drugs become available and therapeutic categories are reviewed and updated to provide the most effective and greatest value therapies available for our members.*

Your pharmacy benefit has four tiers and the tier is identified in the second column on the Preferred Drug List below. These tiers determine your out of pocket responsibility and correspond to the copays and/or coinsurance shown on your benefit summary. In most cases, the drugs on the lower tiers will cost less.

- Tier 0: Preventive Drugs required by the Affordable Care Act (ACA)
- Tier 1: Preferred Generics
- Tier 2: Non-Preferred Generics / Preferred Brands
- Tier 3: Non-Preferred Brands
- Tier 4: Specialty (Most specialty drugs require PA and must be filled at the Plan's designated Specialty Pharmacy)

If you have any questions about the Preferred Drug List or your pharmacy benefits please contact Pharmacy Customer Service at the number listed on the back of your ID Card. Pharmacy Customer Service is available 24 hours / 7 days a week / 365 days a year. You can also view additional information by logging into the pharmacy member portal. If you need assistance in registering for the portal, please contact Pharmacy Customer Service. The pharmacy member portal provides information such as how to find a pharmacy; look up drug information like benefit tier, limits, and drug interactions; shop for best price of a medication at different pharmacies; check the status of a prescription; print your drug fill history; and how to set up mail order.

### **HOW DRUGS ARE CHOSEN FOR THE PDL**

Drugs approved by the United States (U.S.) Food and Drug Administration (FDA) are reviewed and considered for the PDL by the Pharmaceutical & Therapeutics (P&T) Committee utilizing the following criteria:

- a) The drug is effective and medically necessary for the treatment, maintenance, and/or prevention of a specific medical condition
- b) The PDL does not have other alternatives or similar drugs that could be used in its place
- c) The drug shows a strong therapeutic outcome
- d) The drug shows safety for medical use

As new drugs are approved by the FDA, they are reviewed within 180 days against similar drugs available on PDL before being considered for inclusion. New drugs with an FDA designation of 1P (FDA priority review – potential therapeutic gain) will automatically be reviewed for consideration for the Preferred Drug List. New drugs with an FDA designation of 1S (FDA standard review – no therapeutic gain) will not be reviewed for consideration until a provider/member requests or the next therapeutic class review is done.

In addition, therapeutic classes are reviewed on a regular basis to ensure the Preferred Drug List includes the most clinically and cost-effective medications.

Members will receive notices related to drug formulary changes at the point of sale when filling a prescription that is impacted by modifications to the PDL. Network pharmacies are required to inform the member of these messages regarding updates or changes to the program which may impact a member. In addition, members whose drugs have been removed from the PDL or have a negative change such as increased tier or new limits will receive written communication of change.

### **PREVENTIVE DRUGS**

Certain medications are considered preventive under the Affordable Care Act (ACA). ACA preventive drugs are covered at 100 percent (no patient responsibility), although limits may apply. For more information about your preventive drug benefits, please contact Pharmacy Customer Service at the number listed on the back of your ID Card.

### **PRIOR AUTHORIZATION (PA)**

To ensure appropriate utilization, some generic and brand medications and all specialty drugs require Prior Authorization to be eligible for coverage under the member's prescription drug benefit. The P&T Committee establishes the Prior

Authorization criteria. In order for a member to receive coverage for a medication requiring Prior Authorization, the member or member's provider should contact Pharmacy Customer Service at the number listed on the back of your ID Card. Your provider will be required to complete a prior authorization form and provide clinical documentation to show why this medication is needed for treatment of your disease state or medical condition. A letter of medical necessity is also recommended. Your provider should also include in his/her letter your diagnosis and previous therapies that have failed. If Prior Authorization is not received or if the medication is filled prior to approval, the cost of the medication will be full member responsibility. In addition, Prior Authorizations are not able to be back-dated.

#### **QUANTITY LIMIT (QL)**

Quantity Limit is a program that ensures members do not receive a prescription for a quantity that exceeds recommended Plan or safety limits. Limits are set because some medications have the potential to be abused, misused, shared, or have a manufacturer's limit on the recommended maximum dose. Quantity limits are based on FDA approved dosing schedules, current medical practices, evidence-based clinical guidelines, and peer-reviewed medical literature related to a particular drug. Prior Authorization is required for any quantities that exceed Plan limits.

