

## High Deductible Health Plan Preventive Medications

### Open Drug List

This benefit may be offered to high deductible health plans (HDHPs) designed for use with a health savings account (HSA). It applies only for specific large groups with the Open Drug List that have elected this benefit.

If you are not certain whether your group has this benefit option, please contact Blue Cross® Blue Shield® of Arizona (AZ Blue). The list is subject to change at any time, without prior notice. Some medications are available at a retail copay but will still require specialty distribution limited to a maximum of a 30-day supply.

HSA-compatible HDHPs generally require members to satisfy a deductible before the plan begins to pay for any benefits. The only permitted exception to that rule is for preventive care. The plan can pay for covered preventive care benefits before the member has met the high deductible.

The medications noted as HDHP have been identified as those most likely to qualify as preventive, based on U.S. Treasury Department guidance. This list does not include every medication that might possibly be considered preventive or every condition for which a preventive medication may be prescribed.

Neither AZ Blue nor your plan sponsor can guarantee that the U.S. Treasury Department will agree that all of these medications qualify as preventative, particularly when applied to a member's specific medical circumstances. You or your provider may be asked to demonstrate that you are taking a specific medication for purposes regarded as preventive under Treasury Department guidance.

If your plan covers AZ Blue designated prevention medications as a preventive benefit and you have your prescription filled at an in-network pharmacy, your plan will treat these designated medications as preventive. This means you will pay only your applicable copay or coinsurance amount, regardless of whether you have met your deductible. The AZ Blue prevention medication benefit applies only at in-network pharmacies. If you obtain AZ Blue designated preventative medications from an out-of-network pharmacy, your standard prescription benefits, with applicable deductible, coinsurance and copays, will apply. Your cost share payments for preventive medications will count towards your deductible.

If you want any of these listed medications to process under your standard pharmacy benefit instead of your preventive care benefit, please [click here](#). If your medications process under your standard prescription benefit, your costs for applicable coverage will apply.

To check coverage and copay information for a medication under your plan, visit [azblue.com](http://azblue.com) and log into MyBlue. If you do not have access to the website, call the Pharmacy Benefits number on the back of your member ID card.
