Drug Formulary

This formulary does not apply to Unity State and Local Government members or Unity BadgerCare Plus members.

State and Local Government members should call Navitus at (866) 333-2757 or visit www.navitus.com for information about your prescription drug benefits.

Unity BadgerCare Plus members must call the Wisconsin Department of Health and Family Services at (800) 362-3002 or visit www.forwardhealth.wi.gov for information about your prescription drug benefits.

Unity Standard Drug Formulary Information

This Formulary serves members with high deductible (HSA) plans or features a one- or two-tier Pharmacy Benefit in the Unity Network. The most accurate way to be certain you are viewing the correct formulary document is to use the formulary wizard tool at www.unityhealth.com/drugformulary.

This document is to be used as a tool to help you understand how specific drugs are covered under Unity's Prescription Drug Formulary and is not a guarantee of coverage.

This document does not apply to State of Wisconsin employees whose drug benefit is administered by Navitus or BadgerCare members whose drug benefit is administered by ForwardHealth.

The most recent version is available at www.unityhealth.com, or can be requested in hard copy format by calling (888) 450-4884. For a detailed explanation of the pharmacy benefit, refer to the prescription drug benefit brochure available on the website or your Schedule of Benefits.

Using the Formulary Document

To search the on-line version,

- Use the "Find" box at the top of the document and enter the drug name. The name may be listed multiple times in the document.
- Press "Enter" to tab through each entry.

Each page of the formulary has three columns; "Drug Name", "Tier", and "Notes". Drugs are grouped by therapeutic category and class and listed alphabetically within the class. Those available as a brand formulation only are listed in bold, capitalized text. Generic formulations are included in lowercase font. Branded generics, such as oral contraceptives (Apri, Jolessa, etc.) are also listed in bold, capitalized text.

The "Tier" column can help to identify which cost sharing tier applies to the drug and "Notes" contains indicators that may limit coverage of specific drugs (listed below). Please refer to your Schedule of Benefits for specific cost share information for your benefit. Medications listed as Tier 1 or Tier 2 are preferred and equate to "formulary drugs" as defined in your Unity Prescription Drug Rider while medications listed as Tier 3 and nonpreferred and would equate to "nonformulary drugs" in the Unity Prescription Drug Rider.

General Drug Coverage Concepts

Exclusions: Some drug classes are not covered by your Unity prescription benefit plan. Examples of these include hair loss drugs, sexual enhancement drugs, infertility drugs, most over-the-counter drugs, cosmetic treatments, and nutritional supplements/medical foods. Refer to your Unity Prescription Drug Rider to view your specific exclusions.

Nonformulary: Drugs that are not specifically listed on the Unity formulary and not excluded in the exclusions section of your Prescription Drug Benefit Rider are nonformulary and not covered. Exceptions for nonformulary medications can be considered for medical necessity. Exceptions can be submitted using the standard Unity Medication Prior Authorization Request form.

Over-the-Counter (OTC): Drugs that do not require a prescription from a doctor are not covered under the pharmacy benefit unless specifically listed as approved by the Unity Pharmacy & Therapeutics Committee.

Unity's Generic Substitution Policy: This policy states that when equivalent generics are available for a drug, the brand product is restricted. If your healthcare practitioner feels it is medically necessary to receive the brand-name product, a prior authorization must be submitted for review. Objective documentation from the provider of a clinically significant change in symptom control or new side effect that occurred with the generic formulation that was not seen with the branded product must be included with the prior authorization request. These changes must happen in a time frame consistent with the properties of the drug and not be related to normal disease fluctuations or other nondrug factors. Approved brand name product authorizations will process with the applicable nonpreferred Tier 3 copay or coinsurance when filled at the pharmacy. Refer to the prescription drug benefit brochure and the prior authorization criteria on the Unity website for more details.

Compounded Drugs: Compounded drugs are medications prepared at the pharmacy for an individual person. They include changing existing drugs into a new formulation or dose that is not commercially available or creating mixtures of drugs into a new combination product. Unity Health Insurance requires the submission and approval of a Medication Prior Authorization Request form for compounded prescriptions costing more than \$150 per 30 day supply before coverage will be authorized. Compounded hormones (such as estrogen, progesterone, or testosterone) also require prior authorization for coverage. The criteria for coverage and forms are available on Unity's website at www.unityhealth.com.

RX Outcomes (RXO): Some drugs have been shown to improve the overall health of people with health problems like high blood pressure, high blood sugars (diabetes mellitus), and breathing difficulties (asthma) when taken on a daily schedule. For members whose plan includes the RX Outcomes benefit, the drugs noted as RXO in the "Notes" section and products listed in Appendix B will process with a \$5 copay.

