

## **Oregon Standard Formulary**

## Prescription drug benefits from BridgeSpan Health

You want to get the most from your benefits. You also want the information you need to make smart decisions about prescription drugs. We're here to help you do that. We'll give you and your doctor the latest and best information about effective, quality drugs that also cost less.

### BridgeSpan Health prescription drug program

Your plan covers drugs listed on BridgeSpan Health's Oregon Standard Formulary. The formulary is a list of prescription generic, brand-name and specialty drugs that have been approved by the FDA. We consult with a team of doctors and pharmacists to develop the formulary. It can help you and your doctor choose effective drugs that can save you money. You can buy formulary drugs at participating retail, mail-order and specialty pharmacies. Our formulary is available on BridgeSpan.com. Your plan doesn't cover drugs not listed on the formulary.

### Changes to the formulary

Our Pharmacy & Therapeutics Committee (made up of doctors and pharmacists from right here in our community) reviews the latest drug information. Their goal is to find ways to help you get the treatment you need for the most affordable price. Generally, if you're currently taking a formulary drug, its formulary status won't change during the year unless:

- The same drug becomes available as a generic, or
- Safety or effectiveness concerns are raised, or
- The Pharmacy & Therapeutics Committee determines that changes to the formulary would overall be best for our members. We'll send you a letter if a change means more out-of-pocket costs for you.

### What is the Oregon Standard Formulary prescription drug benefit?

With an Oregon Standard Formulary benefit, prescription drugs fall into one of four categories or "tiers." Each tier has a different cost share.\*

Tier 1— Generic	Lowest cost share. Generic drugs are as effective, safe and high-quality as their brand-name counterparts, but they cost less.
Tier 2— Preferred brand-name	Because of their value and effectiveness, these are preferred when there is no generic.
Tier 3— Non-preferred brand-name	These may cost more and are less preferred than alternatives in Tier 1 or Tier 2.
Tier 4— Specialty medications	These are used to treat complex medical conditions and are available through our designated specialty pharmacy. They may require more involvement with your doctor and call for special storage and handling.

\*"Cost share" is a deductible, flat-dollar copay or coinsurance/percentage.

## What are your cost shares for Tier 1, 2, 3 or 4 drugs?

You can find your cost shares in your benefit booklet or when you log in to BridgeSpan.com. Of course, you can always call Customer Service at the number listed on the back of your member card.

## About prescription drugs

### Preventive drugs

Preventive care benefits are an important part of a plan that covers preventive drugs. Under some plans, you may not need to pay a copay or coinsurance, or meet your deductible for preventive drugs.

Preventive drugs prevent a disease or condition for people who have risk factors. They can also be used to prevent the recurrence of a disease or condition for those who have recovered. They don't include drugs that treat an existing illness, injury or condition.

See your benefit booklet or online summary to find out if your plan covers preventive drugs. To view the covered PPACA Preventive Care Medication List, go to BridgeSpan.com.

### Advantages of generic drugs

*Consumer Reports* says, "Generics are every bit as pure, potent, and safe as brands."<sup>1</sup> That's because the FDA makes sure that generic drugs are just as strong, effective and pure as brand-names. By law, all generics must have the same active ingredients as their brand-named equivalent.

- Generic equivalent: The same active ingredient, strength and dosage as the brand-name
- Generic alternative: A different chemical that has a similar effect as the brand-name

Generic drugs generally cost less than brand-name drugs because the makers of generic drugs aren't spending as much money on research, development and marketing. Talk with your doctor to see whether a generic is right for you.

### About specialty drugs

Many people with complex conditions, such as, but not limited to, multiple sclerosis, rheumatoid arthritis and cancer, need special medications. These drugs are available through our designated specialty pharmacy and may require special handling.

We created the Specialty Select Pharmacy Program for specialty drugs. It includes:

- Educational materials, counseling and product information
- 24-hour access to pharmacists and nurses
- Refill reminders
- Free delivery and supplies
- Convenient delivery in unmarked packaging to ensure privacy

You'll be able to get your first prescription filled at a retail pharmacy if the medication is available. Then you'll get a letter explaining that you'll need to use one of our contracted specialty pharmacies for all future fills. For more information on the Specialty Pharmacy Program, see BridgeSpan.com.

## Tips for getting your prescription filled

### Filling your prescription at a retail pharmacy

OmedaRx provides our participating pharmacy network. It's a nationwide network of over 65,000 pharmacies. To have your drugs covered, you need to use a participating network pharmacy and show your member card before purchasing your prescription. This way you'll pay the correct cost share, and the pharmacist can see your prescription history.

Most pharmacies in your area are part of the network. If you need a prescription filled while you're traveling, you'll find network pharmacies throughout the United States. Simply go to [BridgeSpan.com](http://BridgeSpan.com).

If you go to a pharmacy not in the network, your medication won't be covered.

Your plan usually covers a 30-day supply of medication at a retail pharmacy. See your benefit booklet or benefit summary online for your benefit limit.

If you get less than a 30-day supply, you'll still have to pay the full copay.

### Save time and money with prescriptions by mail

If you take a maintenance medication, you can receive your medicine by mail from Walgreens Mail Service Pharmacy™. You save time with fewer trips to the local pharmacy, and you save money with discounted prices and lower cost shares.

