

VRx PHARMACY SERVICES 2017 ABRIDGED FORMULARY

WHAT IS THE VRx PRESCRIPTION FORMULARY?

A formulary is a list of covered drugs selected by the VRx Pharmacy and Therapeutics Committee (P&T Committee) which consists of a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. VRx will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a VRx network pharmacy, and other plan rules are followed.

This is not a complete list of all drugs and may change due to new drugs, therapies, and other factors. If you have questions about your prescription drug coverage benefits, please call the VRx Benefit Advocate Team at 1-800-417-9722 or 1-877-879-9722 (toll free) between the hours of 7:00 am and 7:00 pm Mountain Time.

FORMULARY DEVELOPMENT

The VRx Pharmacy and Therapeutics Committee (P&T Committee) may, in its professional judgment, modify medications and supplies on the prescription formulary as follows:

- Place products on the Prescription Drug Formulary and remove products from the Prescription Drug Formulary.
- Place certain products on the Prior Authorization List and remove products from the Prior Authorization List.
- Place medications into and remove medications from the Specialty Pharmacy Program.
- Place and remove limitations or restrictions on products based on clinical best practice as published in peer reviewed literature. This includes quantity limits, age limits, concurrent therapy, quantity over time, and other administration methods to provide clinically appropriate products to Covered Persons.

Actions by the Pharmacy and Therapeutics Committee may take place monthly, as medical technology evolves, as indications, or FDA (Food and Drug Administration) guidelines change. VRx Pharmacy Services will inform covered persons of the actions taken by the Pharmacy and Therapeutics Committee as appropriate, including when benefits under this plan are affected.

FORMULARY TIERS

TIER 1: GENERIC MEDICATIONS

Generics have the same active ingredients in the same dose as brand-name drugs and have been approved by the Food and Drug Administration (FDA) to be safe and effective. Generic drugs generally cost less than brand-name drugs. These savings are passed onto you when you receive a generic medication. Talk to your doctor or pharmacist to see if a generic (tier 1) drug is right for you.

TIER 2: PREFERRED BRAND MEDICATIONS

Brand name medications that are covered by your plan at the formulary brand copay/coinsurance rate.

TIER 3: NON-PREFERRED BRAND MEDICATIONS

Non-preferred brand name medications are drugs that are covered by your plan, but at more of a cost to you. Non-preferred brand name medications may have a generic equivalent available, or there is another brand name medication that is used to treat the same condition that is generally more cost effective without compromising quality.

TIER 4: SPECIALTY PREFERRED MEDICATIONS

Specialty medications are certain covered drugs and are commonly “high-cost” drugs. Specialty medications generally require special handling, storage, dispensing, counseling, administration, etc. Specialty medications found on this tier, also called *Specialty Tier 1*, include generic specialty products, biosimilar products and specialty medications that have been shown to be clinically and cost effective.

TIER 5: SPECIALTY FORMULARY MEDICATIONS

Specialty medications are certain covered drugs and are commonly “high-cost” drugs. Specialty medications generally require special handling, storage, dispensing, counseling, administration, etc. Specialty medications found on this tier, also called *Specialty Tier 2*, are clinically and cost effective specialty products without alternative products.

TIER 6: SPECIALTY NON-PREFERRED MEDICATIONS

Specialty medications are certain covered drugs and are commonly “high-cost” drugs. Specialty medications generally require special handling, storage, dispensing, counseling, administration, etc. Specialty medications found on this tier, also called *Specialty Tier 3*, include specialty medications that have been shown to be less effective clinically and/or less cost effective. Products found on this tier have alternative products that have shown to be more clinically and/or cost effective.

TIER 7: NON-FORMULARY SPECIALTY MEDICATIONS

Specialty medications are certain covered drugs and are commonly “high-cost” drugs. Specialty medications generally require special handling, storage, dispensing, counseling, administration, etc. Excluded Specialty Medications, also called *Specialty Tier 4*, are medications that are not covered, or may be covered in rare circumstances.

VACCINE BENEFIT

Most vaccines are covered as part of the prescription benefit. Many vaccines may be administered at any participating pharmacy within the VRx network that offers immunization services.

DIABETIC SUPPLY BENEFIT

Blood glucose test strips, lancets, and insulin syringes are covered under the diabetic supply benefit.

MEDICATIONS WITH SPECIAL REQUIREMENTS

Your health, safety, and well-being are important to VRx. VRx works closely with your doctor in order to ensure that you are taking the right medication at the right time. Preauthorization, step therapy, and clinical edits are some of the programs that VRx uses to provide the best coverage at the lowest price. For a list of drugs that have specific requirements visit the *Benefit Information* section of our website at www.myvrx.com.

Preauthorization: Some medications require preauthorization and are only approved for certain conditions. Your doctor must submit a preauthorization request to VRx to determine coverage. Once VRx has reviewed the request your doctor will be notified of the decision. If the request is approved VRx will work with the pharmacy to get the prescription ready for you to pick up. If the request is denied, you will be notified by mail. A representative of VRx will then notify your doctor, and if necessary, provide direction for follow up with your doctor.

Step Therapy: Other medications require step therapy, which means that you must have tried and failed other medications that treat the same condition and are generally more cost effective without compromising quality. Step therapy may be waived (with a preauthorization request) if determined to be medically necessary. The use of samples does not waive the step therapy requirement.

Quantity Limits: VRx also places quantity limits on certain medications to ensure that the amounts prescribed are within the recommended dosages specified by the Food and Drug Administration (FDA). Quantity limits are set to ensure appropriate use and safety. Limits can be accumulative which means that the number of pills or units dispensed will be counted over time and across strengths and formulations of the same medication or medications that treat the same condition.

Specialty Pharmacy: Some medications on the formulary are considered Specialty Medications. These are medications which require special handling, storage, dispensing, counseling, administration, etc. VRx has contracted with several specialty pharmacies to meet the needs of members using specialty medications. These medications are not available through the Retail network. If you are using a Specialty Medication, please contact a Benefit Advocate for additional details.

Your physician can request an exception to quantity limits and step therapy through the preauthorization process.

You can check the coverage status of medication on your plan by using the *Drug Pricing Tool* on our website at www.myvrx.com.