Bowel Preparations for Colonoscopy: The Standards of Practice Committee of the American Society for Gastrointestinal Endoscopy revised their Bowel Preparations before Colonoscopy recommendations in 2015. Drugs included in these guidelines are covered at \$0 cost share.

Coverage Indicators

Specific requirements for coverage of specific medications are noted in the formulary listing in the "Notes" column. An explanation of each type of requirement or parameter is listed below.

Restricted Medications (PA): Medications designated with a "PA" are restricted medications and require prior authorization for coverage. Unity Health Insurance requires the submission and approval of a Medication Prior Authorization Request form before coverage is granted for restricted medications. The *Medication Prior Authorization Request Form* can be obtained through Unity Customer Service or via the Unity website at www.unityhealth.com. A copy can also be found on the last page of this document.

Requests can be submitted via fax to (888) 450-4711, online at www.unityhealth.com, by phone, or can be mailed to the address on the form. The information will be reviewed and both the requesting physician and the member will be notified regarding the coverage decision. If you would like to discuss the specifics of a medication request decision with a pharmacist, or have general questions about Unity's prior authorization criteria, you may call (888) 450-4884.

Quantity Limits (QL): Medications designated with a "QL" have specific quantity limits that are different than the general limitations of your drug benefit. Your prescription drug benefit allows coverage for a maximum supply of 30 days per prescription claim. Appendix A lists the specific quantity limits for each medication assigned a "QL". **Individually packaged items, such as inhalers and nasal sprays are limited to 2 units per copay (e.g. 2 inhalers, 2 bottles, etc.) not to exceed a 30 day supply. Insulins are limited to 30 ml per 30 days unless specified otherwise in Appendix A.** For medications with a quantity limit, if a member requires a higher quantity per month, prior authorization is required.

Step Therapy (ST): Medications designated with a "ST" are included as part of a step-therapy protocol, which first requires a trial of a prerequisite medication(s) before receiving coverage for the listed products. Step therapy medications require prior authorization. Drugs listed do not require paper prior authorization if Step Therapy criteria are met as the criteria have been implemented within the pharmacy claims system as on-line edits.

Age Limits (A): Medications designated with an "A" are covered without prior authorization within the designated age limits. Consideration for coverage of medications with age limits may be made for those outside the age limits by submitting a prior authorization.

Specialty Pharmaceuticals Program (SP): Medications denoted by "SP" in the formulary Notes column are required to be obtained from a pharmacy participating in the Unity Specialty Pharmaceuticals network for coverage through Unity. The UW Health Pharmacies are currently participating in the Unity Specialty Pharmaceuticals network. (This does not include the Arboretum or Evjue locations.)

You can contact the UW Health Pharmacy at (866) 894-3784 to make arrangements for receiving the medication (by mail or pick-up at one of the pharmacy locations). Many of these drugs also require prior authorization (denoted by PA in the "Notes" column). Please see the drug specific criteria for each product at www.unityhealth.com.

The majority of drugs included in Unity's Specialty Pharmacy network have pharmacist-run management programs to maximize patient knowledge and outcomes from these medications. This may include additional follow-up from the pharmacist or partial dispensing protocols.

The Unity Specialty Pharmacy program DOES NOT apply to medications administered in your physician's office, a hospital, or other health care facility. Coverage for medications administered in a health care facility falls under your Unity medical benefit and may be subject to other requirements. Please refer to www.unityhealth.com for further details on the Unity Specialty Pharmaceuticals Program.

Choice90 (C90): Medications listed with C90 have been designated as maintenance medications by a national database (First Databank) and may qualify for a 3 month supply fill at the pharmacy. The drug must have been filled at the same dose, form, and quantity for the previous 3 claims, cost less than \$1,000 per month, and the member's Unity drug coverage must not term in the next 3 months. Three copays will be charged for the 3 month supply. All additional restrictions will apply. The pharmacy must be participating in Unity's Choice90 pharmacy network to qualify. Medications included in the specialty pharmaceuticals program (SP) are not eligible for Choice90.

Mandatory Substitution Exception (MSE): Some medications do not require substitution when a generic product is available. These are exemptions to the generic substitution policy and are designated by "MSE". Medications that are included on the MSE list will be covered at the brand copay if the prescription is filled with the brand name product.

Oral Oncology Program (ONC): Medications included in this specialty pharmacy program have been identified as requiring additional monitoring to provide the best patient outcomes and reduce waste. Prescriptions for these medications must be filled at the UW Carbone Cancer Center Pharmacy (608) 263-7025) and a pharmacist trained in cancer therapies will assist a member through their treatment course. During the first three months of treatment members will only receive two weeks of medication at a time.

Smoking Cessation (SC): Unity covers drugs used to assist with smoking cessation at zero dollar cost share up to 180 days in a 365 day period. If a member requires a longer duration of coverage, prior authorization is required.