You can get prescriptions up to the maximum supply allowed by your plan—typically 90 days, but it may vary—for less than you would pay for the same amount at a retail pharmacy. See your benefit booklet for details.

### How to receive your prescription by mail from the Walgreens Mail Service Pharmacy

Getting started is easy!

1. Since it takes about two weeks to receive your prescription, ask your doctor to write two separate prescriptions (be sure that your doctor indicates if refills are allowed):
  - a. One for a 30-day supply that you can fill right away at a retail pharmacy
  - b. One for a 90-day supply, or the most your plan allows, that you can mail or fax to Walgreens Mail Service within two weeks of your medicine running out
2. Complete a Mail Service Registration Form, which you can download from [BridgeSpan.com](http://BridgeSpan.com).
3. Send your prescription(s), order form and payment to the address or fax number on the order form. You can pay with a personal check or credit card.

You'll get your prescriptions by mail in about two weeks.

### Make it even easier

Ordering new prescriptions and refills is easier once you have an account with the Walgreens Mail Service Pharmacy. Simply log in to [Walgreens.com/MailService](http://Walgreens.com/MailService) and follow the instructions. Or order your refills by calling Walgreens Customer Care at 888-832-5462.

## Quality drug therapy with the Prior Authorization Program

Using your medications correctly is important. Our Prior Authorization Program helps you make decisions about your care and prescription drugs. It aims to improve the quality of your drug therapy by:

- Promoting the appropriate use of your medications
- Checking the appropriate length of your drug therapy

### How the program works

When you fill your prescription, it's checked to see if it meets recommended guidelines:

- If it meets the guidelines, your prescription is filled without interruption.
- If it doesn't meet the guidelines, your prescription won't be filled until it has been reviewed.

### Review process

The prior authorization process is simple. Your doctor or pharmacist can go to [BridgeSpan.com](http://BridgeSpan.com), call 800-643-5918, or fax 888-437-1510.

The review process takes one to two business days. If your prescription is approved, then it's covered and can be filled the same day.

### Medications subject to the Prior Authorization Program

Drugs tagged with **PA** in the formulary must receive prior authorization. For an updated list of medications that require prior authorization, see [BridgeSpan.com](http://BridgeSpan.com).

## Frequently asked questions

### **Q. What are my cost-share amounts?**

A. Check your benefit booklet to see what your cost share is for each tier.

### **Q. What if I want to take a brand-name drug, even if there is a generic available?**

A. It's your choice. In some cases, if you stay on a brand-name drug when a generic is available, you may have to pay more or up to the full price for your medication.

### **Q. Are the drugs on the formulary just the ones that are the cheapest?**

A. No. All of the drugs on our formulary must be approved by the FDA. Also, our Pharmacy & Therapeutics Committee needs to determine that they are safe and effective. When several drugs are similar in safety and effectiveness, one or more of the lower-cost ones are selected for our formulary.

### **Q. I've heard that some people can't take generic drugs. Why not?**

A. A brand-name drug and its generic equivalent have the same active ingredients. But different manufacturers can use different inactive ingredients. Some people may have an allergic reaction to the inactive ingredients. This type of reaction is rare and can happen just as often with a brand-name drug.

### **Q. What if there is no generic drug available to substitute for my brand-name drug?**

A. Even if there isn't a generic equivalent yet, there may be another generic available within the same class of drugs that will work just as well. Talk to your doctor to learn more.

### **Q. What if my doctor says I have to take a drug not included on the formulary?**

A. Your plan doesn't cover non-formulary medications. If you choose to use a non-formulary medication, you'll be responsible for the full price.

However, if your doctor feels that a non-formulary medication is medically necessary, you may be able to get an exception and have it covered. You or your doctor will need to request prior authorization so that we can determine medical necessity. See your benefit booklet for more information.

### **Q. Are there any excluded categories of drugs?**

A. Yes. Common exclusions include drugs for obesity, infertility and sexual dysfunction. Certain drugs that have a generic or an over-the-counter alternative are not covered. See your benefit booklet for your plan's exclusions.

### **Q. What does it mean when my drug is covered under the medical benefit?**

A. Drugs covered under the medical benefit are often injected or infused and typically are administered by a health care professional. These drugs and their related services are covered under your medical benefit instead of the prescription drug benefit. See your benefit contract, log in to see your benefits on BridgeSpan.com or call Customer Service for coverage details specific to your plan.

### **Q. Can I use any pharmacy I want?**

A. No. You need to use a network pharmacy to have your drugs covered. If you go to a pharmacy not in the network, your medications won't be covered.

Specialty drugs are covered only when purchased through our specialty pharmacy. See your benefit booklet for details about the Specialty Select Pharmacy Program and coverage at a non-network pharmacy.

### **Q. How do I find a network pharmacy near my home or when I am away?**

A. Most pharmacies in your area are probably in the network. There are also network pharmacies throughout the United States. Use BridgeSpan.com to find a network pharmacy near you.

**Q. How do I enroll in the Specialty Pharmacy Program?**

A. You can fill your first specialty prescription at a retail pharmacy. Then you'll get a letter explaining that in the future you'll need to use one of our contracted specialty pharmacies for your drug to be covered. Call Customer Service for more information.

**Q. Is there more drug information available to members?**

A. Visit [BridgeSpan.com](http://BridgeSpan.com) to learn more.