#### **STEP THERAPY (ST)**

Step Therapy is a program for prescription drugs that are taken on a regular basis to treat an ongoing medical condition. The program is developed around safety, cost, and a member's health. In Step Therapy, the covered drugs are arranged in a series of "steps". The program typically starts with generic drugs as the "first step." These generics are rigorously tested and approved by the FDA and allow you to have safe, effective treatment with medication that is more affordable. More expensive brand-name drugs are usually considered in the "second step" if your provider determines the "second step" products are medically necessary for your treatment. Step Therapy is developed under the guidance and direction of independent, licensed doctors, pharmacists, and other medical experts. They review the most current research on thousands of drugs tested and approved by the FDA for safety and efficacy. The first time you submit a prescription that is not for a first-step drug, your pharmacist will receive a message to tell you that the Plan requires Step Therapy. This means if you don't want to pay full price for your prescription drug, your doctor needs to write a new prescription for a "first-step" drug. With Step Therapy, if you've already tried and failed the "first-step" drug, can't take the "first-step" drug (because of an allergy, etc.), and/or your provider can show medical necessity for the second step products, your provider can submit a request for Prior Authorization review.

#### **THERAPEUTIC INTERCHANGE (TI)**

Therapeutic interchange is the practice of replacing, with your physician's approval, a prescription medication originally prescribed with a chemically different medication. Medications used in therapeutic interchange programs are expected to produce similar levels of effectiveness and results. Therapeutic interchange programs are based on scientific evidence. These programs are developed and administered by a team of physicians, pharmacists, and other medical practitioners who are experts in the diagnosis and treatment of disease. The program is designed to work along with other tools that medical professionals use to promote safe and effective drug therapy. If therapeutic interchange is required on a drug, your pharmacist will receive a message to request a therapeutic interchange from your provider. If you or your provider feel the interchange is not right for you and you do not want to pay full price for your prescription, your provider can submit a request for Prior Authorization review.

#### **AGE**

Some medications have a minimum or maximum age limit requirement under the Plan. Only members within those limits are able to fill those medications.

#### **BRAND-GENERIC PENALTY (Ancillary Charge)**

A Brand-Generic penalty is applied if you receive a brand name drug, regardless of reason or medical necessity, or if your provider prescribes a brand name drug when a generic is available. A Brand-Generic Penalty is the difference in cost from the generic to the brand name drug. This penalty is in addition to the regular cost sharing outlined in your benefits summary. The Brand-Generic penalty does not apply towards Deductibles or Out-of-Pocket Maximum.

#### **GENERIC MANDATORY PLAN**

The Plan mandates generic drugs wherever available. If a brand-name drug is requested when a generic is available, the generic will be available without a Prior Authorization. If brand is still desired, Prior Authorization will be required, even if not indicated on the PDL below. If brand is approved through the PA process, the Brand-Generic penalty will still be applied.

**MAIL ORDER**

Mail order is when a 90 day supply of a generic or brand name drug (Tier 0, 1, 2, and 3) is mailed directly to you through a designated Mail Order Pharmacy. Not all medications are available through Mail Order. Contact Pharmacy Customer Service at the number listed on the back of your ID Card for more information or to get started on the Mail Order program.

**SPECIALTY PHARMACY**

The Plan requires that all medications noted as Specialty drugs (Tier 4) be filled through the Plan's designated Specialty Pharmacies. In cases where drugs are available only through a limited distribution channel from the manufacturer, these drugs may be filled at other designated specialty pharmacies as directed by the Plan.

**OFF-LABEL USE OF MEDICATIONS**

The FDA requires that drugs used in the U.S. be safe and effective. The label information of a medication outlines drug use for "approved" doses and specific conditions or disease states. The use of a drug for a disease state or condition not listed on the label, or in a dose or therapy not listed on the label, is considered to be a "non-approved" or "off-label" use of the drug. Off-label use of a medication is not covered unless it meets the Plan's off-label use policy. A Prior Authorization is required when a medication is used outside of its FDA indication, dosage, or treatment. Coverage will be reviewed under the off-label use policy and subject to the same conditions and limitations as any other prescription drug. Therapies deemed investigational are not a covered benefit.

**NON-FORMULARY (not covered) DRUGS**

Drugs that are not listed on the PDL are considered non-formulary and are not covered by the Plan. Your provider may request to speak to a member of our clinical team if they feel a drug should be included on the PDL and/or they may submit a formulary change request form for consideration by the P&T Committee. Contact Pharmacy Customer Service at the number listed on the back of your ID Card for more information.

**PAPER CLAIMS FILING LIMITS**

Point-of-sale claims are generally submitted electronically at the time of dispensing. However, there may be mitigating reasons that require a claim to be submitted via a paper claim after being dispensed. The timely filing limit for paper claims submission is 90 days from the date of service for all original claims. Paper claims will be reimbursed off of what the contractual discount would have been if claim had processed through the system, so member will be responsible for any difference in paid cost.
